Table of Contents

To refresh the Table of Contents page numbering, select the Table of Contents below by clicking anywhere on the Table of Contents. Note: Ensure editing is enabled on your word document. Once you select the Table of Contents, right click on the Table of Contents. A dialog box will display. Select Update Field in the dialog box. A new popup will display that allows you to Update the Table of Contents. Select "Update page numbers only". Select the "OK" button to complete the refresh. Table of Content page numbering will update below.

Introduction

About this Document

This copy of the Product Terms has been downloaded from https://www.microsoft.com/licensing/terms for the date and program indicated on the title page and based on the selected products or configurations.

The terms formerly contained in the "Online Services Terms" have been moved into the "Product Terms" and no longer exist as standalone terms. The unified Product Terms are incorporated by reference into agreements governing Customer's use of Microsoft Products and Professional Services.

Access to versions of the Product Terms and Online Services Terms published prior to February 2021 are available here. Updates that Microsoft makes from time to time to Use Rights apply to Customer as set forth in Customer's agreement.

Summary of Changes

Below is a summary of changes and updates made to the terms over the past 12 months.

To see prior months, change the effective date in the top navigation to view a prior publish date.

Subscribe to the Microsoft Product Terms RSS feed to be notified of updates! https://www.microsoft.com/licensing/terms/feed/rss

November 1, 2023

Universal Terms for Online Services: General updates to the Generative AI terms to add clarity and align with Microsoft's Copilot commitments.

Privacy & Security Terms: Updated Azure Core Online Services to reflect new branding.

Microsoft 365: Added Microsoft 365 Copilot to EA/EAS/SCE and MCA Availability and License Prerequisites tables.

Microsoft Azure: Added terms for Microsoft Fabric and Azure AI Content Safety. General updates to AI and Azure OpenAI Service terms.

Microsoft Defender Experts: Added Microsoft Defender Experts for XDR (User SL) to EES Availability table.

GitHub Offerings: Updated General Service Terms and Service Specific Terms for added clarity when purchasing through Microsoft.

System Center Server: Updated to support the launch of System Center Server in MCA/CSP. Removed the "16-cores" per customer requirement for System Center when licensing by virtual OSE.

October 6, 2023

Windows Server Standard. Datacenter and Essentials: Added use rights for Windows Server Annual Channel for Containers.

Microsoft Azure: Clarified Disaster Recovery and dev/test environment use rights for Extended Security Updates enabled by Azure Arc.

October 1, 2023

Universal License Terms for Online Services: Additions and updates to terms that apply to all Generative AI products and application of Microsoft's Copilot Copyright Commitment.

Windows Desktop Operating Systems: Added Universal Print (Per User) to Availability tables.

Microsoft 365: Added Microsoft Defender for IoT - EIoT Device License to Availability and License Prerequisites tables. Added Microsoft 365 EEA offers in European Economic Area (EEA) and Switzerland to the Availability tables, as well as terms regarding availability and applicable license terms.

Office 365 Suites: Added Office 365 EEA offers in European Economic Area (EEA) and Switzerland to the Availability tables, as well as terms regarding availability and applicable license terms.

Microsoft Azure: Azure Active Directory (AAD) rebranded to Microsoft Entra ID. All references to Azure Active Directory have been updated to Microsoft Entra ID.

Glossary: Updated definition of Previews. Added new definitions to support the Generative AI products and application of Microsoft's Copilot Copyright Commitment.

September 1, 2023

Universal License Terms for Online Services: Added a clause for "Online Services with Distributable Code" to clarify the Distributable Code clause for Software also applies to Online Services that include Software components and adding clarity to the Universal clause for Validation, Auto Updates, & Collection for Software, that extensions are included.

Privacy & Security Terms: Added Viva Glint to the EU Data Boundary Services table.

Microsoft 365: Updated instances of "Microsoft Viva Sales" to "Microsoft Sales Copilot".

Microsoft Dynamics 365 Services: Updating D365 terms to align with Customer Insights and Marketing changes including EES, EAEAS, MCA, and MPSA availability tables.

Microsoft Security portfolio Product Terms mapping: Added index of security Products and the applicable terms.

August 1, 2023

Amazon Workspaces Deployments: Beginning August 1, 2023, users with specific licenses may run Microsoft 365 Apps for enterprise/business, Microsoft Project, and Microsoft Visio on Amazon WorkSpaces. The licenses that will be eligible under this revised policy include Microsoft 365 E3/E5/A3/A5 and Microsoft 365 Business Premium. If you currently have any of these licenses, starting from August 1, you will be able to utilize these Microsoft applications on Amazon WorkSpaces virtual desktop infrastructure.

Universal License Terms for Online Services: Universal term for Online Services added in relation to Azure meter availability and applicable terms.

Privacy & Security Terms: Updated Microsoft Azure Core Services to include Azure Container Apps.

Microsoft Azure: Added language for Azure Customer Solution regarding customer responsibility in obtaining necessary license related to standards.

Microsoft 365: Added Microsoft Defender Vulnerability Management (User SL) to EES, EAEAS, and added MCA table and Microsoft Defender Threat Intelligence API to EES table. Updated Microsoft Defender Vulnerability Management Add-on adding Microsoft 365 A5 Security and removing Microsoft Defender for Endpoint P2 (Device).

Microsoft Dynamics 365 Services: Updated Purchasing Minimums, removed ability to combine license to meet the minimum requirement.

Office 365 Suites: Removed Office 365 F from Availability tables for EA/EAS, MPSA, and Point Value Chart - Commercial and changed from All Programs to MCA.

Microsoft Power Platform: Updating Power Platform terms to reflect new product launches and naming conventions. Added Process Mining to Availability and Prerequisites tables.

Windows Desktop Operating System: Added Windows 10 IoT Enterprise LTSC 2021 (Per Device) to MCA, MPSA, and SS Availability tables.

July 1, 2023

Privacy & Security Terms: Updated list of Core Online Services for Microsoft Dynamics 365 Core Services, Office 365 Services, Microsoft Azure Core Services, Microsoft Intune Online Services, and Microsoft Power Platform Core Services to ensure accuracy with current compliance requirements, product naming, and retired services.

Windows Desktop Operating System: Added Microsoft 365 G3/G5 as eligible licenses to use for Azure Virtual Desktop for Windows

Microsoft Azure: Updated Reduction Eligibility for EA/EAS and SCE customers to clarify that Azure Support can be reduced at anniversary. Added service-specific terms for Microsoft Dev Box.

GitHub Offerings: Added terms for GitHub availability as an Azure meter.

Microsoft 365: Added Microsoft Defender Vulnerability Management Add-On to Microsoft Defender for Endpoint for servers, Entra ID Governance, and Microsoft Defender Threat Intelligence API to the Availability and License Prerequisites tables. Added terms to support the launch of Viva Glint.

Microsoft Defender for Endpoint for servers: Added Microsoft Defender for Endpoint for servers to the MCA Availability table.

Microsoft Power Platform: Added Power Automate Process Mining to Availability and Prerequisite tables.

Microsoft Defender Experts: Added Microsoft Defender Experts for Hunting to the MCA Availability table.

Windows 365: Added Windows 365 Frontline to the Availability table, as well as License assignment eligibility and additional terms.

Azure Data Box, Azure Stack Edge, and Azure Stack Hub Ruggedized Terms: Adding terms for Azure Stack Hub Datacenter Hardware launch which are consolidated with the existing Azure Stack Hub Ruggedized Hardware terms.

June 1, 2023

Universal License Terms for Online Services: Updating Universal Terms for OpenAI to align with product specific terms

Microsoft 365: Added Data Handling section for Microsoft Managed Desktop. Added service specific terms for Microsoft Defender External Attack Surface Management (EASM) and Microsoft Defender Threat Intelligence (MDTI). Renamed Microsoft Endpoint Manager - Remote Help to Microsoft Intune - Remote Help.

Microsoft Azure: Updated OpenAI terms for Data Access and Use. Added Bing Search Services terms to the general service terms for Azure.

Microsoft Defender Experts: Added Microsoft Defender Experts for XDR terms. Consolidated Hunting and XDR under Microsoft Defender Experts.

Microsoft Defender for Endpoint for servers: Added a product entry for Microsoft Defender for Endpoint for servers.

Microsoft Defender for IoT: Added a new stand-alone product entry for Microsoft Defender for IoT (which has been renamed from Azure Defender for IoT).

Microsoft Power Platform: Added AI Builder Tier to purchasing minimums table.

GitHub Offerings: Updated GitHub Availability table for new products, added definition of "Unique Committer", added License Prerequisites table, and added a clause for Enablement of GitHub Advanced Security for Azure DevOps.

Azure Data Box, Azure Stack Edge, and Azure Stack Hub Ruggedized Terms: Added clarity that physical transfer is included in the "No Transfer" limitation for Azure Data Box, Azure Stack Edge, and Azure Stack Hub Ruggedized.

May 11, 2023

Privacy & Security Terms: Added Azure Machine Learning to the list of Microsoft Azure Core Services.

May 6, 2023

Privacy & Security Terms: Added Azure OpenAI Service to the list of Microsoft Azure Core Services.

May 1, 2023

Privacy & Security Terms: Added Viva Insights (effective April1) to the list of Office 365 Core Online Services. Updates to the list of Azure Core Services to align with recent re-branding.

Windows Desktop Operating System: Removed terms for Windows To Go.

Microsoft 365: Updated Microsoft 365 Cross-tenant User Data Migration License Prerequisites. Added Microsoft Managed Desktop to the License Prerequisites table.

Microsoft Azure: Updated the Microsoft Azure Hybrid Benefit for Windows Server terms to clarify that customers may use Standard or Datacenter software under Azure Hybrid Benefit for Windows Server. Additional updates to the Azure OpenAI Service terms.

Notices: Consolidated notices for Internet-based features, Bing Maps and Malware protection from the Universal Terms for all Software to the Notices section.

Promotions: Removed all expired Promotions. There are no active Promotions available.

April 1, 2023

Universal Terms for Online Services:. Added a clause for "Azure OpenAI Service and Online Service Intergrations" that describes the terms for online services that incorporate Azure OpenAI. Additional updates to the Azure OpenAI terms in the Microsoft Azure section. Updated the "Licensing the Online Services" clause to clarify that additional licenses are required for usage exceeding documented limits.

Microsoft Azure: Revised and simplified the Azure Hybrid Benefit use rights for Windows Server and SQL Server. Specifically,
- For Windows Server we 1) eliminated the requirement that customers allocate licenses in packs of eight, 2) eliminated the requirement that customers allocate 16 licenses before they begin using AHB, and 3) made textual changes for improved readability. There are no changes to any other requirements, including the requirement that the number of licenses needed equals the number of virtual cores in the VM, subject to a minimum of eight licenses per VM.
- For SQL Server, there are no changes to the benefit. All textual changes are for improved readability only.

Added service specific terms for Azure Kubernetes Service Edge Essentials.

Windows Desktop Operating System: Update the rebranded online service name from "Windows Update Compliance" to "Windows Update for Business reports".

Windows Server Standard. Datacenter and Essentials: Eliminated the requirement that customers start with 16 licenses before licensing by individual virtual OSE. Added a clause that states CSP customers may run Windows Server Datacenter images with Windows Server Standard licenses when licensing by virtual OSE and following Standard edition use rights, among other conditions. Updated Windows Server CAL requirements for limited CSP-H hosting scenarios.

Microsoft Intune: Added Microsoft Intune Endpoint Privilege Management (User SL) to availability tables. Updated License Prerequisite table to include M365 A3/A5 as qualifying licenses for Intune Suite, Intune P2, and Intune Endpoint Privilege Management. Also updated instances of Intune to *Intune P1* per new naming.

Project: Clarified installation rights for Project to reflect retirement of the QMTH program.

Software Assurance Benefits: Moved the "Purchasing Software Assurance" and "Renewing Software Assurance" terms into its own page called "Purchasing & Renewing Software Assurance".

March 15, 2023

Microsoft 365: Added SharePoint Advanced Management to the Availability and License Prerequisites tables.

March 1, 2023

Microsoft Intune: Updated Availability table to include Intune Suite and Intune Plan 2, as well as added a License Prerequisites table for both offers.

Microsoft 365: Removed all content for Education Insights as the offer has been depreciated. Updated Availability Table for two new offers; Forensic Evidence for Insider Risk Management, and Microsoft Defender Vulnerability Management Add-on, as well as the necessary prerequisites for the Vulnerability Management Add-on.

Microsoft Dynamics 365 Services: Updated all references of Microsoft Relationship Sales Solution Plus to Microsoft Relationship Sales to align with name change.

Privacy & Security Terms: Updated the Azure Core Services to include Azure Form Recognizer, Azure Immersive Reader, Azure Metrics Advisor, and Azure Red Hat OpenShift.

February 1, 2023

Audio Services: Clarifying that the Operator Connect terms includes Operator Connect for Microsoft Teams and Microsoft Teams Phone Mobile.

Exchange Online: Updated *Archiving* under the Core Features for Exchange Online Archiving to include Exchange Online Kiosk.

Microsoft Azure: Added Service Specific Terms for the launch of Azure Communications Gateway and Azure Private 5G Core.

Privacy & Security Terms: Added Windows 365 to the list of Core Online Services.

Software Assurance Benefits: Removed terms related to 24x7 Problem Resolution Support as the benefit is retired.

Windows Desktop Operating System: Added Universal Print Volume Add-on SKUs to the Availability Table as well as the prerequisite licenses needed to license the add-on.

January 1, 2023

Microsoft Defender for Endpoint: Update to clarify that customers may use Defender products on all devices and clouds.

Privacy & Security Terms: Added language to the Privacy & Security Terms that describe EU Data Boundary Services.

Azure Data Box, Azure Stack Edge, and Azure Stack Hub Ruggedized Terms: Removed terms related to StorSimple due to service retirement.

Windows Desktop Operating System: Updated the Software Assurance Lapse term based on recent Servicing channel changes. Removed Desktop Analytics from the list of products with "Additional License Terms for Online Services" as it has been retired.

December 12, 2022

Azure Services and Dynamics 365 Services: Added back Azure Communication Services (ACS) terms that were unintentionally removed in the December 1, 2022 publication. Minor modifications of the ACS language to align with the new Communication Services Notice.

December 1, 2022

Universal License Terms for Online Services: Updated Acceptable Use Policy to clarify that mining cryptocurrency is prohibited without prior Microsoft approval.

Azure DevOps Server: Updated terms to support the launch of Azure DevOps Server 2022.

Notices: Added a standard notice for Communication Services. Updated various Product pages to reflect the update which will also be reflected in the Communication Services Terms document.

Universal License Terms

For Online Services

Definitions

Terms used here but not defined in the Glossary will have the definitions provided in Customer's licensing agreement.

Data Processing and Security

The parties agree that these terms govern Customer's use of the Online Services and that the DPA (defined in the Glossary) sets forth their obligations with respect to the processing and security of Customer Data and Personal Data by the Online Services. The parties also agree that, unless a separate Professional Services agreement exists, these terms govern the provision of Professional Services, including but not limited to the terms in the Professional Services section and terms in the DPA for the processing and security of Professional Services Data and Personal Data in connection with that provision. Separate terms, including different privacy and security terms, govern Customer's use of Non-Microsoft Products (as defined below). In the event of any conflict or inconsistency between the DPA and any other terms in Customer's licensing agreement (including these terms), the DPA shall prevail.

Service Level Agreements
Many Online Services offer a Service Level Agreement (SLA). For more information regarding the Online Services SLAs, please refer to https://www.microsoft.com/licensing/product-licensing/products.

Applicable Product Terms and Updates for Online Services
When Customer renews or purchases a new subscription to an Online Service, the then-current terms will apply and will not change during Customer's subscription for that Online Service. When Microsoft introduces features, supplements or related software that are new (i.e., that were not previously included with the subscription), Microsoft may provide terms or make updates to the terms that apply to Customer's use of those new features, supplements or related software.

Electronic Notices
Microsoft may provide Customer with information and notices about Online Services electronically, including via email, through the portal for the Online Service, or through a web site that Microsoft identifies. Notice is given as of the date it is made available by Microsoft.

Licensing the Online Services

Customer must acquire and assign the appropriate subscription licenses required for its use of each Online Service. Usage exceeding the Online Service's documented entitlement(s) and/or usage limits require additional purchase of licenses to cover overage. Each user that accesses the Online Service must be assigned a User SL or access the Online Service only through a device that has been assigned a Device SL, unless specified otherwise in the Online Service-specific Terms. Subscription License Suites describes SL Suites that also fulfill requirements for User SLs. Customer has no right to use an Online Service after the SL for that Online Service ends.

License Reassignment
Most, but not all, SLs may be reassigned. Except as permitted in this paragraph or in the Online Service-specific Terms, Customer may not reassign an SL on a short-term basis (i.e., within 90 days of the last assignment). Customer may reassign an SL on a short-term basis to cover a user's absence or the unavailability of a device that is out of service. Reassignment of an SL for any other purpose must be for

the remaining term of that License. When Customer reassigns an SL from one device or user to another, Customer must block access and remove any related software from the former device or from the former user's device.

Multiplexing

Hardware or software that a Customer uses to:

- pool connections or reduce the number of OSE's, devices, or users a Product directly manages;
- reduce the number of devices or users that directly or indirectly access or use a Product;
- or access data a Product itself processes or generates;

does not reduce the number of Licenses of any type that Customer needs.

Online Services Step-up Availability and License Assignment

Some licensing programs allow customers to step-up an existing online service to a higher edition any time during the agreement and enrollment (if any) term. Such higher edition licenses may be acquired using Step-up SKUs with the following requirements:

- A higher edition license acquired using a Step-up SKU can only be assigned to a licensed user of a qualifying base license of the same online service or a suite license that includes the same qualifying base online service,
- Once the higher edition license is acquired, customers may not separate it from the qualifying base online service license,
- Step up SKUs must be purchased under the same licensing agreement and enrollment (if any), under which the qualifying base online service User SL was acquired.

Using the Online Services

Customer may use the Online Services and related software as expressly permitted in Customer's licensing agreement. Microsoft reserves all other rights.

Acceptable Use Policy

Neither Customer, nor those that access an Online Service through Customer, may use an Online Service:

- in a way prohibited by law, regulation, governmental order or decree;
- to violate the rights of others;
- to try to gain unauthorized access to or disrupt any service, device, data, account or network, including by intentionally evading or disrupting restrictions in Metaprompts;
- to spam or distribute malware;
- to mine cryptocurrency without Microsoft's prior written approval;
- in a way that could harm the Online Service or impair anyone else's use of it;
- in any application or situation where failure of the Online Service could lead to the death or serious bodily injury of any person, or to severe physical or environmental damage, except in accordance with the High-Risk Use section below; or
- to assist of encourage anyone to do any of the above.

Without limiting Microsoft's other remedies, violations of the Acceptable Use Policy in this section may result in suspension of the Online Service. If Microsoft suspends the Online Service, Microsoft will suspend only to the extent reasonably necessary. Unless Microsoft believes an immediate suspension is required, Microsoft will provide reasonable notice before suspending an Online Service for the reasons stated above.

High-Risk Use

WARNING: Modern technologies, and especially platform technologies, may be used in new and innovative ways, and Customer must consider whether its specific use of these technologies is safe. The Online Services are not designed or intended to support any use in which a service interruption, defect, error, or other failure of an Online Service could result in the death or serious bodily injury of any person or in physical or environmental damage (collectively, "High-Risk Use"). Accordingly, Customer must design and implement every application such that, in the event of any interruption, defect, error, or other failure of the Online Service, the safety of people, property, and the environment are not reduced below a level that is reasonable, appropriate, and legal, whether in general or for a specific industry. Customer's High-Risk Use of the Online Services is at its own risk. Customer agrees to defend, indemnify and hold Microsoft harmless from and against all damages, costs and attorneys' fees in connection with any claims arising from a High-Risk Use associated with the Online Services, including any claims based in strict liability or that Microsoft was negligent in designing or providing the Online Service(s) to Customer. The foregoing indemnification obligation is in addition to any defense obligation set forth in Customer's licensing agreement and is not subject to any limitation of, or exclusion from, liability contained in such agreements.

Medical Device Disclaimer

Customer acknowledges that the Online Services (1) are not designed, intended or made available as a medical device(s), and (2) are not designed or intended to be a substitute for professional medical advice, diagnosis, treatment, or judgment and should not be used to replace or as a substitute for professional medical advice, diagnosis, treatment, or judgment. Customer is solely responsible for displaying and/or obtaining appropriate consents, warnings, disclaimers, and acknowledgements to end users of Customer's implementation of the Online Services.

Data Protection and Security

The terms of the DPA (http://aka.ms/DPA) apply to Online Services except for Online Services listed in the Privacy & Security Terms. For Core Online Services, Online Service-specific details on security practices and location of Customer Data at rest are also located in the Privacy & Security Terms.

Use of Software with the Online Service

Customer may need to install certain Microsoft software to use the Online Service. If so, the following terms apply:

Microsoft Software License Terms

Customer may install and use the software only for use with the Online Service. The Online Service-specific Terms may limit the number of copies of the software Customer may use or the number of devices on which Customer may use it. Customer's right to use the software begins when the Online Service is activated and ends when Customer's right to use the Online Service ends. Customer must uninstall the software when Customer's right to use it ends. Microsoft may disable it at that time.

Validation, Automatic Updates, and Collection for Software

Microsoft may automatically check the version of any of its software. Devices on which the software is installed may periodically provide information to enable Microsoft to verify that the software is properly licensed. This information includes the software version, the end user's user account, product ID information, a machine ID, and the internet protocol address of the device. If the software is not properly licensed, its functionality will be affected. Customer may only obtain updates or upgrades for the software from Microsoft or authorized sources. By using the software, Customer consents to the transmission of the information described in this section. Microsoft may recommend or download to Customer's devices updates, supplements, or extensions to this software, with or without notice. Some Online Services may require, or may be enhanced by, the installation of local software (e.g., agents, device management applications) ("Apps"). The Apps may collect diagnostic data (as defined in the Product Documentation) about the use and performance of the Apps, which may be transmitted to Microsoft, to the extent any Personal Data is contained therein, and used for the purposes described in the DPA.

Third-party Software Components

The software may contain third party software components. Unless otherwise disclosed in that software, Microsoft, not the third party, licenses these components to Customer under Microsoft's license terms and notices.

Cancellation Policy

Certain subscriptions must be canceled within 7 days of the subscription start date to be eligible for a prorated credit or refund for unused time, calculated on a daily basis. No credits or refunds will be issued for such subscriptions canceled after 7 days of the subscription start date. See *Cancel your subscription* (https://docs.microsoft.com/microsoft-365/commerce/subscriptions/cancel-your-subscription) for details.

Technical Limitations

Customer must comply with, and may not work around, any technical limitations in an Online Service that only allow Customer to use it in certain ways. Customer may not download or otherwise remove copies of software or source code from an Online Service except as explicitly authorized.

Import/Export Services

Customer's use of any Import/Export Service is conditioned upon its compliance with all instructions provided by Microsoft regarding the preparation, treatment and shipment of physical media containing its data ("storage media"). Customer is solely responsible for ensuring the storage media and data are provided in compliance with all laws and regulations. Microsoft has no duty with respect to the storage media and no liability for lost, damaged or destroyed storage media. All storage media shipped to Microsoft must be shipped DAP Microsoft DCS Data Center (INCOTERMS 2010). Storage media shipped to Customer will be shipped DAP Customer Dock (INCOTERMS 2010).

Font Components

While Customer uses an Online Service, Customer may use the fonts installed by that Online Service to display and print content. Customer may only embed fonts in content as permitted by the embedding restrictions in the fonts and temporarily download them to a printer or other output device to print content.

Changes to and Availability of the Online Services

Microsoft may make commercially reasonable changes to each Online Service from time to time. Microsoft may modify or terminate an Online Service in any country where Microsoft is subject to a government regulation, obligation or other requirement that (1) is not generally applicable to businesses operating there, (2) presents a hardship for Microsoft to continue operating the Online Service without modification, and/or (3) causes Microsoft to believe these terms or the Online Service may conflict with any such requirement or obligation. If Microsoft terminates an Online Service for regulatory reasons, Customers will receive a credit for any amount paid in advance for the period after termination.

Availability, functionality, and language versions for each Online Service may vary by country. For information on availability, Customer may refer to https://go.microsoft.com/fwlink/?linkid=870295.

Azure availability

First-Party Consumption Services may be available for purchase as Azure meters, which allow customers to pay as you go for certain Online Services as outlined in the Microsoft Azure Payment and Fees clause, and Purchasing Microsoft Azure Services clause.

These Microsoft services are not Azure products and thus the Azure terms do not apply. The product specific licensing terms for these services apply, in addition to the Microsoft Azure Payment and Fees clause, and Purchasing Microsoft Azure Services clause.

Microsoft Generative AI Services

Responsible Use

Customer must use Microsoft Generative AI Services in accordance with the Acceptable Use Policy for Online Services and the Azure OpenAI Code of Conduct. Without limiting its other remedies, Microsoft may limit Customer's access to or use of a Microsoft Generative AI Service if Microsoft has a reasonable basis to believe that the Output Content or Customer's use of a Microsoft Generative AI Service or Output Content violates the Acceptable Use Policy for Online Services or the Azure OpenAI Code of Conduct.

Capacity Limitations

Excessive use of a Microsoft Generative AI Service may result in temporary throttling of Customer's access to the Microsoft Generative AI Service.

Reverse Engineering

Customer may not use a Microsoft Generative AI Service to discover any underlying components of the models, algorithms, and systems, such as exfiltrating the weights of models.

Extracting Data

Customer may not use web scraping, web harvesting, or other data extraction methods to extract data from a Microsoft Generative AI Service or from Output Content.

Use of Content for Training

Microsoft Generative AI Services do not use Input or Output Content to train, retrain, or improve Azure OpenAI Service foundation models that generate Output Content. Customer will not use, and will not allow third parties to use, a Microsoft Generative AI Service or Output Content from a Microsoft Generative AI Service to create, train, or improve (directly or indirectly) a similar or competing product or service. Customer may use the Azure OpenAI Service to generate Output Content to fine-tune models for Customer's use in Azure AI services, solely to the extent expressly permitted in the Azure OpenAI Limited Access registration form (https://aka.ms/oai/access).

Location of Data Processing

By using a Microsoft Generative AI Service, Customer agrees its data may be stored and processed outside of its tenant's geographic region, unless service specific terms or product documentation for a given Microsoft Generative AI Service states otherwise.

Output Content

Output Content is Customer Data. Microsoft does not own Customer's Output Content.

Customer Copyright Commitment

Microsoft's obligation to defend Customer against third-party intellectual property claims under Customer's volume licensing agreement will apply to Customer's use or distribution of Output Content of a Covered Product if all the following additional conditions are met:

1. While using the Covered Product to produce the Output Content that is the subject of the claim, Customer must not have disabled, evaded, disrupted, or interfered with the content filters, restrictions in Metaprompts, or other safety systems that are part of the Covered Product.
2. Customer does not modify, use, or distribute the Output Content in a manner that it knows, or should know, is likely to infringe or misappropriate any proprietary right of a third party.
3. Customer has sufficient rights to use the Input in connection with the Covered Product, including, without limitation, any Customer Data that Customer used to Customize the model that produced the Output Content that is the subject of the claim.
4. The claim does not allege that the Output Content, as used in commerce or the course of trade, violates a third party's trademark or related rights.

Dataverse

Dataverse structures a variety of data and business logic to support interconnected applications and processes. Dataverse Instances provided with Microsoft 365 licenses includes various features and integrates data that may or may not be available for the product or service Customer is licensed with. Access to Dataverse, through an individual product or service, does not grant access to unrelated products, services, features, or data that users are not licensed for. Users only have rights to access data, services, and features within Dataverse for which they are properly licensed for.

Online Services with Distributable Code

Certain Online Services may contain Software components. The Distributable Code terms below apply to Online Services that contain Software components.

Distributable Code

Refer to the Product Entries for software that contains code and text files Customer is permitted to distribute "Distributable Code". The code and text files listed below are also Distributable Code that may be used as described below. In the case of a conflict between the following terms and Distributable Code terms published in the Product Entry, the terms in the Product Entry govern Customer's use of Distributable Code.

Right to Use and Distribute

The code and text files listed below are "Distributable Code."

- REDIST.TXT Files: Customer may copy and distribute the object code form of code listed in REDIST.TXT files and in OTHER-DIST.TXT files, as well as any code marked as "Silverlight Libraries", Silverlight "Client Libraries" and Silverlight "Server Libraries".
- Sample Code, Templates, and Styles: Customer may modify, copy, and distribute the source and object code form of code marked as "sample, "template", "simple styles" and "sketch styles."
- Third Party Distribution: Customer may permit distributors of its programs to copy and distribute the Distributable Code as part of those programs.
- Image Library: Customer may copy and distribute images, graphics and animations in the Image Library as described in the software documentation.

Distribution Requirements

If Customer distributes any Distributable Code. Customer must:

- Only distribute it with Customer's programs, where Customer's programs provide significant primary functionality to the Distributable Code;
- require distributors and external end users to agree to terms that protect the Distributable Code at least as much as Customer's volume licensing agreement, including the Product Terms;
- indemnify, defend, and hold harmless Microsoft from any claims, including attorneys' fees, related to the distribution or use of Customer's programs, except to the extent that any claim is based solely on the Distributable Code included in Customer's programs.

Distribution Limitations

Customer may not:

- alter any copyright, trademark or patent notice in the Distributable Code;
- use Microsoft's trademarks in Customer's programs' names or in a way that suggests its programs come from or are endorsed by Microsoft;
- distribute Distributable Code in or with any malicious or, deceptive programs or in an unlawful manner; or
- modify or distribute the source code of any Distributable Code so that any part of it becomes subject to an Excluded License. An Excluded License is one that requires, as a condition of use, modification or distribution, that the code be disclosed or distributed in source code form, or that others have the right to modify it.

Other

Non-Microsoft Products

Microsoft may make Non-Microsoft Products available to Customer through Customer's use of the Online Services (such as through a store or gallery, or as search results) or a Microsoft online store (such as the Microsoft Store for Business or Microsoft Store for Education). If Customer installs or uses any Non-Microsoft Product with an Online Service, Customer may not do so in any way that would subject Microsoft's intellectual property or technology to obligations beyond those expressly included in Customer's licensing agreement. For Customer's convenience, Microsoft may include charges for certain Non-Microsoft Product as part of Customer's bill for Online Services. Microsoft, however, assumes no responsibility or liability whatsoever for any Non-Microsoft Product. Customer is solely responsible for any Non-Microsoft Product that it installs or uses with an Online Service or acquires or manages through a Microsoft online store. Customer's use of any Non-Microsoft Product shall be governed by the license, service, and/or privacy terms between Customer and the publisher of the Non-Microsoft Product (if any).

Previews

PREVIEWS ARE PROVIDED "AS-IS," "WITH ALL FAULTS," AND "AS AVAILABLE," as described herein. Unless otherwise noted in a separate agreement, Previews are not included in the SLA for the corresponding Online Service, and may not be covered by customer support. We may change or discontinue Previews at any time without notice. We may also choose not to make a Preview service generally commercially available.

Providing "Feedback" (suggestions, comments, feedback, ideas, or know-how, in any form) to Microsoft about Preview services is voluntary. Microsoft is under no obligation to post or use any Feedback. By providing Feedback to Microsoft, Customer (and anyone providing Feedback through Customer) irrevocably and perpetually grant to Microsoft and its Affiliates, under all of its (and their) owned or controlled intellectual property rights, a worldwide, non-exclusive, fully paid-up, royalty-free, transferable, sub-licensable right and license to make, use, reproduce, prepare derivative works based upon, distribute, publicly perform, publicly display, transmit, and otherwise commercialize the Feedback (including by combining or interfacing products, services or technologies that depend on or incorporate Feedback with other products, services or technologies of Microsoft or others), without attribution in any way and for any purpose.

Customer warrants that 1) it will not provide Feedback that is subject to a license requiring Microsoft to license anything to third parties because Microsoft exercises any of the above rights in Customer's Feedback; and 2) it owns or otherwise controls all of the rights to such Feedback and that no such Feedback is subject to any third-party rights (including any personality or publicity rights).

Microsoft Entra ID Free

As described in https://docs.microsoft.com/en-us/azure/active-directory/fundamentals/active-directory-whatis, most Online Services include an instance of Microsoft Entra ID, a cloud-based user authentication capability ("Microsoft Entra ID Free"). After Customer configures and uses the first such Online Service, that instance of Microsoft Entra ID Free, as configured by Customer for its users, may power the user authentication features for each later-acquired subscription of an Online Service.

Customer's instance of Microsoft Entra ID Free will also enable authenticated users to interact with Microsoft or a third party in contexts outside of the Online Services ("Other Microsoft Entra ID-dependent Services"), specifically where Microsoft or that third party requires an A Microsoft Entra ID user account. With respect to the operation of Microsoft Entra ID Free for Other Microsoft Entra ID-dependent Services, Microsoft remains a data processor, and this use of Microsoft Entra ID Free constitutes Customer's authoritative instruction to Microsoft that such use is permitted. With respect to the operation of the Other Microsoft Entra ID-dependent Service, refer to its applicable agreement and privacy policy to determine the role of the provider of the Other Microsoft Entra ID-dependent Service.

Competitive Benchmarking

If Customer offers a service competitive to an Online Service, by using the Online Service, Customer agrees to waive any restrictions on competitive use and benchmark testing in the terms governing its competitive service. If Customer does not intend to waive such restrictions in its terms of use, Customer is not allowed to use the Online Service.

Government Customers

If Customer is a government entity, then the following terms apply to any Online Service provided at no charge to Customer:

1. Microsoft waives any and all entitlement to compensation from Customer for the Online Service.
2. In compliance with applicable laws and regulations, Microsoft and Customer acknowledge that the Online Services are for the sole benefit and use of Customer and not provided for the personal use or benefit of any individual government employee.

Waiver of end-user consumer protection provisions

Customer agrees to waive any and all entitlements that would otherwise be applicable under the European Electronic Communications Code (Directive 2018/1972) Article 102 paragraphs 1, 3, and 5; Article 105 paragraph 1; and Article 107 paragraphs 1 and 3.

Microsoft Security Products Data Handling

Products purchased by Customer may share data, including Customer Data, among the Products as described in product documentation. Data copied to a Product is governed by the Product Terms applicable to that Product.

Online Services Regional Availability

Visit https://www.microsoft.com/en-us/microsoft-365/business/international-availability for a list of countries and regions in which the Online Services are available.

Online Services Purchasing Rules

The following purchasing rules apply to purchasing Online Services:

- Subscription terms vary by purchasing program. Under the Enterprise Agreement program, the subscription terms for Online Services other than Microsoft Azure must be coterminous, ending on the date of Customer's Enrollment end date.
- If Customer makes additional purchases of an Online Service, the end of the subscription term of the additional purchase must align with Customer's existing subscription term for the same Online Service. This provision does not apply to Azure reservations.
- Customer may not reduce the number of users or devices covered by its Online Services subscription during the term of their Online Services subscription except as permitted in Customer's licensing agreement.
- Add-on and Step-up User SLs must be purchased under the same licensing agreement as their Qualifying License or base User SL. Add-ons expire upon the earlier of the expiration of the SA coverage for the Qualifying License or the Add-on User SL. Step-ups expire upon the earlier of the expiration of the Step-up User SL or base User SL.
- User SLs are priced monthly.

Online Services Renewal

Online Services with auto-renewal will automatically renew the day after their subscription term expires, unless Customer chooses not to renew by opting out of auto-renewal at least of 30 days before the subscription expires by contacting their reseller. Online services subscriptions for government and academic customers will not be automatically renewed unless Customer chooses the auto-renewal option.

For all Software

Universal License Terms

Universal License Terms apply to all software Products licensed through Microsoft Volume Licensing (except where specifically noted in the License Model Terms and/or the Product-Specific License Terms).

Definitions

Terms used in the Product Terms but not defined in the Glossary will have the definition provided in Customer's volume licensing agreement.

Customer's Use Rights

If Customer complies with its volume licensing agreement, it may use the software as expressly permitted in the Product Terms. Customer needs a License for each Product and separately licensed functionality used on a device or by a user.

Rights to Use Other Versions and Lower Editions

For any permitted copy or Instance, Customer may create, store, install, run or access in place of the version licensed, a copy or Instance of a prior version, different permitted language version, different available platform version (for example, 32 bit or 64 bit) or a permitted lower edition. The use rights for the licensed version still apply. Licenses for prior versions and lower editions do not satisfy the licensing requirements for a Product.

Third Party Software

The software may contain third party proprietary or open source programs or components that are licensed under separate terms that are presented to Customer during installation or in the "ThirdPartyNotices" file accompanying the software. The software may also contain third party open source programs that Microsoft, not the third party, licenses to Customer under Microsoft's license terms.

Pre-Release Code, Updates or Supplements, Additional Functionality

Microsoft may offer updates or supplements to the Products. Customer may use the updates or supplements to the Products, pre-release code, additional functionality and optional add-on services to the Products, subject to specific terms (if any) that accompany them. Some Products require automatic updates, as described in the Product-Specific License Terms.

Restrictions

Customer may not (and is not licensed to) use the Products to offer commercial hosting services to third parties, work around any technical limitations in the Products or restrictions in Product documentation, or separate the software for use in more than one OSE under a single License (even if the OSEs are on the same physical hardware system), unless expressly permitted by Microsoft. Rights to access the software on any device do not give Customer any right to implement Microsoft patents or other Microsoft intellectual property in the device itself or in any other software or devices.

Software Assurance

SA coverage may grant additional use rights to Customer. These additional rights end at the expiration of the SA coverage for the License, unless otherwise noted in the benefit description.

Outsourcing Software Management

Outsourcing on Dedicated Devices
Customers may use licensed copies of the software on devices that are under the day-to-day management and control of Authorized Outsourcers, provided all such devices are and remain fully dedicated to Customer's use.

Flexible Virtualization Benefit
Customers with subscription licenses or Licenses with active Software Assurance (including CALs) may use licensed copies of the software on devices, including shared Servers, that are under the day-to-day management and control of Authorized Outsourcers.

Outsourcing on Cloud Solution Provider-Hosters
Customers with subscription licenses or Licenses with active Software Assurance (including CALs) may access their licensed copies of software that is provided by a Cloud Solution Provider-Hoster and installed on that partner's devices.

Except as expressly permitted here or elsewhere in these Product Terms, Customer is not permitted to use or access software on devices that are under the management or control of a third party. Customer is responsible for all of the obligations under its volume licensing agreement regardless of the physical location of the hardware upon which the software is used.

License Assignment and Reassignment

Before Customer uses software under a License, it must assign that License to a device or user, as appropriate. Customer may reassign a License to another device or user, but not less than 90 days since the last reassignment of that same License, unless the reassignment is due to (i) permanent hardware failure or loss, (ii) termination of the user's employment or contract or (iii) temporary reallocation of CALs, Client Management Licenses and user or device SLs to cover a user's absence or the unavailability of a device that is out of service. Customer must remove the software or block access from the former device or to the former user. SA coverage and any Licenses that are granted or acquired in connection with SA coverage may be reassigned only with the underlying qualifying License. Additional terms apply to the reassignment of Windows desktop operating system per device licenses, as detailed in the Windows Product Entry

Technical Measures

Microsoft may use technical measures to enforce terms that restrict Customer's use of certain versions of Product and may verify compliance with those terms as provided in Customer's volume license agreement. Some Products are protected by technological measures and require activation or validation, as well as a product key, to install or access them.

Activation and validation

Customer shall use the appropriate product key provided by Microsoft for activation and validation of the software Product being installed by the Customer. Customer's right to use the software after the time specified in the software Product may be limited unless it is activated. Customer is not licensed to continue using the software if it has unsuccessfully attempted to activate. Each device that has not activated by a Key Management Service (KMS) must use a Multiple Activation Key (MAK) or Microsoft Entra ID based activation. Customer may not circumvent activation or validation.

Product Keys

An assigned product key is required for licensed use of the software. All product keys are Confidential Information of Microsoft. Notwithstanding anything to the contrary in Customer's volume licensing agreement, Customer may not disclose product keys to third parties. Customer may not provide unsecured access to its key management service (KMS) machines over an uncontrolled network. In the event of unauthorized use or disclosure of product keys or KMS keys, Microsoft may prevent further activations, deactivate or block product keys from activation or validation, and take other appropriate action.

Font Components, Images, and Sounds

While Customer runs the software, it may access and use icons, images, sounds and media included with the software only from a Licensed Device and may use the fonts included with or installed by that software to display and print content. Customer may only embed fonts in content as permitted by the embedding restrictions in the fonts; and temporarily download them to a printer or other output device to print content.

Included Technologies

Products may include other Microsoft technology components subject to their own license terms, as indicated in the Use Rights section of each Product Entry. If separate terms for these components are not addressed in the Product-Specific License Terms, they may be found in a separate folder in the Product's installation directory or through the Product's unified installer.

Benchmark Testing

Customer must obtain Microsoft's prior written approval to disclose to a third party the results of any benchmark test of any Server Product or Microsoft Desktop Optimization Pack.

Multiplexing

Hardware or software that a Customer uses to:

- pool connections or reduce the number of OSE's, devices, or users a Product directly manages;
- reduce the number of devices or users that directly or indirectly access or use a Product;
- or access data a Product itself processes or generates;

does not reduce the number of Licenses of any type that a customer needs.

Administrative and Support Rights

Customer may allow access to server software running in any permitted OSE by two users without CALs solely for administrative purposes. Customer may also allow remote access to other Products solely for purposes of providing technical product support to Licensed Users or on Licensed Devices.

Distributable Code

Refer to the Product Entries for software that contains code and text files Customer is permitted to distribute "Distributable Code". The code and text files listed below are also Distributable Code that may be used as described below. In the case of a conflict between the following terms and Distributable Code terms published in the Product Entry, the terms in the Product Entry govern Customer's use of Distributable Code.

Right to Use and Distribute

The code and text files listed below are "Distributable Code."

- REDIST.TXT Files: Customer may copy and distribute the object code form of code listed in REDIST.TXT files and in OTHER-DIST.TXT files, as well as any code marked as "Silverlight Libraries", Silverlight "Client Libraries" and Silverlight "Server Libraries".
- Sample Code, Templates, and Styles: Customer may modify, copy, and distribute the source and object code form of code marked as "sample, "template", "simple styles" and "sketch styles."
- Third Party Distribution: Customer may permit distributors of its programs to copy and distribute the Distributable Code as part of those programs.
- Image Library: Customer may copy and distribute images, graphics and animations in the Image Library as described in the software documentation.

Distribution Requirements

If Customer distributes any Distributable Code. Customer must:

- Only distribute it with Customer's programs, where Customer's programs provide significant primary functionality to the Distributable Code;
- require distributors and external end users to agree to terms that protect the Distributable Code at least as much as Customer's volume licensing agreement, including the Product Terms;
- indemnify, defend, and hold harmless Microsoft from any claims, including attorneys' fees, related to the distribution or use of Customer's programs, except to the extent that any claim is based solely on the Distributable Code included in Customer's programs.

Distribution Limitations

Customer may not:

- alter any copyright, trademark or patent notice in the Distributable Code;
- use Microsoft's trademarks in Customer's programs' names or in a way that suggests its programs come from or are endorsed by Microsoft;
- distribute Distributable Code in or with any malicious or, deceptive programs or in an unlawful manner; or
- modify or distribute the source code of any Distributable Code so that any part of it becomes subject to an Excluded License. An Excluded License is one that requires, as a condition of use, modification or distribution, that the code be disclosed or distributed in source code form, or that others have the right to modify it.

Software Plus Services

Microsoft may provide services with Products through software features that connect with Microsoft or service provider computer systems over the Internet. It may change or cancel the services at any time. Customer may not use the services in any way that could harm them or impair anyone else's use of them. Customer may not use the services to try to gain unauthorized access to any service, data, account or network by any means.

Processing of Personal Data; GDPR

To the extent Microsoft is a processor or subprocessor of Personal Data in connection with a software Product, Microsoft makes the commitments in the Data Protection Addendum, including for any processing for business operations incident to providing the software Product. When Microsoft is a controller, Microsoft will handle Personal Data in accordance with the Product documentation and Microsoft Privacy Statement (aka.ms/privacy), and the Data Protection Addendum terms do not apply. Please see the Product documentation for details on any processing of Personal Data in connection with software Products and Customer's configuration options.

Privacy & Security Terms

General

The Privacy & Security Terms were formerly contained in Attachment 1 to the Online Services Terms.

The Data Protection Addendum, or DPA (defined in the Glossary) sets forth the parties obligations with respect to the processing and security of Customer Data, Professional Services Data, and Personal Data by the Products. The Data Protection Addendum can be

downloaded here https://aka.ms/DPA. In the event of any conflict or inconsistency between the DPA and any other terms in Customer's licensing agreement (including these terms), the DPA shall prevail.

Online Services excluded from the DPA

Except as provided in the Product-Specific Terms, the terms of the DPA do not apply to: Bing Maps Mobile Asset Management Platform, Bing Maps Transactions and Users, Bing Search Services, Cognitive Services in containers installed on Customer's dedicated hardware, GitHub Offerings, LinkedIn Sales Navigator, Microsoft Defender for IoT (excluding any cloud-connected features), Azure SQL Edge, Azure Stack HCI, Azure Stack Hub, Microsoft Graph data connect for ISVs, Microsoft Genomics, and Visual Studio App Center Test. Each of these Online Services are governed by the privacy and security terms in the applicable Product-Specific Terms.

Software Products excluded from the DPA

Except as provided in the Product-Specific Terms, the terms of the DPA do not apply to: Internet based features in Software Products, Windows Desktop Operating System, Windows Server, and these Software Products as part of other Products. Each of these Products are governed by the privacy and security terms in the applicable Product-Specific Terms.

Non-Microsoft Products

Separate terms, including different privacy and security terms, govern Customer's use of Non-Microsoft Products (as defined in the Universal License Terms for Online Services).

DPA Terms Geography Exclusions

For Dynamics 365 and Power Platform online services, the specific terms of the DPA as noted in Appendix A stating "Microsoft stores copies of Customer Data and data recovery procedures in a different place from where the primary computer equipment processing the Customer Data is located." do not apply to the following geographies: United Arab Emirates and South Africa.

Core Online Services

The term "Core Online Services" applies only to the services in the table below, excluding any Previews.

Online Services	
Microsoft Dynamics 365 Core Services	The following services, each as a standalone service or as included in a Dynamics 365 branded plan or application: Dynamics 365 Customer Service, Dynamics 365 Customer Service Insights, Dynamics 365 Field Service, Dynamics 365 Business Central, Dynamics 365 Supply Chain Management, Dynamics 365 Intelligent Order Management, Dynamics 365 Finance, Dynamics 365 Marketing, Dynamics 365 Commerce, Dynamics 365 Human Resources, Dynamics 365 Project Operations, and Dynamics 365 Sales. Dynamics 365 Core Services do not include (1) Dynamics 365 Services for supported devices or software, which includes but is not limited to Dynamics 365 for apps, tablets, phones, or any of these; (2) LinkedIn Sales Navigator; or (3) except as expressly defined in the licensing terms for the corresponding service, any other separately-branded service made available with or connected to Dynamics 365 Core Services.
Office 365 Services	The following services, each as a standalone service or as included in an Office 365 or Microsoft 365-branded plan or suite: Cortana, Customer Lockbox, Exchange Online Archiving, Exchange Online Protection, Exchange Online, Microsoft Bookings, Microsoft Forms, Microsoft Planner, Microsoft Stream (Classic), Microsoft Teams, Microsoft To-Do, Microsoft Defender for Office 365, Office for the web, OneDrive for Business, Project, SharePoint, Sway, Viva Insights, Whiteboard, Yammer Enterprise, and Microsoft 365 Copilot. Office 365 Services do not include Microsoft 365 Apps for enterprise, any portion of a PSTN service that operates outside of Microsoft's control, any client software, or any separately branded service made available with an Office 365 or Microsoft 365-branded plan or suite, such as a Bing or a service branded "for Office 365."
Microsoft 365 Compliance Services	The following services, each as a standalone service or as included in a Microsoft 365-branded plan or suite: Compliance Manager, Microsoft Information Protection, Microsoft Information Governance, Insider Risk Management, Communication Compliance, eDiscovery and Audit.
Microsoft Azure Core Services	Azure AI, Azure Active Directory B2C, Anomaly Detector, API Management, App Service (API Apps, Logic Apps, Mobile Apps, WebJobs, Functions), Lab Services, Application Gateway, Azure Monitor, Automation, Azure API for FHIR, Azure App Configuration, Azure AI Bot Service, Azure Cache for Redis, Azure Cognitive Search, Azure Container Apps, Azure Container Registry (ACR), Azure Cosmos DB, Azure Data Explorer, Azure Database for MySQL, Azure Database for PostgreSQL, Azure Databricks, Azure DevOps, Azure DNS, Microsoft Entra ID, Azure Event Grid, Azure Firewall, Azure AI

Online Services	
	Document Intelligence, Azure Health Data Services, Azure AI Immersive Reader, Azure Information Protection (including Azure Rights Management), Azure Kubernetes Service, Azure Managed Grafana, Azure Machine Learning, Azure AI Metrics Advisor, Azure NetApp Files, Azure OpenAI Service, Azure Red Hat OpenShift, Microsoft Purview, Azure Resource Manager, Azure Spring Apps, Azure Time Series Insights, Azure AI Video Indexers, Azure Web PubSub, Backup, Batch, Cloud Services, Computer Vision, Content Moderator, Azure AI Custom Vision, Data Catalog, Data Factory, Data Lake Analytics, Data Lake Store, Event Hubs, Express Route, Face, HDInsight, Import/Export, IoT Hub, Key Vault, Language Understanding, Load Balancer, Azure Machine Learning Studio (classic), Media Services, Microsoft Azure Portal, Notification Hubs, Azure AI Personalizer, Power BI Embedded, QnA Maker, Microsoft Defender for Cloud, Service Bus, Service Connector, Service Fabric, Azure SignalR Service, Site Recovery, Speech Services, SQL Database, SQL Managed Instance, SQL Server Stretch Database, Storage, StorSimple, Stream Analytics, Synapse Analytics, Text Analytics, Traffic Manager, Azure AI Translator, Virtual Machines, Virtual Machine Scale Sets, Virtual Network, and VPN Gateway.
Microsoft Defender for Cloud Apps	The cloud service portion of Microsoft Defender for Cloud Apps (formerly Microsoft Cloud App Security).
Microsoft Intune Online Services	The cloud service portion of Microsoft Intune.
Microsoft Power Platform Core Services	The following services, each as a standalone service or as included in an Office 365 or Microsoft Dynamics 365 branded plan or suite: Microsoft Power BI, Microsoft Power Apps, Microsoft Power Automate, Microsoft Power Pages, and Microsoft Power Virtual Agents. Microsoft Power Platform Core Services do not include any client software, including but not limited to Power BI Report Server, the Power BI, PowerApps or Microsoft Power Automate mobile applications, Power BI Desktop, or Power Apps Studio.
Microsoft Defender for Endpoint Services	The cloud services portion of Microsoft Defender for Endpoint.
Microsoft 365 Defender	The cloud service portion of Microsoft 365 Defender.
Windows 365	The cloud service portion of Windows 365, excluding the Windows operating system running on Windows 365 Cloud PCs.

Security Practices and Policies for Core Online Services

In addition to the security practices and policies for Online Services in the DPA, each Core Online Service also complies with the control standards and frameworks shown in the table below and implements and maintains the security measures set forth in Appendix A of the DPA for the protection of Customer Data.

Online Service	SSAE 18 SOC 1 Type II	SSAE 18 SOC 2 Type II
Office 365 Services	Yes	Yes
Microsoft 365 Compliance Services	Yes	Yes
Microsoft Dynamics 365 Core Services	Yes	Yes
Microsoft Azure Core Services	Varies*	Varies*
Microsoft Defender for Cloud Apps	Yes	Yes
Microsoft Intune Online Services	Yes	Yes
Microsoft Power Platform Core Services	Yes	Yes
Microsoft Defender for Endpoint Services	Yes	Yes
Microsoft 365 Defender	Yes	Yes
Windows 365	Yes	Yes

Current scope is detailed in the audit report and summarized in the Microsoft Trust Center.

Location of Customer Data at Rest for Core Online Services

For the Core Online Services, Microsoft will store Customer Data at rest within certain major geographic areas (each, a Geo) as follows except as otherwise provided in the Online Service-specific terms:

- **Office 365 Services.** If Customer provisions its tenant in Australia, Brazil, Canada, the European Union, France, Germany, India, Japan, Norway, Qatar, South Africa, South Korea, Sweden, Switzerland, the United Kingdom, the United Arab Emirates, or the United States, Microsoft will store the following Customer Data at rest only within that Geo: (1) Exchange Online mailbox content (e-mail body, calendar entries, and the content of e-mail attachments), (2) SharePoint Online site content and the files stored

within that site, (3) files uploaded to OneDrive for Business, and (4) Microsoft Teams chat messages (including private messages, channel messages, meeting messages and images used in chats), and for customers using Microsoft Stream (Classic) (on SharePoint), meeting recordings. If Customer purchases an Advanced Data Residency subscription, then Microsoft will store certain Customer Data at rest in the applicable Geo in accordance with this section and the "Advanced Data Residency Commitments" section of the product documentation at https://aka.ms/adroverview.

- **Microsoft Intune Online Services**. When Customer provisions a Microsoft Intune tenant account to be deployed within an available Geo, then, for that service, Microsoft will store Customer Data at rest within that specified Geo except as noted in the Microsoft Intune Trust Center.
- **Microsoft Power Platform Core Services**. When Customer provisions a Power Platform Core Service to be deployed within an available Geo, then, for that service, Microsoft will store Customer Data at rest within that specified Geo, except as described in the Microsoft Power Platform Trust Center.
- **Microsoft Azure Core Services**. If Customer configures a particular service to be deployed within a Geo then, for that service, Microsoft will store Customer Data at rest within the specified Geo. Certain services may not enable Customer to configure deployment in a particular Geo or outside the United States and may store backups in other locations. Refer to the Microsoft Trust Center (which Microsoft may update from time to time, but Microsoft will not add exceptions for existing Services in general release) for more details.
- **Microsoft Defender for Cloud Apps**. If Customer provisions its tenant in the European Union or the United States, Microsoft will store Customer Data at rest only within that Geo, except as described in the Microsoft Defender for Cloud Apps Trust Center.
- **Microsoft Dynamics 365 Core Services**. When Customer provisions a Dynamics 365 Core Service to be deployed within an available Geo, then, for that service, Microsoft will store Customer Data at rest within that specified Geo, except as described in the Microsoft Dynamics 365 Trust Center.
- **Microsoft Defender for Endpoint Services**. When Customer provisions a Microsoft Defender for Endpoint tenant to be deployed within an available Geo, then, for that service, Microsoft will store Customer Data at rest within that specified Geo except as noted in the Microsoft Defender for Endpoint Trust Center.
- **Microsoft 365 Defender**. When Customer provisions a Microsoft 365 Defender tenant to be deployed within an available Geo, then, for that service, Microsoft will store Customer Data at rest within that specified Geo except as noted in the Microsoft 365 Defender Trust Center.
- **Windows 365**. When a Windows 365 tenant is deployed within an available Geo, then, for that tenant, Microsoft will store Customer Data at rest within that specified Geo. If Customer provisions Windows 365 Cloud PCs within the same tenant to different available Geos, then, for each Cloud PC, Microsoft will store Cloud PC Customer Data at rest within that specified Geo.

EU Data Boundary Services

The term "EU Data Boundary" means the Microsoft computers, computing environment, and physical data centers located solely in the European Union (EU) and the European Free Trade Association (EFTA). The term "EU Data Boundary Services" applies only to the Online Services in the table below, excluding any Previews.

EU Data Boundary Services	
Azure	Azure services that enable deployment in a region within the EU Data Boundary and the following non-regional services: Azure Active Directory B2C, Azure Advisor, Azure Bot Service, Cloud Shell, Azure Communication Services, Azure Data Box, Azure DNS, Microsoft Entra ID, Azure Kubernetes Service on Azure Stack HCI, Azure Lighthouse, Azure Migrate, Azure Monitor, Azure Resource Mover, Azure Service Health, Azure Sphere, Azure Stack Edge, Azure Stack HCI, Azure Stack Hub, Azure Virtual Desktop, Azure VM Image Builder, Power BI Embedded, Traffic Manager, Translator
Dynamics 365	Dynamics 365 Business Central, Dynamics 365 Commerce, Dynamics 365 Customer Insights, Dynamics 365 Customer Service, Dynamics 365 Customer Voice, Dynamics 365 Field Service, Dynamics 365 Finance, Dynamics 365 Guides, Dynamics 365 Intelligent Order Management, Dynamics 365 Marketing, Dynamics 365 Project Operations, Dynamics 365 Remote Assist, Dynamics 365 Sales, Dynamics 365 Supply Chain Management
Microsoft 365	Cortana, Customer Lockbox, Exchange Online, Exchange Online Archiving for Exchange Online, Microsoft Bookings, Microsoft Forms, Microsoft MyAnalytics, Microsoft Planner, Microsoft StaffHub, Microsoft Stream (Classic) (on SharePoint), Microsoft Teams, Microsoft To-Do, Office for the web, Online Services provided as part of Microsoft 365 Apps, OneDrive for Business, SharePoint Online, Sway, Whiteboard, Yammer Enterprise, Microsoft 365 Copilot, Communications Compliance, eDiscovery and Audit, Insider Risk Management, Information Barriers, Microsoft Purview Data Loss Prevention, Microsoft Intune, Priva Privacy Risk Management, Priva Subject Rights Management, Microsoft Viva Answers, Microsoft Viva Connections, Microsoft Viva Engage, Microsoft Viva Glint, Microsoft Viva Goals, Microsoft Viva Insights, Microsoft Viva Learning, Microsoft Sales Copilot, and Microsoft Viva Topics

EU Data Boundary Services	
Power Platform	Microsoft Power Apps, Microsoft Power Automate, Microsoft Power BI, Microsoft Power Pages, Microsoft Power Virtual Agents

Location of Customer Data for EU Data Boundary Services

For EU Data Boundary Services, Microsoft will store and process Customer Data (including any Personal Data contained therein) within the EU Data Boundary as detailed below.

Customer must configure EU Data Boundary Services as follows:
- For **Azure**, Customer must deploy the service into an Azure region located within the EU Data Boundary. See Data Residency in Azure (https://azure.microsoft.com/explore/global-infrastructure/data-residency) for more information. For services that do not enable deployment into a specified Azure region, Customer must follow the instructions at Configuring Azure non-regional services for the EU Data Boundary (https://learn.microsoft.com/privacy/eudb/eu-data-boundary-configure-azure-nonregional-services).
- For **Dynamics 365 and Power Platform**, if Customer provisions a tenant with a billing address in the EU or EFTA, that tenant will be in-scope for the EU Data Boundary if Customer also creates all of its environments within a Geo inside the EU Data Boundary.
- For **Microsoft 365**, if Customer provisions a tenant with a billing address in the EU or EFTA, that tenant will be in-scope for the EU Data Boundary, except for those tenants where Customer has also purchased the Microsoft 365 Multi-Geo Capabilities add-on that enables customers to expand Microsoft 365 tenant presence to multiple geographic regions or countries (https://learn.microsoft.com/microsoft-365/enterprise/microsoft-365-multi-geo?view=o365-worldwide).

Use of EU Data Boundary Services may result in limited transfers of Customer Data outside the EU Data Boundary, as set forth below and further detailed in transparency documentation for the EU Data Boundary located at https://learn.microsoft.com/en-us/privacy/eudb/eu-data-boundary-learn or successor location. Any such transfers will be conducted in accordance with the Data Protection Addendum and the Product Terms.
- **Remote Access**. Microsoft personnel located outside the EU Data Boundary may remotely access data processing systems in the EU Data Boundary as necessary to operate, troubleshoot, and secure the EU Data Boundary Services.
- **Customer-Initiated Transfers**. Customers may initiate transfers outside the EU Data Boundary, such as by accessing EU Data Boundary Services from locations outside the EU Data Boundary, sending an email to a recipient located outside the EU Data Boundary, or use of EU Data Boundary Services in combination with other services not in the EU Data Boundary.
- **Protecting Customers**. Microsoft transfers limited data outside of the EU Data Boundary as necessary to detect and protect Customers against security threats.
- **Directory Data**. Microsoft may replicate limited Microsoft Entra directory data from Microsoft Entra ID (including username and email address) outside the EU Data Boundary to provide the service.
- **Network Transit**. To reduce routing latency and to maintain routing resiliency, Microsoft uses variable network paths that may occasionally result in transit of data outside the EU Data Boundary. This may include load balancing by proxy servers.
- **Service-Specific Transfers**. See transparency documentation referenced above for information about transfers applicable to specific EU Data Boundary Services.

Visual Studio Subscriptions

Availability

Product	Date Available	Program Attribute
Visual Studio Professional 2022	11/21	

Product Conditions:

Provides additional information related to acquiring the Product, such as prerequisites for purchase, prior versions, and the applicable Product Pool.

Product Conditions - General	
Prior Version	Visual Studio 2019 (3/19)
Product Pool	Applications

Product Conditions - General	
Promotions	None

License Grant for SQL Server Parallel Data Warehouse Developer

Each Licensed User of Visual Studio Professional Subscription, Visual Studio Enterprise Subscription and Visual Studio Test Professional Subscription is deemed to have one License for SQL Server 2016 Parallel Data Warehouse Developer.

License Grant for Azure DevOps Server 2022

Each Licensed User of Visual Studio Professional Subscription, Visual Studio Enterprise Subscription, Visual Studio Test Professional Subscription and MSDN Platforms is deemed to have one Server License for Azure DevOps Server and one Azure DevOps Server User CAL. The CAL is for the sole use of the Licensed User.

Microsoft Azure Services

Microsoft Azure benefits cannot be combined from multiple Visual Studio Subscriptions or MSDN Platforms onto a single Microsoft Azure account.

Azure Virtual Desktop

Refer to the Azure Virtual Desktop section of the Microsoft Azure Services for rights to access Azure Virtual Desktop virtual machines.

Use Rights

Identifies the License Terms for each Software Product, including the Universal License Terms, the applicable License Model, and any Product-Specific License Terms. References in Customer's volume licensing agreement to "Use Rights" refer to the terms included in the Use Rights section of each Software Product Entry.

Use Rights	
License Terms	Universal License Terms for all Software
Down Editions	Enterprise to Professional
External User Access Requirements	None
Included Technologies	SQL Server Technology, Windows Software Components, Microsoft SharePoint, Windows SDK, Microsoft Office Components, Microsoft Advertising SDK
Notices	Internet-based Features - All, Bing Maps - All (except MSDN Platforms), H.264 and/or VC-1 - All (except MSDN Platforms) - refer to Notices

Third Party Licensing Terms for Open Source Components

Licensed User may not reverse engineer, decompile or disassemble the software, or otherwise attempt to derive the source code for the software, except and to the extent required by third party licensing terms governing use of certain open source components that may be included with the software.

Build Devices and Visual Studio Build Tools

Customer may install copies of the files from Visual Studio Professional, Visual Studio Enterprise, or from Visual Studio Build Tools onto its build devices, including physical devices and virtual machines or containers on those devices, whether on-premises or remote devices that are dedicated solely to Customer's use, or hosted on Microsoft Azure for Customer, (collectively, "Build Devices"). Dedicated devices that are under the management or control of an entity other than Customer or one of its Affiliates are subject to the Outsourcing Software Management clause. Customer and others in its organization may use these files on its Build Devices solely to compile, build, and verify programs developed by using Visual Studio Professional or Visual Studio Enterprise, or to run quality or performance tests of those programs as part of the build process.

Utilities

Customer may copy and install the Utilities listed at https://aka.ms/vs/16/utilities onto its devices solely to debug and deploy Customer's programs and databases that Customer develops with Visual Studio Professional and Visual Studio Enterprise. Utilities are

designed for temporary use. Microsoft may not be able to patch or update Utilities separate from the Visual Studio software, and some Utilities by their nature may make it possible for others to access devices on which the Utilities are installed. Customer should delete all the Utilities installed onto a device when it finishes debugging or deploying its programs and databases. Microsoft is not responsible for any third-party use or access of devices, or of the programs or databases on devices, on which the Utilities have been installed.

Developing Extensions

Limits on Extensions.
Customer may not develop or enable others to develop extensions for Visual Studio Professional or Visual Studio Enterprise (or and other component of the Visual Studio family of products) which circumvent the technical limitations implemented in the software. If Microsoft technically limits or disables extensibility for the software, Customer may not extend the software by, among other things, loading or injecting into the software any non-Microsoft add-ins, macros, or packages; modifying the software registry settings; or adding features or functionality equivalent to that found in the Visual Studio family of products.

No Degrading the Software.
If Customer develops an extension for Visual Studio Professional or Visual Studio Enterprise (or any other component of the Visual Studio family of products), Customer must test the installation, uninstallation, and operation of its extension to ensure that such processes do not disable any features or adversely affect the functionality of Visual Studio Professional or Visual Studio Enterprise (or such component) or of any previous version or edition thereof.

Office Professional Plus 2019 – Visual Studio Enterprise Subscription

Each Licensed User of Visual Studio Enterprise Subscription may also install and use one copy of Office Professional Plus 2019 or Microsoft 365 Apps for enterprise for production use. Except as provided here, the Office Desktop Applications (Windows) terms applies to the Licensed User's use of Office Professional Plus 2019 and the Microsoft 365 Applications terms applies to Licensed User's use of Microsoft 365 Apps for enterprise.

Distributable Code

Visual Studio Professional and Visual Studio Enterprise contains code and text files that Customer is permitted to distribute in programs it develops while using such software.

Right to Use and Distribute.
The code and text files listed below are "Distributable Code".

- **Distributable List**. Customer may copy and distribute the object code form of code listed on the Distributable List located at https://aka.ms/vs/16/redistribution.
- **Sample Code, Templates, and Styles**. Customer may copy, modify, and distribute the source and object code form of code marked as "sample", "template", "simple styles", and "sketch styles".
- **Third-party Distribution**. Customer may permit distributors of its programs to copy and distribute the Distributable Code as part of those programs.

Data Collection

The Data Protection Addendum applies to the Product, except (1) the DPA's statement of compliance with ISO 27001, ISO 27002, and ISO 27018 for processed data does not apply, and (2) use of all data processed by Internet-based Features is governed by the Microsoft Privacy Statement (aka.ms/privacy) and not the DPA, unless other terms accompany such Internet-based Features. Information on connected experiences in Visual Studio, including how to disable access to such experiences, is available here: https://docs.microsoft.com/visualstudio/ide/reference/connected-experiences?view=vs-2019.

Code Inspection

The software includes an optional feature enabling inspection of binary code and reproduction of source code from binary code. Customer agrees to use such feature only to inspect or reproduce software as authorized by its owner or applicable law.

License Model

Developer Tools

User Licenses

1. One <u>Licensed User</u> may use any number of copies of the software and any prior version on any device for each User License it acquires. Any device that is under the management or control of an entity other than Customer or one of its Affiliates is subject to the <u>Outsourcing Software Management</u> clause.
2. <u>Licensed Users</u> may use the software for evaluation and to develop, test, and demonstrate Customer's programs. These rights include the use of the software to simulate an end user environment to diagnose issues related to its programs.
3. The software is not licensed for use in a Production Environment.

Additional License Terms for Visual Studio Subscriptions

In addition to the rights in the License Model Terms, Customer may allocate a Visual Studio Subscription for each <u>License</u> it acquires. For Visual Studio Subscriptions, the "Software" means software made available to Customer's subscription level via Visual Studio Subscription Subscriber Downloads. Any online service made available with Customer's Visual Studio Subscription may not be used in a <u>Production Environment</u>.

Running the Software on Microsoft Azure Services

- The Licensed User may run the Software on Microsoft Azure Services during the term of its Visual Studio Subscription.
- The use of the Software remains subject to the terms and conditions of Customer's volume licensing agreement and any terms that come with the Software.
- The Developer Tools License Model Terms apply to the use of the Software and Azure Dev/Test offers, except that the <u>Licensed User</u> may not run Office Professional Plus or System Center Virtual Machine Manager for production use on Microsoft Azure Services.

Additional Requirements

To run Software on Microsoft Azure Services Customer must activate its Visual Studio Subscription by linking its Microsoft account to the Visual Studio Subscription.

Acceptance Testing and Feedback

Customer's end users may access the Software, and online services made available with Customer's Visual Studio Subscription, to perform acceptance tests or to provide feedback on its programs.

Windows Server Remote Desktop Services

Up to 200 anonymous users at a time may use the Remote Desktop Services feature of the Windows Server software to access online demonstrations of Customer's programs.

Windows Embedded Product

Each Windows Embedded Product is licensed under the terms that come with it, including any Microsoft obligations related to defense of infringement and misappropriation claims. These terms replace the corresponding terms in Customer's volume licensing agreement. Each <u>Licensed User</u> may install and use an unlimited number of copies of the licensed Windows Embedded Product.

Data Collection

The Data collection practices of Software are as described in the terms accompanying them.

Software Assurance

Identifies terms and conditions associated with Software Assurance coverage. For details on purchasing Software Assurance and general Software Assurance Benefits, also refer to <u>Software Assurance Benefits</u>.

Software Assurance	
SA Benefits	Applications
Disaster Recovery	None

Software Assurance	
License Mobility	None
Migration Rights	Product List - March 2014 and Product Terms - September 2015
Roaming Rights	None
Self Hosting	None
SA Equivalent Rights	Yes
Prerequisite (SA)	See Software Assurance Benefits

Software Assurance Eligibility

Customers with expiring SA on any Visual Studio Subscription License or an active retail subscription corresponding to the Visual Studio offerings in the Product Terms may renew coverage under any Visual Studio Subscription License. When renewing to a different Subscription level, the new use terms replace the prior use terms, and any software not included in the new Subscription may no longer be used. Renewing into coverage that corresponds to a higher Visual Studio edition is facilitated through Step Up Licenses (refer to Software Assurance Benefits)

Visual Studio Subscription Perpetual Rights

Customer's rights to use any software licensed through Visual Studio Subscription become perpetual when Customer's right to use Visual Studio becomes perpetual.

System Center Server

Availability

Product	Date Available	Program Attribute
System Center 2022 Datacenter Server Management License (2-packs of Core Licenses)	4/22	
System Center 2022 Standard Server Management License (2-packs of Core Licenses)	4/22	

Product Conditions:

Provides additional information related to acquiring the Product, such as prerequisites for purchase, prior versions, and the applicable Product Pool.

Product Conditions - General	
Prior Version	System Center 2019 (3/19)
Product Pool	Server
Promotions	None

Use Rights

Identifies the License Terms for each Software Product, including the Universal License Terms, the applicable License Model, and any Product-Specific License Terms. References in Customer's volume licensing agreement to "Use Rights" refer to the terms included in the Use Rights section of each Software Product Entry.

Use Rights	
License Terms	Universal License Terms for all Software
Down Editions	None
External User Access Requirements	None
Included Technologies	SQL Server Technology, Windows Software Components
Notices	Internet-based Features, Bing Maps - refer to Notices

System Center Endpoint Protection Use with Azure Security Center or Microsoft Defender for Endpoint

Customer may use System Center Endpoint Protection to manage Virtual OSEs it is protecting using the Standard tier of Azure Security Center or Microsoft Defender for Endpoint. The System Center License Terms, as amended here, govern that use. Managed Virtual OSEs can be running on shared or dedicated Servers. Customer is not required to acquire and assign System Center Licenses for this limited use.

SQL Server Technology

Customer may run any number of Instances of any SQL Server database software included in the Product in one OSE on a Server for the limited purpose of supporting that Product and any other Product that includes SQL Server database software. Servers that are under the management or control of an entity other than Customer or one of its Affiliates are subject to the Outsourcing Software Management clause.

Windows Server Containers

Customer may Manage any number of OSEs instantiated as Windows Server Containers on the Licensed Server.

Self-Hosting and Disaster Recovery

Customers with subscription licenses are additionally granted rights equivalent to the rights provided to SA customers under Self-Hosting and Disaster Recovery. Use of the software is subject to the same terms and conditions.

License Model

Management Servers

The Management License version, not the version of software used, determines the version of applicable License Terms (including use under downgrade rights notwithstanding terms to the contrary).

Server Management Licenses (per core)
1. Customer may use the software on Azure or a Server to Manage OSEs on a Licensed Server, provided it acquires sufficient Server Licenses as described below.
2. The number of Licenses required equals the number of Physical Cores on the Licensed Server, subject to a minimum of 8 Licenses per Physical Processor and a minimum of 16 Licenses per Server.
3. Datacenter edition permits use of the server software to Manage any number of OSEs on the Licensed Server.
4. Standard edition:
     o Standard edition permits use of the software to Manage up to two OSEs on the Licensed Server.
     o Standard edition permits Management of the Physical OSE on the Licensed Server (in addition to two Virtual OSEs), if the Physical OSE is used solely to host and Manage Virtual OSEs.
     o Customer may assign additional Standard edition Licenses to the Licensed Server equal to the number specified in 2 above and Manage two additional OSEs.
5. OSEs running Server operating systems require Server Management Licenses.

Server Management Licenses (per core) - Licensing by Individual Virtual OSE
Available for subscription licenses or licenses with active Software Assurance only:

- Customer may use the software on Azure or a Server to Manage a Virtual OSE on a Licensed Server, provided it acquires sufficient Server Licenses as described below.
- The number of Licenses required equals the number of Virtual Cores in the Virtual OSE, subject to a minimum of 8 Licenses per Virtual OSE.
- Customer may reassign any of its Licenses to any of its Licensed Servers located within the same Server Farm as often as needed. Customer may also reassign these Licenses from one Server Farm to another, but not on a short-term basis (i.e., not within 90 days of the last assignment).

Client Management Licenses (per OSE or user)
- Customer may use the software on Azure or a Server* to Manage an OSE on a Licensed Device or OSEs on devices used by a Licensed User for each Client Management License it acquires.

- OSEs running operating systems other than Server operating systems require Client Management Licenses or Management License Equivalent Licenses.
- The number of Client Management Licenses required depends on License type (per OSE or user) assigned.
- Management of an OSE accessed by more than one user requires an OSE Client Management License or a User Client Management License for each user.

Any Server that is under the management or control of an entity other than Customer or one of its Affiliates is subject to the Outsourcing Software Management clause.

Management Licenses are not required for:
1. OSEs in which there are no Running Instances of software;
2. Any of Customer's network infrastructure devices functioning solely for the purpose of transmitting network data and not running Windows Server software;
3. Conversion of OSEs from Physical to Virtual; or
4. Any device solely monitored or managed for the status of its hardware components with respect to system temperature, fan speed, power on/off, system reset or CPU availability.

Data Sets
Customer may not copy or distribute any data set (or any portion of a data set) included in the software.

Access Licenses

Management License - System Center 2022 Standard

Server **Management** License
System Center 2022 Standard Management License

Management License - System Center 2022 Datacenter

Windows Server Standard, Datacenter, and Essentials

Availability

Product	Date Available	Program Attribute
Windows Server 2019 Essentials	10/18	
Windows Server 2022 Active Directory Rights Management Services CAL	8/21	
Windows Server 2022 Active Directory Rights Management Services External Connector	8/21	
Windows Server 2022 CAL	8/21	
Windows Server 2022 Datacenter (16-packs of Core Licenses)	8/21	
Windows Server 2022 Datacenter (2-packs of Core Licenses)	8/21	
Windows Server 2022 External Connector	8/21	
Windows Server 2022 Remote Desktop Services CAL (Device and User)	8/21	
Windows Server 2022 Remote Desktop Services External Connector	8/21	
Windows Server 2022 Standard (16-packs of Core Licenses)	8/21	
Windows Server 2022 Standard (2-packs of Core Licenses)	8/21	
Windows Server ESU (Standard and Datacenter)		

Note: Windows Server subscription licenses (core, and base and additive CALs and SLs) purchased through CSP are subject to different terms as set forth in the Server Subscriptions for Azure section of these terms.

Product Conditions:

Provides additional information related to acquiring the Product, such as prerequisites for purchase, prior versions, and the applicable Product Pool.

Product Conditions - General	
Prior Version	Windows Server 2019 (10/18)
Product Pool	Server
Promotions	None

Windows Server Premium Assurance Add-on

Customers looking for terms and conditions for Premium Assurance Add-on should refer to the January 2018 Product Terms (which may be found at https://www.aka.ms/licensingdocs)

Use Rights

Identifies the License Terms for each Software Product, including the Universal License Terms, the applicable License Model, and any Product-Specific License Terms. References in Customer's volume licensing agreement to "Use Rights" refer to the terms included in the Use Rights section of each Software Product Entry.

Use Rights	
License Terms	Universal License Terms for all Software
Down Editions	Datacenter to Standard or Essentials, Standard to Essentials (for versions 2008 R2 and prior refer to the Product Terms - September 2018)
External User Access Requirements	CALs or External Connector
Included Technologies	None
Notices	Internet-based Features, H.264 and/or VC-1, H.265/HEVC, Malware Protection - refer to Notices.

Additional Terms for Windows Server 2019 Essentials

Limitations on Use

1. At any one time, Customer may use a Running Instance of the server software in each of the Physical OSE and in one Virtual OSE.
2. Customer must run the server software within a domain where the Server's Active Directory is configured as (i) the domain controller (a single server which contains all the flexible single master operations (FSMO) roles), (ii) the root of the domain forest, (iii) not to be a child domain, and (iv) to have no trust relationship with any other domains. If the server software is used in a Virtual OSE, the Instance in the Physical OSE may be used only to run hardware virtualization software, provide hardware virtualization services, or run software to manage and service Operating System Environment on the Licensed Server. That Instance does not need to meet the requirements in (I) through (iv) above.

Using the Server Software

A User Account is a unique user name with its associated password created through the Windows Server 2019 Essentials Console. Customer may use up to 25 user accounts. Each user account permits a named user to access and use the server software on that server. It may reassign a user account from one user to another provided that the reassignment does not occur within 90 days of the last assignment.

Windows Server 2019 Essentials Connector

Customer may install and use the Windows Server 2019 Essentials Connector software on no more than 50 devices at any one time. It may use this software only with the server software.

Windows Server Active Directory Rights Management Services Access

Customer must acquire a Windows Server 2022 Active Directory Rights Management Services CAL for each User Account through which a user directly or indirectly accesses the Windows Server 2022 Active Directory Rights Management Services functionality.

Windows Server Containers without Hyper-V isolation with Windows Server 2022 Standard and Datacenter

Customer may use any number of <u>OSEs</u> instantiated as Windows Server Containers without Hyper-V isolation on the <u>Licensed Server</u>.

Windows Server Datacenter: Azure Edition

Use Restriction

Customer may use Windows Server Datacenter: Azure Edition only as an operating system for virtualization on Microsoft Azure and Azure Stack.

Limited Right to Use Datacenter Images with Standard Licenses

Customers with Windows Server Standard subscription licenses acquired through CSP and assigned on a <u>Virtual OSE</u> basis may run Windows Server Datacenter images instead of Standard images.

Subject to the following conditions:
- Customer may run Datacenter images as guest OSEs only.
- Customer must use its existing Windows Server Datacenter activation infrastructure to activate Datacenter guests (e.g., existing KMS server), or access the Datacenter guests provided by a Cloud Solution Provider-Hoster.
- All other Windows Server Standard Use Rights apply.

Windows Server Products data processing

Microsoft will be a controller of <u>Personal Data</u> processed in connection with your use of Windows Server Products. When Microsoft is a controller, Microsoft will handle the <u>Personal Data</u> in accordance with the Microsoft Privacy Statement (<u>aka.ms/privacy</u>), and the <u>Data Protection Addendum</u> terms do not apply. Please see the Product documentation for details on any processing of <u>Personal Data</u> in connection with Windows Server Products and Customer's configuration options.

Additional Software

Windows Server 2022
AD Migration Tool
GBUNIECN.EXE Utility

License Model

Per Core/CAL

Server Licenses (per core)
1. Customer may use the server software on a <u>Licensed Server</u>, provided it acquires sufficient <u>Server</u> licenses as described below.
2. The number of <u>Licenses</u> required equals the number of <u>Physical Cores</u> on the <u>Licensed Server</u>, subject to a minimum of 8 <u>Licenses</u> per <u>Physical Processor</u> and a minimum of 16 <u>Licenses</u> per <u>Server</u>.
3. Datacenter edition permits use of the server software in any number of <u>OSEs</u> on the <u>Licensed Server</u>.
4. Standard edition:
   - Standard edition permits use of the server software in two <u>OSEs</u> on the <u>Licensed Server</u>.
   - Standard edition permits use of one <u>Running Instance</u> of the server software in the <u>Physical OSE</u> on the <u>Licensed Server</u> (in addition to two <u>Virtual OSEs</u>), if the <u>Physical OSE</u> is used solely to host and manage the <u>Virtual OSEs</u>.
   - Customer may assign additional Standard edition <u>Licenses</u> to the <u>Licensed Server</u> equal to the number specified in 2 above and use the server software in two additional <u>OSEs</u> on the <u>Licensed Server</u>.
5. As long as the total numbers of <u>Licenses</u> and <u>Physical Cores</u> remains the same, <u>License</u> reassignment is permitted any time Customer repartitions a single piece of hardware.
6. As a one-time alternative to assigning base <u>CALs</u> per user or per device, a number of base <u>CALs</u> may be dedicated to an <u>Instance</u> of the server software on a single <u>Server</u> (per server mode) to permit up to the same number of users or devices to concurrently access that <u>Instance</u>.

Server Licenses (per core) - Licensing by Individual Virtual OSE

Available for subscription licenses or licenses with active Software Assurance only. All <u>CALs</u> used to access the software under this model must also be acquired as subscription licenses or have active Software Assurance.

- Customer may use the server software in one <u>Virtual OSE</u> on the <u>Licensed Server</u>, provided it acquires sufficient Server licenses as described below.
- The number of Licenses required equals the number of <u>Virtual Cores</u> in the <u>Virtual OSE</u>, subject to a minimum of 8 Licenses per <u>Virtual OSE</u>.
- Customer may reassign any of its <u>Licenses</u> to any of its <u>Licensed Servers</u> located within the same <u>Server Farm</u> as often as needed. Customer may also reassign these <u>Licenses</u> from one <u>Server Farm</u> to another, but not on a short-term basis (i.e., not within 90 days of the last assignment).

Access Licenses

- Except as described here and noted in the <u>Product-Specific License Terms</u>, all server software access requires <u>CALs</u> or <u>CAL Equivalent Licenses</u>.
- <u>CALs</u> are not required for access by another <u>Licensed Server</u>.
- <u>CALs</u> are not required to access server software running a <u>Web Workload</u> or <u>HPC Workload</u>.
- <u>CALs</u> are not required for access in a <u>Physical OSE</u> used solely for hosting and managing <u>Virtual OSEs</u>.

Specialty Servers

Server Licenses (per Instance)

Customer may use one <u>Running Instance</u> of server software in either a <u>Physical OSE</u> or <u>Virtual OSE</u> on a <u>Licensed Server</u> for each <u>Server</u> License it acquires.

Subscription licenses or licenses with active Software Assurance only: When licensing by <u>Virtual OSE</u>, Customer may reassign any of its <u>Licenses</u> to any of its <u>Licensed Servers</u> located within the same <u>Server Farm</u> as often as needed. Customer may also reassign these <u>Licenses</u> from one <u>Server Farm</u> to another, but not on a short-term basis (i.e., not within 90 days of the last assignment).

Access Licenses

Client access licenses may be assigned by user or device, as appropriate. A user CAL allows access to corresponding version of the server software or earlier versions of the server software from any device by one user. A device CAL allows access to corresponding versions of the server software or earlier versions of the server software from one device by any user. CALs allow access to server software running on Customer's Licensed Servers only.

Server Software Access

Base Access License
Windows Server 2022 CAL
CAL Equivalent License (refer to CAL and ML Equivalency)

As an exception, users do not need Windows Server CALs when accessing the server software solely to sync between an Active Directory infrastructure running on Customer's Licensed Servers and Microsoft Entra ID.

Cloud Solution Provider - Hoster Exception

Users do not need Windows Server CALs when accessing server software acquired from, fulfilled, and hosted by a Cloud Solution Provider-Hoster.

Additional Functionality Associated with Windows Server 2022 Remote Desktop Services CAL

Microsoft Application Virtualization for Remote Desktop Services and Windows Server 2022 Remote Desktop Services functionality

Additive Access License
Windows Server 2022 Remote Desktop Services CAL
Windows Server 2022 Remote Desktop Services User SL

Also required for use of Windows Server to host a graphical user interface (using the Windows Server 2022 Remote Desktop Services functionality or other technology).

Additional Functionality Associated with Windows Server 2022 Rights Management Services CAL

Windows Server 2022 Rights Management Services

Additive Access License
Windows Server 2022 Active Directory Rights Management Services CAL
Azure Information Protection P1 User SL
CAL Equivalent License (refer to CAL and ML Equivalency)

Additional Functionality Associated with Microsoft Identity Manager User CAL

Microsoft Identity Manager 2016 functionality

Additive Access License
Microsoft Identity Manager 2016 User CAL
Microsoft Entra ID (P1 and P2) User SL
CAL Equivalent License (refer to CAL and ML Equivalency)

Also required for any person for whom the software issues or manages identity information.

Synchronization Service

Microsoft Identity Manager 2016 CALs not required for users only using Microsoft Identity Manager synchronization service.

Server External User Access

Base Access License
Windows Server 2022 External Connector

Cloud Solution Provider - Hoster Exception

Customer does not need a Windows Server External Connector license for External User access to server software acquired from, fulfilled, and hosted by a Cloud Solution Provider-Hoster.

Additional Functionality Associated with Windows Server 2022 Remote Desktop Services External Connector License

Microsoft Application Virtualization for Remote Desktop Services and Windows Server 2022 Remote Desktop Services functionality

Additive Access License
Windows Server 2022 Remote Desktop Services External Connector

Also required for use of Windows Server to host a graphical user interface (using the Windows Server 2022 Remote Desktop Services functionality or other technology).

Additional Functionality Associated with Windows Server 2022 Rights Management Services External Connector License

Windows Server 2022 Rights Management Services

Additive Access License
Windows Server 2022 Active Directory Rights Management Services External Connector

Additional Functionality Associated with Microsoft Identity Manager External Connector License

Microsoft Identity Manager 2016 functionality

Additive Access License
Microsoft Identity Manager 2016 External Connector

Also required for any External User for whom the software issues or manages identity information (in absence of Microsoft Identity Manager 2016 CALs).

BizTalk Server

Availability

Product	Date Available	Program Attribute
BizTalk Server 2020 Branch Edition	1/20	
BizTalk Server 2020 Enterprise Edition	1/20	
BizTalk Server 2020 Standard Edition	1/20	

Product Conditions:

Provides additional information related to acquiring the Product, such as prerequisites for purchase, prior versions, and the applicable Product Pool.

BizTalk Server	
Prior Version	BizTalk Server 2016 (12/16)
Product Pool	Server
Promotions	None

Use Rights

Identifies the License Terms for each Software Product, including the Universal License Terms, the applicable License Model, and any Product-Specific License Terms. References in Customer's volume licensing agreement to "Use Rights" refer to the terms included in the Use Rights section of each Software Product Entry.

Use Rights	
License Terms	Universal License Terms for all Software

Notices	Internet-based Features - refer to Notices

BizTalk Server Branch and Standard Edition

Use Limitation

Customer may not use the server software on a Server that is part of a networked cluster or in an OSE that is part of a networked cluster of OSEs on the same Server.

Office Web Component

Customer may use the Office Web Component only to view and print copies of static documents, text and images created with the software. Customer does not need separate licenses for copies of the component.

BizTalk Server Branch Edition

Customer may Run Instances of the software on Licensed Servers only at the endpoint of its internal network (or edge of its organization) to connect business events or transactions with activities processed at that endpoint; provided, the Licensed Server may not:

- act as the central node in a "hub and spoke" networking model,
- centralize enterprise-wide communications with other Servers or devices; or
- automate business processes across divisions, business units, or branch offices.

Licensing Use of Host Integration Server (HIS)

Customer may use HIS server software and Additional Software under the terms and conditions of the Per Core License Model using BizTalk Server core licenses. Customer may use HIS Additional Software (e.g., HIS Client) only in conjunction with its licensed use of HIS server software. The rights applicable to this use are determined by which edition and version of BizTalk Server licenses Customer assigns to the Server (e.g., unlimited virtualization rights require BizTalk Server Enterprise licenses with SA). Use of HIS server software is limited to branch office deployments if used under the BizTalk Server Branch Edition licenses.

Additional Software:

BizTalk - all editions			
Administration and Monitoring Tools	Software Development Kit(s)	BAM Event APIs and Interceptors and Administration Tools	MSXML
Business Activity Monitoring ("BAM") Client	Windows Communication Foundation Adapters	Windows SharePoint Services Adapter Web Services	ADOMD.NET
Business Activity Services	Master Secret Server/Enterprise Single Sign-On	BAM Alert Provider for SQL Notification Services	SQLXML
HTTP Receive Adapter	SOAP Receive Adapter	BizTalk Server Related Schemas and Templates	UDDI
Development Tools	MQSeries Agent	Business Rules Component	MQHelper.dll

License Model

Per Core

For Products under the Per Core License Model, Customer must choose either Licensing by Physical Core on a Server or Licensing by Individual Virtual OSE. The terms for each are set forth below.

Server Licenses (per core) - Licensing by Physical Core on a Server
1. Customer may use the server software on a Licensed Server, provided it acquires sufficient Server Licenses as described below.
2. The number of Licenses required equals the number of Physical Cores on the Licensed Server subject to a minimum of four Licenses per Physical Processor.
3. For Enterprise edition, Customer may use any number of Running Instances of the server software on the Licensed Server in a number of Physical OSEs and/or Virtual OSEs equal to the number of licenses assigned to it.
4. For each additional Enterprise edition License that Customer assigns beyond the number of Licenses required under paragraph 2 above, it may use the server software in one additional OSE on the Licensed Server.
5. For other editions, Customer may use any number of Running Instances of the server software only in the Physical OSE on the Licensed Server.

Server Licenses (per core) - Licensing by Individual Virtual OSE
Available for subscription licenses or licenses with active Software Assurance only:

- Customer may use any number of Running Instances of the server software in any Virtual OSE on the Licensed Server, provided it acquires sufficient Licenses as described below.
- The number of Licenses required equals the number of Virtual Cores in the Virtual OSE, subject to a minimum of four Licenses per Virtual OSE.
- If any Virtual Core is at any time mapped to more than one Hardware Thread, Customer needs a License for each Hardware Thread to which it is mapped.
- Customer may reassign any of its Licenses to any of its Licensed Servers located within the same Server Farm as often as needed. Customer may also reassign these Licenses from one Server Farm to another, but not on a short-term basis (i.e., not within 90 days of the last assignment).

Office Applications

Office Desktop Applications (Windows)

Product Pool	Application
Promotions	None

Platform Independent

Customer may run either the version licensed or a different platform version, provided that the different platform version was available when the original licensed version became available. If the components of a Product suite vary by platform version, Customer may use the components of the suite that it chooses to deploy and only those components; Customer may not mix components across platform versions. SA for a platform independent License permits Customer to use, in place of the licensed Product the most current version of either platform version of the Product that becomes available during the term of coverage.

Office Online Server

Customers purchasing Office Standard 2016 or Office Professional Plus 2016 licenses before August 1, 2016 may use the editing functionality described in Software Assurance Benefits, Office for the web services and Office Online Server section with those licenses. This right expires on August 1, 2019.

Use Rights

Identifies the License Terms for each Software Product, including the Universal License Terms, the applicable License Model, and any Product-Specific License Terms. References in Customer's volume licensing agreement to "Use Rights" refer to the terms included in the Use Rights section of each Software Product Entry.

Use Rights	
License Terms	Universal License Terms for all Software

Office Home & Student 2013 RT Commercial Use Rights

The commercial use restriction for Office Home & Student 2013 RT is waived for:

- The Primary User of a Licensed Device running Office Professional Plus or Standard 2021/2019/2016 or; and
- Office Home & Student 2013 RT installed on a device assigned an Office Professional Plus or Standard 2021/2019/2016 or Office Home & Student 2013 RT Commercial Use license.

Except as provided in this section, the terms provided with the Office Home & Student 2013 RT license will govern.

Desktop Applications

Device License
1. Customer may install any number of copies of the software on a Licensed Device and on any Server for each License it acquires. Any Server that is under the management or control of an entity other than Customer or one of its Affiliates is subject to the Outsourcing Software Management clause.
2. Unless Customer licenses the software as an Enterprise Product or on a company-wide basis, it may also install the software on a single portable device for use by the Primary User of the Licensed Device.
3. Any number of users may use the software running on a Licensed Device, but only one user may access and use the software at a time.
4. Remote use of the software running on a Licensed Device is permitted for the Primary User from any device or for any other user from another Licensed Device.
5. Remote use of the software running on a Server is permitted for any user from a Licensed Device.

Media Elements and Templates
Microsoft grants Customer a license to copy, distribute, perform and display media elements (images, clip art, animations, sounds, music, video clips, templates and other forms of content) included with the software and the Office web apps in projects and documents, except that Customer may not sell, license or distribute copies of any media elements by themselves or as a product if the primary value of the product is the media elements.

Product Conditions - General	
Product Pool	Application
Promotions	None

Platform Independent

Customer may run either the version licensed or a different platform version, provided that the different platform version was available when the original licensed version became available. If the components of a Product suite vary by platform version, then Customer may use the components of the suite that it chooses to deploy and only those components; Customer may not mix components across platform versions. SA for a platform independent License permits Customer to use, in place of the licensed Product the most current version of either platform version of the Product that becomes available during the term of coverage.

Office Online Server

Customers purchasing Office 2016 for Mac Standard licenses before August 1, 2016 may use the editing functionality described in the Office for the web section of Appendix B with those licenses. This right expires on August 1, 2019.

Use Rights

Identifies the License Terms for each Software Product, including the Universal License Terms, the applicable License Model, and any Product-Specific License Terms. SQL Server 2022 Standard	11/22	
SQL Server 2022 Standard Core (2-packs of Core Licenses)	11/22	
SQL Server ESU (Standard and Enterprise, Server and Core)		

Note: SQL Server subscription licenses purchased through CSP are subject to different terms as set forth in the Server Subscriptions for Azure.

Product Conditions:

Provides additional information related to acquiring the Product, such as prerequisites for purchase, prior versions, and the applicable Product Pool.

Product Conditions - General	
Prior Version	SQL Server 2019 (11/19)
Product Pool	Server - All editions
Promotions	None

SQL Server Enterprise (Server/CAL)

Existing SQL Server Enterprise (Server/CAL) customers may renew their SA on Server Licenses acquired under that License Model, however new Server Licenses for SQL Server Enterprise (Server/CAL) are no longer available. Existing SA customers upgrading to a new version should refer to the November 2019 Product Terms for SQL Server Enterprise (Server/CAL) License Terms.

SQL Server Parallel Data Warehouse

SQL Server Parallel Data Warehouse is a deployment option for SQL Server Enterprise Core customers. Customers are eligible to use only the software builds made available during the term of their SA coverage.

Use Rights

Identifies the License Terms for each Software Product, including the Universal License Terms, the applicable License Model, and any Product-Specific License Terms. References in Customer's volume licensing agreement to "Use Rights" refer to the terms included in the Use Rights section of each Software Product Entry.

Use Rights	
License Terms	Universal License Terms for all Software
Down Editions	Enterprise Core to Standard, Business Intelligence, Workgroup or Small Business or 2008 R2 Datacenter; Standard to Workgroup or Small Business
External User Access Requirements	CALs (Server/CAL editions only)
Included Technologies	Windows Software Components
Notices	Internet-based Features - refer to Notices

Automatic Updates to Previous Versions of SQL Server

If the SQL Server software is installed on Servers or devices running any supported editions of SQL Server prior to SQL Server 2012 (or components of any of them) this software will automatically update and replace certain files or features within those editions with files from this software. This feature cannot be switched off. Removal of these files may cause errors in the software and the original files may not be recoverable. By installing this software on a Server or device that is running such editions you consent to these updates in all such editions and copies of SQL Server (including components of any of them) running on that Server or device.

SQL Server Platform Selection

SQL Server Licenses are platform agnostic and permit deployment and use on Windows or Linux platforms.

Running Instances for Standard Edition

For each Server License, software may be run in only one Physical OSE or Virtual OSE at a time, but Customer may use any number of Running Instances of the server software in that OSE.

Distributed Availability Groups Use Limitations for Standard Edition

Customer may use Distributed Availability Groups on SQL Server Standard Edition to establish database replication with Azure resources only.

Fail-Over Servers for Parallel Data Warehouse (PDW)

The PDW Appliance is a single unit made up of two or more compute nodes (Licensed Servers) all controlled by a single PDW control virtual machine (Virtual OSE). Technology is built in to the appliance which allows the software to fail-over to another compute node on the appliance. Customer does not need additional Licenses for the software running in fail-over OSEs as executed by the PDW Appliance technology.

Use of SQL Server with Container Technology

For purposes of licensing use of SQL Server software running within a container on a container runtime such as docker, cri-o, or containerd, (i) a container is considered to be a Virtual OSE, and (ii) the Physical or Virtual Cores available to that container are considered to be Hardware Threads. Customer's use is subject to the Per Core License Model or Server/CAL License Model and any other License Terms relevant to the SQL Server Licenses Customer has appropriately assigned to the Licensed Server in connection with that use.

Data Collection

The Data Protection Addendum applies to the Product, except (1) the DPA's statement of compliance with ISO 27001, ISO 27002, and ISO 27018 does not apply, and (2) use of all data processed by Internet-based Features is governed by the Microsoft Privacy Statement (aka.ms/privacy) and not the DPA, unless other terms accompany such Internet-based Features.

Additional Software

Additional Software - all editions (except Parrallel Data Warehouse)		
Client Quality Connectivity	Client Tools Backwards Compatibility	Client Tools Connectivity
Client Tools SDK	Data Quality Client	Distributed Replay Client
Documentation Components	Management Tools - Basic	Management Tools - Complete
Reporting Services Add-in for SharePoint Products	SQL Client Connectivity SDK	

Additional Software - Parallel Data Warehouse
Parallel Data Warehouse Control Virtual Machine

License Model

Per Core

For Products under the Per Core License Model, Customer must choose either Licensing by Physical Core on a Server or Licensing by Individual Virtual OSE. The terms for each are set forth below.

Server Licenses (per core) - Licensing by Physical Core on a Server

1. Customer may use the server software on a Licensed Server, provided it acquires sufficient Server Licenses as described below.
2. The number of Licenses required equals the number of Physical Cores on the Licensed Server subject to a minimum of four Licenses per Physical Processor.
3. For Enterprise edition, Customer may use any number of Running Instances of the server software on the Licensed Server in a number of Physical OSEs and/or Virtual OSEs equal to the number of licenses assigned to it.
4. For each additional Enterprise edition License that Customer assigns beyond the number of Licenses required under paragraph 2 above, it may use the server software in one additional OSE on the Licensed Server.
5. For other editions, Customer may use any number of Running Instances of the server software only in the Physical OSE on the Licensed Server.

Server Licenses (per core) - Licensing by Individual Virtual OSE

Available for subscription licenses or licenses with active Software Assurance only:

- Customer may use any number of Running Instances of the server software in any Virtual OSE on the Licensed Server, provided it acquires sufficient Licenses as described below.
- The number of Licenses required equals the number of Virtual Cores in the Virtual OSE, subject to a minimum of four Licenses per Virtual OSE.
- If any Virtual Core is at any time mapped to more than one Hardware Thread, Customer needs a License for each Hardware Thread to which it is mapped.
- Customer may reassign any of its Licenses to any of its Licensed Servers located within the same Server Farm as often as needed. Customer may also reassign these Licenses from one Server Farm to another, but not on a short-term basis (i.e., not within 90 days of the last assignment).

Server/CAL

Server Licenses (per Instance)

For Products under the Server/CAL License Model, customer may use one Running Instance of server software in either a Physical OSE or Virtual OSE on a Licensed Server for each License it acquires.

Subscription licenses or licenses with active Software Assurance only. All CALs used to access the software under this model must also be acquired as subscription licenses or have active Software Assurance: When licensing by Virtual OSE, Customer may reassign any of its Licenses to any of its Licensed Servers located within the same Server Farm as often as needed. Customer may also reassign these Licenses from one Server Farm to another, but not on a short-term basis (i.e., not within 90 days of the last assignment).

Access Licenses

1. Except as described here and noted in the Product-Specific License Terms, all server software access requires CALs or CAL Equivalent Licenses.
2. CALs are not required for access by another Licensed Server.

Access Licenses

Client access licenses may be assigned by user or device, as appropriate. A user CAL allows access to corresponding version of the server software or earlier versions of the server software from any device by one user. A device CAL allows access to corresponding

versions of the server software or earlier versions of the server software from one device by any user. CALs allow access to server software running on Customer's Licensed Servers only.

License Assignment for Windows Desktop Operating System Licenses

Per User License Assignment Eligibility (Excluding Virtual Desktop Access)

The Licensed User must be the Primary User of at least one device licensed with a Qualifying OS. This one device must also be the Primary User's primary work device.

Per Device License Assignment Eligibility (Excluding Virtual Desktop Access)

The Licensed Device must be licensed with a Qualifying OS, and the Qualifying OS must be installed on the Licensed Device. Per Device license assignment is permanent unless Customer has Software Assurance for that device.

Virtual Desktop Access (VDA) License Assignment Eligibility

VDA Per Device and Per User licenses may be assigned to any user or device.

Qualifying Operating Systems

Windows software acquired through a volume licensing agreement may only be installed or activated on devices licensed to run one of the qualifying operating systems (OS) below.

Qualifying OS for Per User Licenses and Virtual Desktop Access Per Device/User Licenses

Qualifying Operating Systems	Enterprise Agreement, Microsoft Products and Services Agreement, Select, Select Plus, Open Value	Microsoft Cloud Agreement and Microsoft Customer Agreement
Windows 10/11		
Enterprise, IoT Enterprise, Pro, Pro for Workstations	X	X
Education, Home		X (Academic licenses only)
Windows 8/8.1 [1]		
Enterprise, Pro, Windows Embedded 8/8.1 Pro/Industry Pro	X	

[1] Windows 7 Operating Systems covered by an Extended Security Update (ESU) license are Qualifying Operating Systems during the device's active ESU coverage period. Windows 7 Enterprise, Professional, Ultimate and Professional/Ultimate for Embedded Systems editions are equivalent to Windows 8 Pro edition eligibility.

Qualifying OS - Per Device Licenses (Excluding Virtual Desktop Access Licenses)

Unless Customer has Software Assurance for the device, Customer must remove the Qualifying OS from the device before installing Windows software acquired through a volume licensing agreement on a Licensed Device.

Qualifying Operating Systems	New Enterprise Agreement (EA)/Open Value Company Wide (OV-OW) [1]	Existing Enterprise Agreement (EA)/Open Value Company Wide (OV-OW)	Microsoft Products and Services Agreement (MPSA)/Select Plus/Open	Microsoft Cloud Agreement and Microsoft Customer Agreement	Academic and Charity
Windows 10/11					
Enterprise, Pro, Pro for Workstations	X	X	X	X	X
Education, Home				X (Academic licenses only)	X
Windows 8/8.1 [2]					
Enterprise, Pro	X	X	X		X
Windows 8/8.1					X
Apple					
macOS [3]	X		X		X
Windows Embedded Operating Systems					
Windows 10/11 IoT Enterprise	X	X	X	X	X
Windows 2000 Professional for Embedded Systems	X		X		X
Windows XP Professional for Embedded Systems	X		X		X
Windows Vista Business/Ultimate for Embedded Systems	X		X		X
Windows 7 Professional/Ultimate for Embedded Systems	X	X	X		X

Qualifying Operating Systems	New Enterprise Agreement (EA)/Open Value Company Wide (OV-OW) [1]	Existing Enterprise Agreement (EA)/Open Value Company Wide (OV-OW)	Microsoft Products and Services Agreement (MPSA)/Select Plus/Open	Microsoft Cloud Agreement and Microsoft Customer Agreement	Academic and Charity
Windows Embedded 8/8.1 Pro/Industry Pro	X	X	X		X

[1] Also applicable to Qualified Devices acquired through merger or acquisition.

[2] Windows 7 Operating Systems covered by an Extended Security Update (ESU) license are Qualifying Operating Systems during the device's active ESU coverage period. Windows 7 Enterprise, Professional, and Ultimate editions are equivalent to Windows 8 Pro edition eligibility. Windows 7 Home Premium, Home Basic, and Starter Edition editions are equivalent to Windows 8 edition eligibility.

[3] macOS must be preinstalled by the authorized manufacturer prior to the initial sale of the device.

Third Party Re-imaging

Before a third party may re-image a Customer's devices, Customer must provide the third party with written documentation showing it has the requisite licenses for the installation.

Purchase Eligibility for Windows 11 Home to Pro Upgrade for Microsoft 365 Business Premium

Customers in Australia, Canada, Iceland, Japan, Mexico, New Zealand, Norway, South Africa, Switzerland, United Kingdom, USA, any country in South America, any country in Central America, or any country in the European Union may license the Windows 11 Home to Pro Upgrade for Microsoft 365 Business Premium in any quantity up to the number of its Microsoft 365 Business Premium subscriptions. Notwithstanding the Qualifying OS license requirements, Customer may install Windows 11 Home to Pro Upgrade for Microsoft 365 Business Premium software on devices licensed with Windows Home version 7 or later.

Automatic Updates

Customer authorizes Microsoft to download and install updates automatically on devices running Windows 10/11 unless they have been configured to prevent automatic updates using supported methods. All updates are licensed under the same terms as the Product to which they apply.

Windows 7 ESU (Extended Security Updates)

Customer may acquire Windows 7 ESU licenses on a per device basis. Devices running a local OSE covered by ESU or accessing virtual OSEs covered by ESU must be licensed with Windows 7 ESU for the respective year of coverage. Devices do not need an ESU license to access Windows 7 OSEs covered by ESU running on Azure Virtual Desktop. If Customer has one or more ESU licenses, devices do not need an ESU license to run or access Windows 7 OSEs covered by ESU when the OSE is licensed through a Visual Studio Subscription for development or test purposes. Windows 7 ESU 2020/2021/2022 for M365 licenses may only be assigned to devices with active Software Assurance or used exclusively by users with Windows Enterprise, VDA, or M365 SLs (that include Windows Enterprise). Windows 7 ESU 2020/2021/2022 licenses may be assigned to any device. Windows 7 ESU 2021 & 2022 and Windows 7 ESU 2021 & 2022 for M365 licenses may only be assigned to devices also licensed with ESU(s) for the prior year(s).

Windows 10 IoT Enterprise LTSC 2021

Windows 10 IoT Enterprise LTSC 2021 Licenses may not be used on a General Purpose PC or as a commercially viable substitute for such a system. A "General Purpose PC" means a device used for consumer or business tasks or processes such as email, word processing, spreadsheets, database, network/Internet browsing, scheduling, and personal finance.

Academic and Charity Programs

License Assignment

Per User License Assignment

The Licensed User must be the Primary User of at least one device that satisfies the Qualifying OS Per Device License requirements.

Per Device License Assignment

The Licensed Device must satisfy the Qualifying OS Per Device license requirements, and the Qualifying OS must be installed on the Licensed Device. Per Device license assignment is permanent unless Customer has Software Assurance for that device.

Academic Program Windows Edition Rights

Windows Education licenses include rights to install or activate Windows Enterprise in lieu of Windows Education.

Lab and Library Use

Institutions with Windows Education E3/E5, or Windows Education (per device) assigned to all faculty and staff, Education Qualified Users or Knowledge Workers may install Windows Education, Windows Enterprise, or Windows Pro Academic on any open access lab or library within the Institution's Organization. Use of the software is otherwise subject to the License terms for Windows Education. This provision does not apply to User SLs acquired under the Microsoft Cloud Agreement and Microsoft Customer Agreement.

Shared Devices

Institutions with Windows Education E3/E5 assigned to all Knowledge Workers or Education Qualified Users are licensed to run Windows Education, Windows Enterprise, or Windows Pro Academic on any shared device with a qualifying operating system within the Institution's Organization. For the purposes of this subsection, shared device means a device not used by any one person more than 50% of the time during a single work day period, and not assigned to any Primary User as their primary work device. Use of Windows on shared devices does not count as use of an Education Platform Product under the Enrollment for Education Solutions. Use of the software is otherwise subject to the License terms for Windows Education.

Graduation Benefit

Institutions with an active Agreement may, at any time during the Agreement term, transfer a Student's Windows Education license to such Student when they become a Graduate if the Student installs or activates Windows Education on a Student owned device while enrolled at the institution. Institution must provide each such Graduate with a license agreement in the form provided by Microsoft. Upon the Graduate's acceptance of the terms of the license agreement, the Graduate receives a perpetual right to run Windows Education locally on the same device. This entitlement is nontransferable to any other device.

Get Genuine Windows Licenses

- Customers may acquire Get Genuine Windows (also known as "GGWA") licenses for the full version of the Windows desktop operating system for devices that require valid Windows licenses. Because Get Genuine Windows licenses are full licenses for Windows, they do not have a Qualifying OS requirement.
- Get Genuine Windows licenses are available only as a one-time purchase per Customer, where all units must be placed under a single order. Get Genuine Windows licenses may not be assigned to devices without a Qualifying OS if such devices are obtained after the Customer's order.

Universal Print Volume Add-on Prerequisites

License	License Prerequisites
Universal Print Volume Add-on	Microsoft 365 A3/A5/E3/E5/F3; Microsoft 365 Business Premium; Windows 11 Education A3/A5; Windows 11 Enterprise E3/E5; Universal Print

Use Rights

Identifies the License Terms for each Software Product, including the Universal License Terms, the applicable License Model, and any Product-Specific License Terms. References in Customer's volume licensing agreement to "Use Rights" refer to the terms included in the Use Rights section of each Software Product Entry.

Use Rights	
License Terms	Universal License Terms for all Software (see Additional License Terms for Online Services section below)
Down Editions	Enterprise to Pro
External User Access Requirements	None
Included Technologies	None
Notices	H.264 and/or VC-1, H.265/HEVC - refer to Notices

Additional License Terms for Online Services

Certain Windows software licenses include some Online Services which are governed by the Universal License Terms for Online Services, including but not limited to, Microsoft Defender for Endpoint, Windows Autopatch, Windows Update for Business Reports, and Windows Update for Business deployment service.

Windows diagnostic data processor configuration

For Windows 10/11 Enterprise, Pro, and Education editions that support a Windows diagnostic data processor configuration, Microsoft is the processor for Windows diagnostic data collected from a device where such configuration is set. This configuration is set by joining a Microsoft Entra ID account to the device and taking any other necessary steps described in the Product documentation (www.aka.ms/wddprocessor). Except as provided above, Microsoft will continue to be a controller of Personal Data processed in connection with your use of Windows, including data processed by Microsoft in connection with Customer's use of service-based capabilities. When Microsoft is a controller, Microsoft will handle the Personal Data in accordance with the Microsoft Privacy Statement (www.aka.ms/privacy), and the Data Protection Addendum (www.aka.ms/DPA) terms do not apply.

Windows Local Use

Customer may run Windows software acquired through a volume licensing agreement as one Physical OSE locally on Licensed Devices. This local use right applies to VDA per device licenses only if the Licensed Device is also licensed with a Qualifying Operating System. Licensed Users may run Windows software acquired through a volume licensing agreement as one Physical OSE locally on devices licensed with a Qualifying Operating System.

Microsoft Entra ID Based Activation for Windows

Licensed Users using Microsoft Entra ID-based activation may activate the software in the Physical OSE on up to five concurrent devices running either Windows 10 Pro Anniversary Update or Windows 10 Enterprise Creator's Update or a later version.

Microsoft Defender for Endpoint

Eligible Licensed Users may use Microsoft Defender for Endpoint on up to five concurrent devices.

Windows Apps

Unless other terms are displayed to Customer or presented in the app's settings, Customer agrees the services that it accesses from the Windows app is governed by the Microsoft Services Agreement at http://go.microsoft.com/fwlink/?linkid=246338 or for Windows apps that access Xbox services, the Xbox.com terms of use at http://xbox.com/legal/livetou.

Microsoft Customer Agreement Activation Use Rights

For Customers licensed under a Microsoft Cloud Agreement or Microsoft Customer Agreement,

- Notwithstanding Microsoft Entra ID-Based Activation for Windows and Windows 11 Upgrade Benefit requirements, each user may activate no more than five concurrent instances of the software across physical and virtual OSEs.
- For subscription licenses only, notwithstanding the Universal License Terms for all Software or volume licensing agreement, upgrade subscription licenses do not include rights to run or install a prior version, different language version, different platform version, or a lower edition of Windows, including Windows Enterprise LTSC. Users may, however, apply their edition upgrades to Windows 10 devices without updating to Windows 11 if they choose.
- Software Assurance Benefits do not apply.

Windows 11 Upgrade Benefit

The following User SLs include a Windows 11 upgrade benefit (version upgrade only, edition remains the same) for device(s) licensed with Windows 8, 8.1, 10:

- Windows 11 Enterprise/Education (all)
- Microsoft 365 (all that include Windows 11 Enterprise)

Windows 11 Virtualization

Customers with Windows 11 Enterprise Per User SLs (excluding local only), Windows 11 Education Per User SLs, or VDA Per User SLs using Microsoft Entra ID-based activation on supported editions may install the Windows 10 Creators Update or later version software

on a virtual machine running in Customer's Microsoft Azure accounts or a Server (subject to the Outsourcing Software Management clause). Each Licensed User may access up to four instances of the software. Azure Government customers may use KMS activation in lieu of Microsoft Entra ID-based activation. When configuring the image(s) on Microsoft Azure, Customers must indicate their use of the multitenant hosting for Windows and adhere to other software configuration requirements available at https://docs.microsoft.com/windows/deployment/vda-subscription-activation. Notwithstanding anything to the contrary in the Outsourcing Software Management clause, Customer's VDA E3 and E5 Licensed Users may remotely access Windows software under these virtualization rights on any Listed Provider's devices dedicated to Customer's use. This section does not apply to Students receiving access to software through Student Use Benefit.

Azure Virtual Desktop for Windows

Azure Virtual Desktop for Windows
Users licensed with Microsoft 365 E3/E5/G3/G5/F3/Business Premium/A3/A5/Student Use Benefit, Windows Enterprise E3/E5, Windows Education A3/A5, or Windows VDA E3/E5 may access Azure Virtual Desktop Windows virtual machines running in Customer's Microsoft Azure accounts. Azure Virtual Desktop virtual machines do not count against a user's device activation count limit.

Azure Virtual Desktop for Development and Test
Users licensed with Visual Studio subscriptions and MSDN Platforms with active SA ("Authorized Users") may access Azure Virtual Desktop Windows, and Windows Server virtual machines running in Customer's Microsoft Azure accounts for development and test purposes. Customer's end users may also access Azure Virtual Desktop Windows, and Windows Server virtual machines initiated by Authorized Users to perform acceptance tests or provide feedback.

Azure Virtual Desktop Per User Access Operating System

Universal Terms. The following Universal License Terms for all Software do not apply to the Azure Virtual Desktop per user access operating system software: Rights to Use Other Versions and Lower Editions; Software Assurance; Outsourcing Software Management.

Windows 365 Operating System

Universal Terms. The following Universal License Terms for all Software do not apply to the Windows 365 operating system software: Rights to Use Other Versions and Lower Editions; Software Assurance; Outsourcing Software Management.

License Model

Desktop Operating Systems

Device License
1. Customer may install one copy of the software on a Licensed Device or within a local virtual hardware system on a Licensed Device for each License it acquires.
2. Customer may use the software on up to two processors.
3. Local use is permitted for any user.
4. Remote use is permitted for the Primary User of the Licensed Device and for any other user from another Licensed Device or a Windows VDA Licensed Device.
5. Only one user may access and use the software at a time.
6. Customer may connect up to 20 devices to the Licensed Device for file sharing, printing, Internet Information Services, Internet Connection Sharing or telephony services.
7. An unlimited number of connections are allowed for KMS activation or similar technology.

Adobe Flash Player
The software may include a version of Adobe Flash Player. Customer agrees that its use of the Adobe Flash Player is governed by the license terms for Adobe Systems Incorporated at http://go.microsoft.com/fwlink/?linkid=248532. Adobe and Flash are either registered trademarks or trademarks of Adobe Systems Incorporated in the United States and/or other countries.

Add-ons

Customer may acquire Add-ons subject to the following conditions:
1. Customer must have active SA or an active User SL for the corresponding Qualifying Licenses
2. Customer may acquire one Add-on SL for each Qualifying License(s), unless provided otherwise in these terms
3. Customer may acquire add-on SLs between true-up dates in advance of the acquisition of the Qualifying Licenses

Add-ons expire upon the earlier of the expiration of the SA coverage for the Qualifying License or the Add-on SL term, unless provided otherwise in these terms. Add-ons may only be reassigned to users or devices with Qualifying Licenses.

Qualifying License(s)	Add-on User Subscription License(s)
Core CAL Suite	
Enterprise CAL Suite	
Core CAL Suite Bridge for Office 365	Enterprise Mobility + Security (E3/A3 and E5/A5) Add-on
Core CAL Suite Bridge for Office 365 and Microsoft Intune	
Enterprise CAL Suite Bridge for Office 365

Product Categories

This table highlights which Azure products fall under the categories of Microsoft Azure User Plans, Microsoft Azure Support Plans, and Microsoft Azure Services:

Product Category	Product
Microsoft Azure User Plans	Microsoft Entra ID Plan 1 & 2 (User SL), Azure Information Protection Premium Plan 1 (User SL), Azure Information Protection Premium Plan 1 Add-on (User SL), Microsoft Defender for Identity (User SL), Microsoft Defender for Identity Client Management License Add-on (User SL)
Microsoft Azure Support Plans	Azure Active Professional Direct Support, Azure Active Standard Support, Microsoft Azure StorSimple Premium & Standard Support, Microsoft Azure StorSimple Standard Support to Premium Support
Microsoft Azure Services	Azure SQL Edge (per Device), Microsoft Translator API, Microsoft Azure Services

Microsoft Azure Services Plans

If subscribed to by Customer as a Microsoft Azure Services Plan, individual Microsoft Azure Services may have different program availability or be subject to different terms. Other than Azure Stack Hub, Services purchased as a Microsoft Azure Services Plan are not eligible for the Azure Customer Solution clause in the General Service Terms for Azure.

Subscription Term

Azure is licensed on a subscription basis for a fixed term. Usage is metered, and charges are applied periodically based on usage. Some subscriptions require prepayment or an upfront commitment and others are billed after the services are used ("pay-as-you-go"). Pay-as-you-go subscriptions automatically renew after each billing period unless cancelled before the end of the billing period. For plans that require an upfront commitment (such as Azure reservations), the term of the subscription is the same as the commitment period. At the end of the term, such subscriptions will renew automatically on a pay-as-you go basis unless the commitment is expressly renewed or the subscription is cancelled before the end of the term.

The table below highlights the subscription terms for the options to purchase Microsoft Azure Services that a customer is eligible for:

Options	Subscription Term
Azure prepayment	Subscription term is the same as the Azure prepayment commitment term.
Consumption	Subscription term is the same as the billing period.
Microsoft Azure Services Plan	Subscription term is the same as the billing period.
Azure reservations	Subscription term is the same as the Azure reservation commitment term.
Azure Spot	Subscription term is the same as the billing period.
Azure compute savings plan	Subscription term is the same as the Azure compute savings plan term.

Purchasing Microsoft Azure Services

Microsoft Azure Services may be purchased in one or a combination of the following ways:

Azure prepayment: Customer will have access to its entire Azure prepayment throughout the term of its Agreement if Customer agrees to be invoiced for the full amount upfront (the "Fully Prepaid Option"). Alternatively, if Customer elects to be invoiced for its Azure prepayment on an annual basis, Customer will have access to an Allocated Annual prepayment each year of the Agreement (the "Annually Prepaid Option"). Under the Fully Prepaid Option, any unused Azure prepayment will be forfeited at the end of the Agreement, and under the Annually Prepaid Option, any unused Allocated Annual prepayment will be forfeited on the following Agreement anniversary date. Customer may contact Microsoft or Customer's reseller about increasing its Azure prepayment or reducing its Allocated Annual prepayment for any future Agreement anniversary. Customer's reseller (if any) must process reductions with Microsoft prior to the next anniversary.

Consumption: Customer pays based on the amount of Microsoft Azure Services consumed during a billing period. Certain features of the Microsoft Azure Services may only be available for purchase on a consumption basis.

Microsoft Azure Services Plan: Customer may be able to subscribe to a Microsoft Azure Service as a Microsoft Azure Services Plan.

Azure reservations: Azure reservations are purchased for specified terms of up to three years with either a single upfront payment or equal monthly payments (when available). Azure reservations expire at the end of the specified term. Customer will not be refunded payment (paid or scheduled) for unused Azure reservations. Using Azure commitment tiers, Customers pay upfront monthly for connected containers and Azure usage. Overage will be invoiced when usage exceeds the commitment tier limit. For disconnected containers, Azure commitment tier payments are made upfront yearly, except for disconnected container proof of concept (POC) SKUs, which have a one month prorated price. Customers can renew the POC license automatically up to two times, allowing for three months of total usage of a POC SKU.

Azure compute savings plan: Azure compute savings plan is purchased for specified terms of up to three years with either a single upfront payment or equal monthly payments (when available). Azure compute savings plan expires at the end of the specified term. Customer will not be refunded payment (paid or scheduled) for unused Azure compute savings plan. Azure compute savings plans are noncancellable. Customer will owe the amount charged for the plan for the duration of the selected term, even if the Agreement is terminated. Notwithstanding the terms in Customer's volume licensing agreement, fixed pricing does not apply to Azure compute savings plan.

Pricing

Microsoft may offer lower prices to Customer (or Customer's reseller) for individual Microsoft Azure Services during Customer's Agreement term on a permanent or temporary (promotional) basis.

Azure reservations: Notwithstanding the terms in Customer's volume licensing agreement, fixed pricing does not apply to Azure reservations. Azure reservation pricing will be based on the available pricing at the time of each purchase.

Azure Spot: Notwithstanding the terms in Customer's volume licensing agreement, fixed pricing does not apply to Azure Spot virtual machines. Azure Spot pricing is demand-based. The available pricing at the time of each purchase is subject to change at any time. Customer can refer to the Azure portal for pricing adjustments. Customer's access to a given Azure Spot virtual machine is temporary and may be interrupted at any time. Customer may elect to be notified immediately prior to workload interruption.

Azure Communication Services: Notwithstanding the terms in the Customer's volume licensing agreement, fixed pricing does not apply to Azure Communication Services ("ACS"). ACS pricing is market-based. The available pricing at the time of each purchase is subject to change at any time. Customer can refer to the Azure portal for pricing adjustments.

Payment and Fees

This table highlights which Azure Product categories are eligible for the Payment and Fees options below. Please reference the Product Category table above for eligible products.

Payment and Fees options	Eligible Products*
1. Using Azure prepayment	Microsoft Azure Services
2. Invoicing Azure prepayment	Microsoft Azure Services
3. Invoicing Azure prepayment overage	Microsoft Azure Services
4. Consumption Invoicing	Microsoft Azure Services
5. Azure Services Plan Invoice	Microsoft Azure Support Plans, Microsoft Azure User Plans
6. Azure reservations	Microsoft Azure Services
7. Azure compute savings plan	Microsoft Azure Services

*Some Products may not be eligible for certain Payment and Fees scenarios. Please refer to the Azure Portal or Pricing Calculator (https://azure.microsoft.com/pricing/calculator/) for more information on availability.

- **Using Azure prepayment**: Each month, Microsoft will deduct from Customer's Azure prepayment (or Allocated Annual prepayment, if applicable) the monetary value of Customer's usage of eligible Microsoft Azure Services. Once Customer's Azure prepayment (or Allocated Annual prepayment, if applicable) balance has been exhausted, any additional usage will be invoiced at Consumption Rates (as described below).
- **Invoicing Azure prepayment:** If Customer elects the Fully Prepaid Option, Azure prepayment will be invoiced immediately. If Customers elects the Annually Prepaid Option, the first Allocated Annual prepayment will be invoiced immediately, and future Allocated Annual prepayments will be invoiced on the anniversary of the Agreement effective date.
- **Invoicing Azure prepayment overage**: If Customer's usage is higher than either its Azure prepayment under the Fully Prepaid Option or its Allocated Annual prepayment under the Annually Prepaid Option, such excess will be invoiced at Consumption Rates to Customer (or its reseller) at the end of each Agreement month.
- **Consumption invoicing**: If Customer provisions Microsoft Azure Services without a Azure prepayment, it (or its reseller) will be invoiced monthly at Consumption Rates. All usage of the Microsoft Azure Services after the expiration or termination of Customer's subscription term will be invoiced to Customer (or its reseller) at then-current Consumption Rates on a monthly basis.
- **Azure Services Plan invoice**: The purchase of a Microsoft Azure Services Plan will be invoiced to Customer (or its reseller) either on an upfront or annual basis, according to the terms of Customer's volume licensing agreement governing payment terms for the order of Online Services generally. Azure prepayment cannot be applied to the purchase of a Microsoft Azure Services Plan; provided, however, that if a Microsoft Azure Services Plan includes the purchase of an initial quantity of a service ("Initial Quantity"), Customer usage that exceeds the Initial Quantity will be billed at Consumption Rates, and Customer's Azure prepayment can be applied to such usage.
- **Azure reservations**: The purchase of Azure reservations will be deducted automatically from any available Azure prepayment. If Customer has used all of its Azure prepayment or if the cost of Azure reservations exceeds the available Azure prepayment balance at the time of purchase, the excess will be invoiced as otherwise provided in this "Payment and Fees" section. Azure reservations Customer purchases via Azure.com will be charged against its credit card on file for the full upfront payment, or the charge will appear on its next invoice. Azure reserved instances for a virtual machine or Azure SQL Database services cover compute only (the base rate) and do not include the cost of the software (e.g., Windows Server or SQL Server), storage or back-up. Conversely, Azure reserved instances for software do not include the cost of compute.
- **Azure compute savings plan**: The purchase of Azure compute savings plan will be deducted automatically from any available Azure prepayment. If Customer has used all of its Azure prepayment or if the cost of Azure compute savings plan exceeds the available Azure prepayment balance at the time of purchase, the excess will be invoiced as otherwise provided in this "Payment and Fees" section. Azure compute savings plan Customer purchases via Azure.com will be charged against its credit card on file for the full upfront payment, or the charge will appear on its next invoice. Azure compute savings plan covers compute only (the base rate) and does not include the cost of the software (e.g., Windows Server or SQL Server), storage or back-up.

Five Year Reservations for Azure VMs

As an exception to the general terms for Azure reservations, we offer five year Azure reservation terms for select VM families. The early termination fee for a five-year Azure reservation is 35%. Microsoft reserves the right during a five-year Azure reservation to move Customer to a newer version of the HB series for reasons including, but not limited to, unavailability of parts for maintenance or lack of support from the hardware vendor. In such cases, the new version and hardware configuration will provide at least the same level of performance.

Azure Reservation Options

The following options apply to Azure reservations Customer has purchased.

1. **Exchange**: is an option that allows Customer to apply the monetary value of a remaining Azure reservation term to the purchase of one or more new Azure reservations of equal or greater monetary value for the same service.
2. **Cancel**: is an option that allows Customer to receive a prorated refund based on a remaining Azure reservation term minus an early termination fee (currently 12 percent) and subject to a cancellation limit set by Microsoft (currently $50,000 per year).

Windows Server Datacenter: Azure Edition

Use Restriction
Customer may use Windows Server Datacenter: Azure Edition only as an operating system for virtualization on Microsoft Azure and Azure Stack.

Azure Hybrid Benefit

Microsoft Azure Hybrid Benefit for Windows Server
Customer may use the Microsoft Azure Hybrid Benefit in its own Microsoft Azure account. Customer may use Standard or Datacenter software. The following Windows Server licenses with an active subscription or Software Assurance are eligible for the Microsoft Azure Hybrid Benefit:

- Windows Server Standard/Datacenter core licenses
- Windows Server Standard/Datacenter processor licenses
  - Each processor license is equivalent to 16 core licenses.

License Allocation for VM Licensing

- Customer must allocate enough eligible core licenses to cover all Virtual Cores on the VM(s) that are running.
- The minimum number of core licenses required per VM is 8.

License Allocation for Dedicated Host Licensing (Datacenter only)

- Customer must allocate enough Windows Server Datacenter core licenses to cover all Physical Cores available to Customer on a Dedicated Host or an Azure Stack HCI Cluster. Azure Hybrid Benefit for Azure Stack HCI is available for EA or CSP customers only.
- Customer may run unlimited Virtual Machines on that host/cluster.

Azure Migration Allowance

Aside from the migration allowances below, once licenses are allocated to Azure, Customer may not use them anywhere else. After at least 90 days have passed, Customer may elect to stop using them for the Azure Hybrid Benefit.
- **VM Licensing**
  - Windows Server Standard: When migrating workloads to Azure, Customer may also continue to use its licensed software on devices for a period of 180 days from when the licenses are allocated to Azure.
  - Windows Server Datacenter: When migrating workloads to Azure, Customer may also continue to use its licensed software on devices indefinitely.
- **Dedicated Host Licensing**
  - When migrating workloads to Azure, Customer may also continue to use its licensed software on devices for a period of 180 days from when the licenses are allocated to Azure.

Microsoft Azure Hybrid Benefit for SQL Server
Customer may use the Microsoft Azure Hybrid Benefit in its own Microsoft Azure account. The Qualified Licenses in the table below may be used for the Microsoft Azure Data Service in the specified ratios.

Qualified License	Microsoft Azure Data Service[1]	Ratio of Qualified Licenses to Azure vCores
SQL Server Enterprise (Core)	Azure Arc-enabled SQL Managed Instance - General Purpose	1 Core License:4 vCores
	Azure Arc-enabled SQL Managed Instance - Business Critical	1 Core License:1 vCore
	Azure SQL Database (Elastic Pool and Single Database)/Azure SQL Managed Instance - General Purpose	1 Core License:4 vCores

Qualified License	Microsoft Azure Data Service[1]	Ratio of Qualified Licenses to Azure vCores
	Azure SQL Database (Elastic Pool and Single Database)/Azure SQL Managed Instance - Business Critical	1 Core License:1 vCore
	Azure SQL Database (Single Database)/Azure SQL Managed Instance - Hyperscale	1 Core License:4 vCores
	Azure Data Factory SQL Server Integration Services (Enterprise)	1 Core License:1 vCore
	Azure Data Factory SQL Server Integration Services (Standard)	1 Core License:4 vCores
	SQL Server Enterprise Virtual Machines	1 Core License[2]:1 vCPU
	SQL Server Standard Virtual Machines	1 Core License:4 vCPUs
SQL Server Standard (Core)	Azure Arc-enabled SQL Managed Instance - General Purpose	1 Core License:1 vCore
	Azure Arc-enabled SQL Managed Instance - Business Critical	4 Core Licenses:1 vCore
	Azure SQL Database (Elastic Pool and Single Database)/Azure SQL Managed Instance - General Purpose	1 Core License:1 vCore
	Azure SQL Database (Elastic Pool and Single Database)/Azure SQL Managed Instance - Business Critical	4 Core Licenses:1 vCore
	Azure SQL Database (Single Database)/Azure SQL Managed Instance - Hyperscale	1 Core License:1 vCore
	Azure Data Factory SQL Server Integration Services (Standard)	1 Core License: 1 vCore
	Azure Data Factory SQL Server Integration Services (Enterprise)	4 Core Licenses:1 vCore
	SQL Server Standard Virtual Machines	1 Core License[2]:1 vCPU
	SQL Server Enterprise Virtual Machines	4 Core Licenses[2]:1 vCPU

[1]*Azure Hybrid Benefit is not available in the serverless compute tier of Azure SQL Database.*

[2]*Subject to a minimum of four Core Licenses per Virtual Machine.*

Azure Migration Allowance

Aside from the migration allowance below, once licenses are allocated to Azure, Customer may not use them anywhere else. After at least 90 days have passed, Customer may elect to stop using them for the Azure Hybrid Benefit.
- When migrating workloads to Azure, Customer may also continue to use its licensed software on devices for a period of 180 days from when the licenses are allocated to Azure.

Fail-over Rights for SQL Server Standard/Enterprise Virtual Machines

When allocating SQL Server Licenses for use under the Azure Hybrid Benefit for SQL Server, Customer is entitled to the respective fail-over rights for the Azure service in use (see Service Specific Terms below).

SQL Server Enterprise Core Unlimited Virtualization Rights

Customer may alternatively allocate enough SQL Server Enterprise core licenses to cover all Physical Cores available to Customer on an Azure Dedicated Host and run unlimited Virtual Machines on that host.

Limited Hosting Rights for Azure Arc-enabled SQL Managed Instance

When using the Azure Hybrid Benefit, paragraph 3 of the Service Specific terms for Azure Arc-enabled SQL Managed Instance does not apply. Customer is entitled only to run its Azure Arc-enabled SQL Managed Instance containers on Microsoft Azure, its own Servers, or Servers under the day-to-day management and control of Authorized Outsourcers, regardless of whether those Servers are dedicated to Customer or not.

Azure Virtual Desktop

Azure Virtual Desktop Conditions
The Azure Virtual Desktop control plane may only be used to manage Azure Virtual Desktop VMs running on Azure. Windows Enterprise multi-session is limited for use on Azure Virtual Desktop VMs running on Azure only.

Azure Virtual Desktop for Windows

Users licensed with Microsoft 365 E3/E5/G3/G5/F3/Business Premium/A3/A5/Student Use Benefit, Windows Enterprise E3/E5, Windows Education A3/A5, or Windows VDA E3/E5 may access Azure Virtual Desktop Windows virtual machines running in Customer's Microsoft Azure accounts. Azure Virtual Desktop virtual machines do not count against a user's device activation count limit.

Azure Virtual Desktop for Windows Server

Users licensed with RDS User CALs with SA or RDS User Subscription Licenses or using devices licensed with RDS Device CALs with SA may access Azure Virtual Desktop Windows Server virtual machines running in Customer's Microsoft Azure accounts.

Azure Virtual Desktop for Development and Test

Users licensed with Visual Studio subscriptions and MSDN Platforms with active SA ("Authorized Users") may access Azure Virtual Desktop Windows, and Windows Server virtual machines running in Customer's Microsoft Azure accounts for development and test purposes. Customer's end users may also access Azure Virtual Desktop Windows, and Windows Server virtual machines initiated by Authorized Users to perform acceptance tests or provide feedback.

Azure Dev/Test Pricing

Customer may be eligible for Azure dev/test pricing for Azure Services accessed by (i) its Qualified Licensed Users solely for development and test purposes, and (ii) its users performing acceptance tests and providing feedback related to those development and test activities. "Qualified Licensed Users" means users allocated Visual Studio subscriptions or MSDN Platform subscriptions with active Software Assurance. See Azure.com (https://azure.microsoft.com/pricing/dev-test/) for eligibility criteria and applicable services.

General Service Terms

Restriction on U.S. Police Department Use of Azure Facial Recognition Services

Customer may not use Azure Facial Recognition Services if Customer is, or is allowing use of such services by or for, a police department in the United States. Violation of any of the restrictions in this section may result in immediate suspension of Customer's use of the service.

Notices

The Bing, Bing Maps, Communication Services, Professional Services, Azure Media Services H.265/HEV Encoding, Adobe Flash Player, H.264/AVC Visual Standard, and VC-1 Video Standard in Notices apply. Any deployment services provided to Customer are subject to the Professional Services terms (refer to Professional Services).

Service Level Agreement

Refer to http://azure.microsoft.com/support/legal/sla/.

Limitations

Customer may not

- resell or redistribute the Microsoft Azure Services, or
- allow multiple users to directly or indirectly access any Microsoft Azure Service feature that is made available on a per user basis (e.g., Active Directory Premium). Specific reassignment terms applicable to a Microsoft Azure Service feature may be provided in supplemental documentation for that feature.

Retirement of Services or Features

Microsoft will provide Customer with 12 months' notice before removing any material feature or functionality or discontinuing a service, unless security, legal or system performance considerations require an expedited removal. This does not apply to Previews.

Data Retention after Expiration or Termination

The expiration or termination of Customer's Online Service subscription will not change Customer's obligation to pay for hosting of Customer Data during any Extended Term.

Azure Customer Solution

Use Rights and Conditions for Use

Customer may create and maintain a Customer Solution. Despite anything to the contrary in Customer's licensing agreement, Customer may permit third parties to access and use the Microsoft Azure Services solely in connection with the use of that Customer Solution.

Customer is responsible for: (1) ensuring that third parties who access, use or distribute the Customer Solution comply with these terms, the terms and conditions of Customer's licensing agreement, and all applicable laws; and (2) obtaining any necessary licenses related to Standards in a Customer Solution. Notwithstanding anything to the contrary in Customer's volume licensing agreement, Microsoft has no defense obligation or liability for any infringement claim for patents alleged to be infringed by the implementation of any Standards in a Customer Solution.

Use of Software within Microsoft Azure

For Microsoft software available within a Microsoft Azure Service, Microsoft grants Customer a limited license to use the software only within the Microsoft Azure Service.

Data Center Availability

Usage of data centers in certain regions may be restricted to Customers located in or near that region. For information on service availability by region, please refer to http://azure.microsoft.com/en-us/regions.

Sharing

The Microsoft Azure Services may provide the ability to share a Customer Solution and/or Customer Data with other Azure users and communities, or other third parties. If Customer chooses to engage in such sharing, Customer agrees that it is giving a license to all authorized users, including the rights to use, modify, and repost its Customer Solution and/or the Customer Data, and Customer is allowing Microsoft to make them available to such users in a manner and location of its choosing.

Marketplace

Microsoft Azure enables Customer to access or purchase products and services which are optimized for use with Azure through features such as the Microsoft Azure Marketplace and the Virtual Machine Gallery, subject to separate terms available at http://azure.microsoft.com/en-us/support/legal/store-terms.

Bing Search Services

By using the Bing Search Services, Customer agrees to be bound by the terms available at https://www.microsoft.com/en-us/bing/apis/legal and https://learn.microsoft.com/en-us/bing/search-apis/bing-web-search/use-display-requirements which may be updated from time to time. Customer must use results it obtains from the Bing Search Services only in Internet Search Experiences (as defined in the use and display requirements) and must not cache or copy results.

Service Specific Terms

Subscription License Suites

In addition to User SLs, refer to Subscription License Suites for other SLs that fulfill requirements for Microsoft Entra ID, Microsoft Defender for Identity, Azure Information Protection, and Microsoft Intune.

Azure AI Content Safety

Acceptable Use

Azure AI Content Safety can apply tags to text, image, and certain multi-modal content enabling customers to filter and remove harmful content. Transmitting harmful content to Azure AI Content Safety through the intended use of the service will not by itself be considered a violation of the Acceptable Use Policy, which otherwise applies. Customer agrees to use the system only to filter out and not to collect harmful content.

Sample Content

If Customer chooses to provide Microsoft with examples of Customer content ("Sample Content") to help Microsoft tailor the service to Customer's requirements as described in the service documentation, Customer agrees (a) that Microsoft will review and use it in accordance with that documentation, and (b) that Customer will abide by any requirements in that documentation, including the requirement not to include personal, confidential, or commercially sensitive information in Sample Content.

API Terms for Security Applications and Compliance Applications

"**Compliance Application**" means a software program or service built exclusively to ensure that an organization is complying with their security-related requirements.

"**Security Application**" means a software program or service built exclusively to protect and defend the information and technology assets of an enterprise.

"**End User**" refers to the end-user of the Security Application or Compliance Application.

"**Customer**" refers to the registered owner of the Azure subscription where the Security Application or Compliance Application is registered with Microsoft Entra ID.

The following terms and conditions apply to a Security Application's or Compliance Application's use of the Microsoft Teams APIs in Microsoft Graph:
- The End User must have one of the following Microsoft 365 E5 eligible licenses: Microsoft 365 E5/A5/G5, Microsoft 365 E5 Compliance, Microsoft 365 E5 Information Protection and Governance, or Microsoft 365 E5 Information Protection & Data Loss Prevention.
- Microsoft will bill Customer for all commercial consumption of API messages that exceed the included monthly seeded allowance per End User tenant. Refer to https://docs.microsoft.com/en-us/graph/teams-licenses to understand and review the seeded allowances and pricing details for the Microsoft Teams APIs.
- Security Applications and Compliance Applications must query the Microsoft Teams APIs with?model=A?query parameter.

The following terms and conditions apply to a non-Security Application or non-Compliance Application use of the **Microsoft Teams APIs in Microsoft Graph:**
- Microsoft will bill Customer for all commercial consumption of API messages, including, but not limited to, use with the following applications:
  - **Backup and Restore**: Applications that allows users to create or restore backups of messages or files and create and restore system images to repair data in the event of data corruption, or data loss.
  - **Sentiment analysis**: Applications that use natural language processing, text analysis, computational linguistics, biometrics, and other techniques to systematically identify, extract, quantify, and study affective states and subjective information.
  - **Analytics and Insights**: Applications offering continuous iterative exploration and investigation of information to gain.
- Applications that do not qualify as a Security Application or Compliance Application must query the Microsoft Teams APIs with model=B?query parameter.

The following terms and conditions apply to **Microsoft Purview eDiscovery APIs in Microsoft Graph**:
- The End User must have one of the following Microsoft 365 E5 eligible licenses: Microsoft 365 E5/A5/G5, Microsoft 365 E5 Compliance, or Microsoft 365 E5 eDiscovery & Audit.
- Microsoft will bill Customer for all commercial consumption of the data generated in the review set that exceeds the included monthly seeded allowance per End User tenant.

These terms and conditions supersede any terms and conditions contained elsewhere, including the Microsoft APIs Terms of Use [https://docs.microsoft.com/en-us/legal/microsoft-apis/terms-of-use].

Microsoft Entra ID Basic

Customer may, using Single Sign-On, pre-integrate unlimited Applications/Custom Applications per User SL. This covers Microsoft as well as third party applications.

Microsoft Entra ID

Customer may, using Single Sign-On, pre-integrate SaaS Applications/Custom Applications. Customer may not copy or distribute any data set (or any portion of a data set) included in the Microsoft Identity Manager software that is included with a Microsoft Entra ID (P1 and P2) User SL.

External User Allowance

For each User SL (or equivalent Subscription License Suite) Customer assigns to a user, Customer may also permit up to five additional External Users to access the corresponding Microsoft Entra ID service level. This option is not available to new customers nor customers using (or who have used) the service under a Monthly Active User count. Only External Users can use the Microsoft Entra ID External Identities pricing based on Monthly Active User count.

Azure Arc-enabled SQL Managed Instance

Use Rights

1. Azure Arc-enabled SQL Managed Instance licenses are not assigned to any given Server and are therefore not subject to the License Assignment and Reassignment clause.
2. Licenses are billed according to the terms of the license meter. Customer must connect to Azure at least once every 30 days via direct connected mode or indirect export mode to report usage data.
3. Notwithstanding the Outsourcing Software Management clause, Customer may run Azure Arc-enabled SQL Managed Instance containers on Microsoft Azure, its own devices, or devices under the day-to-day management and control of third parties.

The terms of the DPA do not apply to processing of data in Azure Arc enabled SQL Managed Instance running in an environment outside of Microsoft's control, except to the extent any Personal Data is collected to enable Azure management services and to meter usage for billing purposes.

Extended Security Updates enabled by Azure Arc

General Requirements

Customer is authorized to apply Extended Security Updates enabled by Azure Arc only to Operating System Environments (OSEs) that:

- Are covered by an active Software Assurance (SA) plan, or
- Have active subscription licenses, or
- Have been acquired as 'License-Included' services through a Service Provider License Agreement (SPLA) partner.

In this context, "License-Included" refers to the scenario where Customer licenses Windows Server or SQL Server directly from a SPLA partner, rather than using their own licenses.

Disaster Recovery and Dev/Test Environments

Customer may apply Extended Security Updates enabled by Azure Arc to the following OSEs for no additional cost:

- Customer's entitled Disaster Recovery OSEs associated with its underlying software licenses.
- Development, test, and related OSEs licensed with Microsoft Developer edition licenses or Visual Studio subscriptions.

SQL Server Requirements

For SQL Server 2012 Year 2 and subsequent versions, Customer is permitted to apply Extended Security Updates enabled by Azure Arc only if the Licensed Server is also covered with a SQL Server 2012 Year 1 Extended Security Updates license.

Use of Updated Software

Customer may continue to use updated software after coverage expires. However, no future updates will be available if ESU subscription is terminated or cancelled.

Azure Communication Gateway

Azure Communications Gateway is only available for use by Telecommunication Service Providers. Notwithstanding anything to the contrary in Customer's volume licensing agreement, Microsoft has no defense obligation or liability for any infringement claim for patents alleged to be infringed by the implementation of any Standards in Azure Communications Gateway. Customer is responsible for obtaining any required licenses directly from the holders of such rights.

Azure Communication Services

Customer Responsibility

Azure Communication Services ("ACS") is a developer product and an input to customers' applications. Customers are solely liable for their applications or offerings that incorporate Azure Communication Services capabilities and services.

Notices

The H.264/AVC Visual Standard notice in Notices section applies.

Recording and Transcription

It is your responsibility to ensure that the users of your application are notified when recording or transcription are enabled in a call or meeting. Microsoft will indicate to you via the Azure Communication Services API that recording or transcription has commenced and you must communicate this fact, in real time, to your users within your application's user interface.

Microsoft Teams Interoperability

Interoperability between Azure Communication Services and Microsoft Teams enables your applications and users to participate in Teams calls, meetings, and chat. In addition to existing charges in Teams for PSTN connectivity, you will be charged consumption fees in Azure Communication Services.

When Teams users join Teams meetings on the Teams clients then the call is covered by your Teams licenses. When a user makes a call using Azure Communication Services or when a Teams user makes a call with ACS calling SDK it will be charged based on Azure Communication Services fees.

License Terms Precedence

Some Azure Communication Services, including private previews and Previews, may be provided under a separate license, such as an open-source license. In the event of a conflict between these terms and any separate license, the separate license will prevail with respect to the Azure Communication Service that is the subject of such separate license. Each party reserves all rights (and no one receives any rights) not expressly granted by the foregoing licenses.

End User Information

Except in instances required by law or regulation, Microsoft does not retain information that identifies individual end users. Customer acknowledges that, should it delete or de-link end user identifying information in its possession, Microsoft shall have no responsibility to reconstitute the information.

Defense of Claims

You agree to defend, hold harmless, and indemnify Microsoft and its directors, officers, employees, affiliates, and agents from and against any and all demands, assertions, and legal proceedings brought by any third party (and all resulting judgments, settlements and expenses (including reasonable attorneys' fees and costs)) arising from a material breach of these terms by you or your subcontractors, agents, employees, or customers. This includes, without limitation, breach of the obligation to comply with applicable telemarketing laws and the U.S. Telephone Consumer Protection Act of 1991.

Messaging Application

ACS SMS and MMS services involve an integration between Microsoft and the underlying carrier, aggregator, or operator ("Operator"). Microsoft must share application details and/or campaign information with the Operator to ensure that the program meets regulatory guidelines and standards set by operators. The Operator is the final reviewer and approver of your service application. If the details you provide on your application change, it is your responsibility to resubmit your application with up-to-date information. By submitting an application, you agree that Microsoft may share the application details as necessary for provisioning the ACS messaging service.

Messaging Policy

Customer and its end users shall comply with the Azure Communication Services Messaging Policy. The Messaging Policy applies to SMS, MMS, and email communications. Microsoft reserves the right to suspend or remove access to Azure Communication Services for Customer or its end users that do not comply with the Messaging Policy. The Messaging Policy is available at https://docs.microsoft.com/azure/communication-services/concepts/telephony-sms/messaging-policy.

Azure DevOps

Use for Development and Testing

Customer may only access and use Azure DevOps to develop and test Customer's application(s). Only one Licensed User may access a virtual machine provided by Azure DevOps at any time.

Authorized Developer

Customer appoints Microsoft as its authorized developer with respect to Apple software included in Azure DevOps. Microsoft is responsible for complying with the terms for any such software included in Azure DevOps and will keep confidential any confidential information of Apple accessed as part of Azure DevOps.

Third Party Repository Service Access

If Customer grants Microsoft access to its third-party repository service account(s), Customer authorizes Microsoft to scan the account(s), including the contents of Customer's public and private repositories.

Enablement of GitHub Advanced Security for Azure DevOps

In addition to a Licensed User permitting access to Azure DevOps, a customer must activate GitHub Advanced Security for Azure DevOps for each repository where the service is required, allowing Unique Committers to utilize the service.

Azure DevTest Labs

Secrets in DevTest Labs

Azure DevTest Labs automatically creates a key vault when a user saves a secret for the first time. Customer may not use this key vault to store anything other than DevTest Lab related passwords, SSH keys, or personal access tokens.

Microsoft Dev Box

Permitted Usage

Customer must use Microsoft Dev Box ("Dev Box") to design, develop, or test applications. Other use is permitted if Customer is also using Dev Box for one of the aforementioned purposes.

Dev Box is not eligible for the Azure Customer Solution clause in the General Service Terms for Azure.

License Prerequisites

The Licensed User must be licensed with each of the following: Windows 10/11 Enterprise/Education, Intune, and Microsoft Entra ID P1/P2. In addition to being available independently, all these licenses are also included in Microsoft 365 F3/E3/G3/E5/G5/A3/A5/Business Premium/Student Use Benefit.

Network Egress

Microsoft reserves the right to restrict network egress due to high bandwidth usage.

Use as a Server

You may not use the service to perform server functions to devices outside of the service or to third parties.

Distributed Computing

You may not use the service for sustained distributed computing or digital asset transaction validation workloads.

Data Handling

Windows 365 integrates data (including Customer Data) between other Microsoft Products including Microsoft Entra ID, Microsoft Intune, Azure Virtual Desktop, and other Online Services as configured by Customer, if any (collectively for purposes of this provision the "Windows 365 Integrated Services"). Once data is transferred between the Windows 365 Integrated Services, that data is governed by the Product Terms applicable to the Product in which it resides.

Microsoft Fabric

Power BI

Customer's use of Power BI within Microsoft Fabric is subject to Power BI service specific terms and notices terms provided under the Power BI Platform section of these Online Services product terms.

Azure Health Bot Service

Customer Obligations

Customer is solely responsible for: (1) the accuracy and adequacy of information and Data furnished through use of the Azure Health Bot Service; (2) implementing a secure application-to-application authentication method between the Customer Health Bot Application and the Azure Health Bot Service; (3) obtaining appropriate consent from end users in connection with their use of the Customer Health Bot Application; and (4) displaying appropriate warnings, disclaimers, and acknowledgements to end users in connection with their use of the Customer Health Bot Application, including, as applicable, those set forth in the following form.

Azure Kubernetes Service Edge Essentials

Use Rights and Conditions for Use

Customer may use Azure Kubernetes Service Edge Essentials (AKS EE) only on Windows and Windows Server to host, manage, and service validly licensed containers running validly licensed applications.

One (1) SL for AKS EE permits Customer to use AKS EE on one (1) physical device or virtual machine.

Notices

The NVIDIA Components in <u>Notices</u> apply.

Pre-Release Features

Microsoft may provide pre-release features in AKS EE which are for preview purposes only and may not be used in a production environment. Such pre-release features may not work correctly or the way a final commercial version of the features will. Microsoft may change the commercial versions of such features or may not release commercial versions.

Feedback

If Customer gives feedback about the pre-release features or AKS EE to Microsoft, Customer gives to Microsoft, without charge, the right to use, share and commercialize Customer feedback in any way and for any purpose. Customer will not give feedback that is subject to a license that requires Microsoft to license its software or documentation to third parties because Microsoft includes Customer feedback in them. These rights survive Customer's volume licensing agreement.

Azure Kubernetes Service on Azure Stack HCI and Azure Kubernetes Service Runtime on Windows Server

Use Rights and Conditions for Use

Customer may use Azure Kubernetes Service on Azure Stack HCI (AKS on HCI) and Azure Kubernetes Service Runtime on Windows Server (AKS on WS) (collectively, AKS) only (i) on Azure Stack HCI (with respect to AKS on HCI) or Windows Server (with respect to AKS on WS) running on servers dedicated to Customer's use and (ii) to host, manage, and service validly licensed containers running validly licensed applications.

Customer may use AKS as long as it is registered with Customer's valid Azure subscription in order to enable additional AKS functionality and to meter and invoice Customer.

Included Microsoft Applications

AKS may include other Microsoft applications. These license terms apply to those included applications, if any, unless other license terms are provided with the other Microsoft applications.

Third Party Software

AKS may include third party components with separate legal notices or governed by other agreements, as may be described in the ThirdPartyNotices file(s) accompanying AKS or within AKS itself.

License Restrictions

Customer may not work around any mandatory registration or sign-up process for AKS.

Customer Support

Any support for AKS is provided "as is", "with all faults", and without warranty of any kind.

Updates

AKS may automatically download and install updates for you. You agree to receive these automatic updates without any additional notice. Updates may not include all existing software features, services, or peripheral devices.

Azure Lab Services

While Microsoft provides Azure Lab Services to Customer, as between Customer and Microsoft, Customer is the sole provider of related services to Customer's end users and shall have sole and exclusive responsibility to end users, including any support obligations. Customer's end users are not a party to any agreement with Microsoft regarding the services.

Notification; Liability; Bar on Actions Against Microsoft

Customer will notify Microsoft promptly of any incidents that could have an impact on Microsoft such as a data breach, password issues, end user complaint(s), loss of user data, or intellectual property or privacy claims.

Customer acknowledges and agrees that Microsoft has no obligation or liability to Customer or any end user for the end user's usage of the service.

By using the service, an end user may not bring any action against Microsoft in relation to the services. If any end user does bring an action against Microsoft, the Indemnification provision in this section applies.

Indemnification

Customer agrees to hold harmless and indemnify Microsoft from and against any claim by an end user, third party, and/or regulatory authority in connection with the service provided to end users. Customer shall pay any resulting judgment, or settlement, and all costs, including reasonable attorney's fees, and expenses related thereto.

End User Terms

In order to provide the services to end users, Customer and Customer's end users must validly agree to a binding, written agreement that contain the substance of the following requirements:

Statement of Relationship: Customer is the sole provider of the services. Customer is responsible for providing any support to end users. The services will be provided by Customer to Customer's end users under your terms of use and privacy policy.

Compliance; Acceptable Use: Customer is solely responsible for ensuring compliance with all applicable laws, including, but not limited GDPR, with respect to Customer's provision and end users' use of the service. In addition, for clarity and without limiting the Acceptable Use Policy, Customer and Customer's end users may not use Azure Lab Services to facilitate or engage in cryptocurrency mining. Violation of this prohibition may result in suspension of the service, as set forth in the Acceptable Use Policy.

Disclaimer of Warranties: Customer will disclaim any and all warranties in connection with the services, and Customer will disclaim the same with respect to Microsoft.

Limitation of Liability and Exclusion of Damages: Customer will disclaim liability and exclude damages in a way that is consistent with the provisions of any applicable agreement(s) between Customer and Microsoft.

Updates

Customer is responsible for updating the virtual machines (VMs) in Customer's portfolio. Notwithstanding the foregoing, Microsoft may, but is not obligated to, take any action it deems reasonable in its business judgment with respect to the VMs in your portfolio, including applying any updates or other changes generally applicable to the services.

Azure Machine Learning service

NVIDIA Components

Azure Machine Learning service may include NVIDIA Corporation's CUDA Toolkit, Tesla drivers, cuDNN, DIGITS, NCCL, and TensorRT (the "NVIDIA Components"), Customer agrees that its use of NVIDIA Components is governed by the NVIDIA Cloud End User License Agreement for Compute at https://go.microsoft.com/fwlink/?linkid=874330.

Azure Maps

Navigation restrictions

Customer may not use Azure Maps to enable turn-by-turn navigation functionality in any application.

Database restrictions

Customer may not use Azure Maps or any part thereof to create a competing database or service, or a derived database populated wholly or partially with Customer's data and/or data supplied or created by any third party.

Customer will not use the data delivered by the Azure Maps in combination with any other third-party database, except that Customer may layer onto the data of a type not already included within the Service (such as your proprietary content) or of which Microsoft otherwise licenses.

API Results

Customer may not cache or store information delivered by the Azure Maps API including but not limited to geocodes and reverse geocodes, map data tiles and route information (the "Results") for the purpose of scaling such Results to serve multiple users, or to circumvent any functionality in Azure Maps.

Caching and storing Results is permitted where the purpose of caching is to reduce latency times of Customer's application. Results may not be stored for longer than: (i) the validity period indicated in returned headers; or (ii) 6 months, whichever is the shorter. Notwithstanding the foregoing, Customer may retain continual access to geocodes as long as Customer maintains an active Azure account.

Customer may not display any Results, except geocodes and/or Azure Maps Weather service results, solely as described in these Terms, on any third-party content or geographical map database.

Map Data

Use of content displaying the TomTom copyright notice must be in accordance with restrictions set forth in the TomTom Licensing Third Party Product Terms and EULA (https://www.tomtom.com/en_GB/thirdpartyproductterms/).

Imagery Data

Azure Maps uses imagery from Microsoft Bing. Use of imagery content is subject to the following:

- Bing Imagery is subject to the Bing Maps Notice in the Notices section.
- Customers may not use any means to subvert the restrictions listed above and gain access to imagery content.

User region parameter

User region parameter in Azure Maps must be used in compliance with applicable laws, including those regarding mapping, of the country where maps, images and other data and third-party content that Customer is authorized to access via Azure Maps is made available.

No warranty for accuracy

Microsoft and its suppliers make no warranty that the maps, images, data or any content delivered by Azure Maps will be accurate or complete.

Copyright

Customers may not remove, obscure, mask or change any logo and/or copyright notice placed on or automatically generated by Azure Maps. In addition, customers using the Azure Maps Render V2 API must use the "Get Map Attribution service" to obtain the copyright attribution text and display it in their applications.

Azure Orbital

Authorization Required

Customers may not use the Azure Orbital service to receive signals from or transmit signals to a satellite space station without the authorization of its operator. By subscribing to the Azure Orbital service, you represent to Microsoft that your intended operations will occur only with the satellite space-station operator's consent.

Azure Private 5G Core

Software License

Subject to the following terms and conditions, Microsoft grants you a nonexclusive, limited, royalty-free, nontransferable right to use the Azure Private 5G Core software solely as part of an Azure Private MEC Solution. Customer agrees that it will only use Azure Private 5G Core after review by Microsoft and may be required to assent to additional terms and conditions, visit aka.ms/ap5gcvalidation.

Azure Stack HCI

Privacy Notice

Microsoft will be a controller of Personal Data when customers turn on collection of Windows diagnostic data as described in product documentation. When Microsoft is a controller, Microsoft will handle this Personal Data in accordance with the Microsoft Privacy Statement at aka.ms/privacy, and the Data Protection Addendum terms do not apply.

Use Rights and Conditions for Use

Customer may use the Azure Stack HCI software only (i) on servers dedicated to Customer's internal use and (ii) as a host operating system to manage and service validly licensed virtual machines running validly licensed applications. Any server that is under the management or control of an entity other than Customer or one of its Affiliates is subject to the Outsourcing Software Management clause. Customer may use the Azure Stack HCI software as long as it is (i) registered with Customer's valid Azure subscription in order to enable additional Azure Stack HCI functionality and to meter and invoice Customer and (ii) connected to Customer's Azure subscription over the Internet at least once every thirty (30) consecutive calendar days.

License Restrictions

Customer may not (i) work around any mandatory registration or sign-up process for Azure Stack HCI or (ii) run any applications, operating system roles, and/or other workloads directly on the Azure Stack HCI software except for (A) utilities and operating system roles and (B) virtualized machines running Azure Stack HCI, both (A) and (B) as necessary to enable Azure Stack HCI to host, manage, and service validly licensed virtual machines running validly licensed applications.

Customer Support

Any customer support for Azure Stack HCI that may be available from Microsoft requires that Azure Stack HCI runs on server hardware that is pre-validated and listed in the Azure Stack HCI catalog or any successor.

Azure Stack Hub

Privacy Notice

Microsoft will be a controller of Personal Data when customers turn on collection of Windows diagnostic data as described in the Product documentation. When Microsoft is a controller, Microsoft will handle this Personal Data in accordance with the Microsoft Privacy Statement at aka.ms/privacy, and the Data Protection Addendum terms do not apply.

If a Microsoft Cloud Agreement or Microsoft Customer Agreement Customer uses Azure Stack Hub software or services that are hosted by a Reseller, such use will be subject to Reseller's privacy practices, which may differ from Microsoft's.

Use of Azure Stack Hub

Customer may use Azure Stack Hub only on the hardware on which it is preinstalled.

Use of the Default Provider Subscription

The subscription created for the system administrator during the Azure Stack Hub deployment process (the default provider subscription) may be used solely to deploy and manage the Azure Stack Hub infrastructure; it may not be used to run any workload that does not deploy or manage Azure Stack Hub infrastructure (e.g. it may not be used to run any application workloads).

Azure Stack Hub Plan

Customer may use Microsoft Azure Stack Hub on a Licensed Server, provided it acquires a number of SLs equal to the number of Physical Cores on that Server. Licenses are reduction eligible; however, ongoing use remains subject to the requirement to retain licenses equal to the Physical Cores on the Server.

Azure SQL Edge

IoT Device

Any IoT Device that is under the management or control of an entity other than Customer or one of its Affiliates is subject to the Outsourcing Software Management clause.

Use of Azure SQL Edge

Customer may install and use any number of copies of the Azure SQL Edge software on an IoT Device dedicated to Customer's use and to which a License is assigned. Notwithstanding anything to the contrary in Universal Terms for Online Services, Customer may reassign a License at any time to other IoT Devices dedicated to its use. If Customer installs any features or functionalities other than the Azure SQL Edge software (whether derived from Microsoft or third party software) on the IoT Device, then those other features or functionalities may be used only to support the IoT Program.

The terms of the DPA do not apply to Azure SQL Edge installed on Customer's IoT Device, except to the extent any Personal Data is collected to enable Azure management services and to meter usage for billing purposes, because the operating environment of such IoT Devices is not under Microsoft's control.

Azure SQL Managed Instance

SQL Server Fail-over Rights

Azure SQL Managed Instances include the following Fail-over entitlements:

- One geo-secondary specifically for disaster recovery purposes.

Customer will only be charged for compute, storage, and any associated services, as applicable.

Customer may also run Primary Workload and its disaster recovery replica simultaneously for brief periods of disaster recovery testing every 90 days, and around the time of a disaster, for a brief period, to assist in the transfer between them. Customer may perform the following maintenance-related operations for any permitted replica:
- Database consistency checks or Checkdb
- Executing backups
- Monitoring resource usage data

The number of vCores used may not exceed the vCore size of the corresponding Primary Workload, except for brief periods during upscaling, downscaling, and failover events. Replicas may not serve SQL Server data to users or devices or otherwise run active SQL Server workloads.

Azure SQL Server Virtual Machines

SQL Server Fail-over Rights

SQL Server Virtual Machines include the following Fail-over entitlements:

- One Fail-over OSE for any purpose, including high availability; and
- One Fail-over OSE specifically for disaster recovery purposes.

Customer will only be charged for compute, storage, and any associated services, as applicable.

Customer may also run Primary Workload and its disaster recovery Fail-over OSE simultaneously for brief periods of disaster recovery testing every 90 days, and around the time of a disaster, for a brief period, to assist in the transfer between them. Customer may perform the following maintenance-related operations for any permitted Fail-over OSE:
- Database consistency checks or Checkdb
- Executing backups
- Monitoring resource usage data

Fail-over OSEs permitted for disaster recovery must be asynchronous and manual. The number of vCores used may not exceed the vCore size of the corresponding Primary Workload. Fail-over OSEs may not serve SQL Server data to users or devices or otherwise run active SQL Server workloads.

Azure Virtual Desktop Per User Access

Definitions
"End User" means a third-party individual that acquires Azure Virtual Desktop Customer Solution from Customer for End User's own internal use (without the right to resell or redistribute it).

"Azure Virtual Desktop Customer Solution" means an application or any set of applications that adds primary and significant functionality to the Azure Virtual Desktop.

Use Rights
Azure Virtual Desktop per user access licenses are only available for Customer's external commercial purposes to serve Azure Virtual Desktop Customer Solutions to third parties on Azure. Customer may not use the licenses acquired under this model for internal purposes. Customer may assign no more than one million user identities licensed under this model to its Azure Virtual Desktop session hosts.

To access Azure Virtual Desktop for internal business purposes Customer may acquire select Windows Enterprise and Microsoft 365 licenses. Please see the relevant product sections for more details.

End User Entitlements

End Users may connect to up to five Azure Virtual Desktop session hosts at once.

Hosting Entitlement

The General Service Terms Azure Customer Solution clause does not apply. Notwithstanding the general restrictions in Customer's agreement that preclude reselling, redistributing, or using the Products to offer commercial hosting services to third parties, Customer may, subject to the conditions set forth below:

Combine Azure Virtual Desktop per user access licenses with applications owned or licensed by Customer or a third party to create an Azure Virtual Desktop Customer Solution solely for use on Microsoft Azure, and permit End Users to access and use Azure Virtual Desktop per user access licenses in connection with the use of that Azure Virtual Desktop Customer Solution on a rental, subscription or services basis (whether or not a fee for such use is paid).

Additional Terms

Indemnification. Customer agrees to defend Microsoft from and against any claim by an End User, third party, and/or regulatory authority arising from, or in connection with, the Azure Virtual Desktop Customer Solution provided to End Users. Customer will pay the amount of any adverse final judgment or approved settlement resulting from a claim covered by this section. The obligations under this section are not subject to the limitation of liability or exclusion of certain damages under Customer's volume licensing agreement.

Support. Microsoft is not obligated to provide support services to Customer or its End Users in connection with the Azure Virtual Desktop Customer Solution. Customer alone is responsible for providing technical support to End Users for all aspects and components of the Azure Virtual Desktop Customer Solution, either itself or by obtaining and continuously maintaining support for its End Users through Microsoft or a third party. Customer must inform End Users of this fact. Any support from Microsoft for questions or issues that arise as part of Customer's support of the Azure Virtual Desktop Customer Solution must be obtained under a separate support services agreement.

END USER AGREEMENT REQUIREMENTS

Company must:

- Notify each End User before or at the time of purchase (in the appropriate language versions for the locations in which Company will deliver the Azure Virtual Desktop Customer Solution) that the Azure Virtual Desktop Customer Solution contains Microsoft technology that is subject to certain license terms and that the End User must agree to the license terms before using the Product.
- Include the following acknowledgment in the credit screen or about screen and documentation of any Azure Virtual Desktop Customer Solution: "© Copyright 2021 Microsoft Corporation. All rights reserved."
- Present and execute license terms in a manner that forms a contract binding the End User under applicable law. Such license terms must contain the substance of the requirements contained in the following exemplar:

TERMS AND CONDITIONS REGARDING USE OF MICROSOFT SOFTWARE & ONLINE SERVICES

This document governs the use of software and online services ("Software Services") that [insert Service Provider's name] ("Service Provider") provides to you on a rental, subscription or services basis, and that include Microsoft software and online services ("Microsoft Products"). Service Provider does not own the Microsoft Products and the use thereof is subject to certain rights and limitations of which Service Provider must inform you. Your right to use the Microsoft Products is subject to the terms of your agreement with Service Provider, and to your understanding of, compliance with, and consent to the following terms and conditions, which Service Provider does not have authority to vary, alter, or amend.

- **OWNERSHIP OF MICROSOFT PRODUCTS**. The Microsoft Products are licensed to Service Provider from an affiliate of the Microsoft Corporation (collectively "Microsoft"). Microsoft Products are protected by copyright and other intellectual property rights. Microsoft Products and related elements including but not limited to any images, photographs, animations, video, audio, music, text and "applets" incorporated into the Microsoft Products are owned by Microsoft or its suppliers. You may not remove, modify or obscure any copyright trademark or other proprietary rights notices that are contained in or on the Microsoft Products. The Microsoft Products are protected by copyright laws and international copyright treaties, as well as other intellectual property laws and treaties. Your possession, access, or use of the Microsoft Products does not transfer any ownership of the Microsoft Products or any intellectual property rights to you.
- **USE OF SOFTWARE SERVICES**. You may use the Software Services only in accordance with your agreement with Service Provider and these terms. These terms permanently and irrevocably supersede the terms of any Microsoft End User License Agreement that may be presented in electronic form during the installation and/or use of the Software Services.
- **COPIES**. You may not make any copies of the Products.

- **LIMITATIONS ON REVERSE ENGINEERING, DECOMPILATION AND DISASSEMBLY**. You may not reverse engineer, decompile, or disassemble the Products, except and only to the extent that applicable law, notwithstanding this limitation, expressly permits such activity.
- **NO RENTAL**. You may not rent, lease, lend, pledge, or directly or indirectly transfer or distribute the Products to any third party, and may not permit any third party to have access to and/or use the functionality of the Products except for the sole purpose of accessing the functionality of the Products in the form of Software Services in accordance with the terms of this agreement and any agreement between you and Service Provider.
- **TERMINATION**. Without prejudice to any other rights, Service Provider may terminate your rights to use the Products if you fail to comply with these terms and conditions. In the event of termination or cancellation of your agreement with Service Provider or Service Provider's agreement with Microsoft under which the Products are licensed, you must stop using and/or accessing the Products, and destroy all copies of the Products and all of their component parts within thirty (30) days of the termination of your agreement with Service Provider.
- **NO WARRANTIES, LIABILITIES OR REMEDIES BY MICROSOFT**. Microsoft disclaims, to the extent permitted by applicable law, all warranties and liability for damages by Microsoft or its suppliers for any damages and remedies whether direct, indirect or consequential, arising from the Software Services. Any warranties and liabilities are provided solely by Service Provider and not by Microsoft, its affiliates or subsidiaries.
- **PRODUCT SUPPORT**. Any support for the Software Services is provided to you by Service Provider or a third party on Service Provider's behalf and is not provided by Microsoft, its suppliers, affiliates or subsidiaries.
- **NOT FAULT TOLERANT**. The Products are not fault-tolerant and are not guaranteed to be error free or to operate uninterrupted. You must not use the Products in any application or situation where the Product(s) failure could lead to death or serious bodily injury of any person, or to severe physical or environmental damage ("High Risk Use").
- **EXPORT RESTRICTIONS**. The Products are subject to U.S. export jurisdiction. You must comply with all applicable laws including the U.S. Export Administration Regulations, the International Traffic in Arms Regulations, as well as end-user, end-use and destination restrictions issued by U.S. and other governments. For additional information, see http://www.microsoft.com/exporting/.
- **LIABILITY FOR BREACH**. In addition to any liability you may have to the Service Provider, you agree that you will also be legally responsible directly to Microsoft for any breach of these terms and conditions.
- **INFORMATION DISCLOSURE**. You must permit Service Provider to disclose any information requested by Microsoft under the Service Provider's Agreement. Microsoft will be an intended third-party beneficiary of your agreement with Service Provider, with the right to enforce provisions of your agreement with Service Provider and to verify your compliance.
- **PRIVACY AND DATA PROTECTION**. The Software Service will be provided by Service Provider you under its privacy policy.

Azure VMware Solution

Professional Services Data Transfer to VMware
If customer contacts Microsoft for technical support relating to Azure VMware Solution and Microsoft must engage VMware for assistance with the issue, Microsoft will transfer the Professional Services Data and the Personal Data contained in the support case to VMware. The transfer is made subject to the terms of the Support Transfer Agreement between VMware and Microsoft, which establishes Microsoft and VMware as independent processors of the Professional Services Data. Before any transfer of Professional Services Data to VMware will occur, Microsoft will obtain and record consent from customer for the transfer.

VMware Data Processing Agreement
Once Professional Services Data is transferred to VMware (pursuant to the above section), the processing of Professional Services Data, including the Personal Data contained the support case, by VMware as an independent processor will be governed by the VMware Data Processing Agreement for Microsoft AVS Customers Transferred for L3 Support (https://rc.portal.azure.com/verifyLink?href=https%3A%2F%2Fwww.vmware.com%2Fvmware-dpa-for-avs-customers.html&id=Microsoft_Azure_Marketplace). Customer also gives authorization to allow its representative(s) who request technical support for Azure VMware Solution to provide consent on its behalf to Microsoft for the transfer of the Professional Services Data to VMware.

Deployment and Usage Information
Customer authorizes Microsoft to share with VMware its status as a customer of Azure VMware Solution and associated Azure VMware Solution deployment and usage information.

Cognitive Services and Applied AI Services

For the purposes of this section, "Services" means collectively Cognitive Services and Applied AI Services.

Product documentation

Microsoft may provide technical documentation regarding the appropriate operation applicable to the Services (including the applicable developer guides), which is made available online by Microsoft and updated from time to time. Customer acknowledges and agrees that it has reviewed this documentation and will use the Services in accordance with such documentation, as applicable.

Some Services are intended to process Customer Data that includes Biometric Data (as may be further described in product documentation) which Customer may incorporate into its own systems used for personal identification or other purposes. Customer acknowledges and agrees that it is responsible for complying with the Biometric Data obligations contained in the Online Services DPA (https://aka.ms/DPA).

Limit on Customer use of service output

Customer will not use, and will not allow third parties to use the Services or data from the Services to create, train, or improve (directly or indirectly) a similar or competing product or service.

Limited Access Services

Certain Services (or versions thereof) require registration and are subject to limitations on access and use based on Microsoft's eligibility and use criteria, as updated by Microsoft from time to time ("Limited Access Services"). The following Cognitive Services and Applied AI Services are Limited Access Services:

- Azure Cognitive Services Customized Text-to-Speech service
- Azure Cognitive Services Face API service
- Azure Cognitive Services Computer Vision service (Celebrity Recognition)
- Azure Cognitive Services Speaker Recognition service
- Azure Video Indexer Applied AI Service
- Azure OpenAI Service
- Azure OpenAI Service (Modified Content Filtering/Monitoring)

NOTE: In addition to the services listed here, (i) Cognitive Services and Applied AI Services preview services may be designated, in applicable preview terms, as subject to Limited Access Services terms; and (ii) certain versions of Cognitive Services and Applied AI Services, such as versions in containers, may be designated, in product documentation or otherwise, as subject to Limited Access Services terms.

Customer agrees that it will only use Limited Access Services (including when used in a Customer Solution) in accordance with the applicable product terms, product documentation, and these Limited Access Services terms; solely for the permitted uses specified in its registration form; and in accordance with any commitments and/or representations made in its Limited Access Services registration form. Customer agrees to provide current, complete, and accurate information in all registration forms and other materials provided to Microsoft pursuant to these Limited Access Service terms. Microsoft may require Customer from time to time to re-verify that all information submitted to Microsoft regarding Customer and Customer's use of the Limited Access Services remains accurate, complete, and up to date, and that Customer is using the Limited Access Services in accordance with the information submitted and these terms. Customer agrees to respond to requests for re-verification from Microsoft within ten (10) business days of receiving a request (requests may be provided via self-certification Azure tools). If Microsoft needs additional information to assure compliance with these terms or eligibility for access to Limited Access Services, Customer agrees to reasonably cooperate with Microsoft to provide such information within thirty (30) business days of request.

Microsoft may re-assess Customer's eligibility to access and use Limited Access Services from time to time. If Microsoft determines that Customer no longer meets Microsoft's eligibility and use criteria for a Limited Access Service (or that Customer does not meet eligibility and use criteria for a Service that has become a Limited Access Service), Microsoft will provide Customer with 12 months' notice before discontinuing Customer's access to and use of that Limited Access Service, unless security, legal, or system performance considerations require an expedited discontinuation of access. This does not apply to Previews, and does not affect any other rights and remedies available to Microsoft with respect to Customer's use of Services.

In addition to Microsoft's right to discontinue access to and use of a Limited Access Service when Customer no longer meets Microsoft's eligibility and use criteria (or Customer does not meet eligibility and use criteria for a Service that has become a Limited Access Service), Microsoft may suspend or terminate Customer's access to these Limited Access Services for non-compliance with any of the terms in this section, without advance notice but only to the extent reasonably necessary under the circumstances.

Azure OpenAI Service

In addition to the Universal Terms for Online Services applicable to Microsoft Generative AI Services and the Limited Access Services terms above, the following terms apply to the use of the Azure OpenAI Service.

Use Limitations

- **Compliance with Limited Access Service registration and product documentation**. Microsoft may limit Customer's access to or use of the Azure OpenAI Service if Microsoft has a reasonable basis to believe that the Output Content or Customer's use of the Azure OpenAI Service is inconsistent with the information submitted in connection with Customer's Limited Access Service registration form or requirements in the product documentation for the Azure OpenAI Service, as updated from time to time.
- **Data Use and Access for Abuse Monitoring:** Except for the Limited exception below, as part of providing the Azure OpenAI service, Microsoft will temporarily store Inputs and Output Content, solely for debugging and to monitor for and prevent abusive or harmful uses or outputs of the service. Authorized Microsoft employees may review such data that has triggered our automated systems to investigate and verify potential abuse. For customers who have deployed Azure OpenAI service in the European Economic Area, the authorized Microsoft employees will be located in the European Economic Area. See the Azure OpenAI product documentation https://learn.microsoft.com/azure/cognitive-services/openai/ for more information.
- **Limited exception**. The foregoing Data Use and Access for Abuse Monitoring terms will not apply if and to the extent Customer is approved for and complies with all requirements to use the Azure OpenAI Service with Modified Content Filtering and/or Abuse Monitoring.
- **Location of Data Processing:** Notwithstanding the Location of Data Processing provision in the Universal Terms applicable to Microsoft Generative AI Services, the commitments related to the location of data processing and storage in the Product Terms Privacy & Security Terms for Microsoft Azure Core Services remain in effect for Azure OpenAI Service.

Customized Text-to-Speech (TTS) Services and use of Synthetic Voices

Permissions: Customer represents, warrants and certifies that (i) it has explicit written permission from the voice owner(s) contained within its audio files ("Voice Talent") to use their personal data, including his/her voice likeness to create voice model(s) ("Synthetic Voice(s)"), (ii) Customer's agreement(s) contemplate the duration of use of the Synthetic Voice and any content limitations and (iii) Customer has shared Microsoft's disclosure guidance for voice talent (https://aka.ms/disclosure-voice-talent) with Voice Talent directly or through Voice Talent's authorized representative that describes how synthetic voices are developed and operate in conjunction with text to speech services. Microsoft reserves the right to require Customer to provide audio files containing acknowledgements by Voice Talent(s). Customer acknowledges and agrees that Microsoft may use this to perform speaker verification against Customer's audio training files; however, Microsoft's retention of audio files does not create or imply an obligation that Microsoft will perform speaker verification.

Permitted uses: In addition to compliance with the Acceptable Use Policy, the code of conduct (available at https://aka.ms/custom-neural-code-of-conduct) sets the minimum requirements that all TTS implementations must adhere to in good faith. Customer shall have the exclusive right to use the Synthetic Voice(s)s created by Customer and made available through use of the Services. Notwithstanding the foregoing or anything to the contrary in the DPA, Customer acknowledges and agrees that Microsoft may retain a copy of each Synthetic Voice created by Customer and may, but is not obligated to, use the Synthetic Voice(s) to investigate and respond to any alleged violations of the service terms. Customer agrees and grants Microsoft a limited nonexclusive irrevocable worldwide license to retain acknowledgment audio voice consent file(s)s and a copy of the Synthetic Voice(s) for the limited purposes above. Customer is required to secure and maintain all rights necessary for Microsoft to retain and use the acknowledgment audio files and Synthetic Voice(s) as described in this section without violating the rights of Voice Talent(s) or any other third party or otherwise obligating Microsoft to Customer, Voice Talent or any other third party. This paragraph will survive termination or expiration of Customer's agreement.

Microsoft Translator Attribution

When displaying automatic translations performed by Microsoft Translator, Customer will provide reasonably prominent notice that the text has been automatically translated by Microsoft Translator.

Services in Containers

Services features that are available in containers are licensed to Customer under this agreement as Online Services, and the containers are also subject to the terms for Use of Software with the Online Service. Customer may install and use any number of containers on Customer's hardware devices that are dedicated to Customer's exclusive use, subject to the conditions specified below for connected and disconnected containers, respectively. For containers installed on dedicated hardware that is under the management or control of an entity other than Customer or one of its Affiliates, the Outsourcing Software Management clause of the Universal License Terms for All Software.

Microsoft may offer required and/or optional updates or supplements to the services in containers. If an update is required, Customer will update the container in accordance with the Microsoft notice requirements; failure to perform these updates may affect the container's functionality and/or the container may stop operating.

The containers include material that is confidential and proprietary to Microsoft. Customer agrees to keep that material confidential and to promptly notify Microsoft if Customer becomes aware of any possible misappropriation or misuse.

Because the operating environment of containers installed on Customer's dedicated hardware is not under Microsoft's control, the terms of the DPA do not apply to those containers, except to the extent a) any Personal Data is collected in connection with a billing endpoint, or b) Customer Data is provided to Microsoft for custom model training prior to download of the Service operating in the container.

Connected Containers: Connected containers are designed to connect to a billing endpoint. Customer must configure any connected containers it uses to communicate with the billing endpoint so that the billing endpoint meters all use of the container(s). In addition to the rights to install and use containers on dedicated hardware, Customer may also install and use any number of connected containers in Customer's Microsoft Azure Service accounts; all rights to install and use connected containers are subject to Customer's enabling and maintaining metering for all such containers.

Disconnected Containers: Disconnected containers are intended for use with no online connectivity to an Azure billing endpoint. Disconnected containers are subject to the terms for Limited Access Services. Disconnected containers have limited capacity workloads and usage is measured in units. As specified in the terms for Purchasing Microsoft Azure Services, Customer must pay upfront for a commitment tier at the number of units necessary to meet Customer's actual service usage for each license period. Customer has the rights specified above to install and use disconnected containers on dedicated hardware provided that the aggregate service usage in all Customer's disconnected containers does not exceed the usage for which Customer has paid for the applicable license period. Disconnected container units expire at the end of the license period, and Customer must activate (or reactivate, as applicable) disconnected container units before the beginning of the next license period. If Customer fails to reactive a disconnected container prior to the expiration of the applicable license period, the disconnected container will stop operating after the license expires.

Inactive Services Configurations and Custom Models
For the purposes of data retention and deletion, a Services configuration or custom model that has been inactive may at Microsoft's discretion be treated as an Online Service for which the Customer's subscription has expired. A configuration or custom model is inactive if for 90 days (1) no calls are made to it; (2) it has not been modified and does not have a current key assigned to it and; (3) Customer has not signed in to it.

Defender for Cloud - Use on Devics Managed by Third-Parties

Notwithstanding the Outsourcing Software Management clause, Customer may use Defender for Cloud with workloads running on Microsoft Azure, its own devices, or devices under the day-to-day management and control of third parties.

Express Route Global Reach

Express Route Global Reach is an Azure Service offering data transport capabilities to Express Route users in certain locations. Express Route Global Reach is provided by the Microsoft Affiliate authorized in a given country to administer it. Pricing for Express Route Global Reach may include applicable taxes and fees. Express Route Global Reach terms may vary from country to country. All included taxes, fees and country-specific terms of use are disclosed in the terms of use available at https://aka.ms/CommunicationServicesTerms.

Extended Use Rights for Microsoft Defender for Identity Customers

Customer may also install and use Advanced Threat Analytics locally to manage client OSEs (or Server OSEs used as client OSEs) that are used solely by users to whom licenses are assigned. This right expires when Customer's subscription expires.

Microsoft Genomics

Microsoft Genomics Privacy
The Microsoft Privacy Statement located at https://aka.ms/privacy applies to Customer's use of Microsoft Genomics, except that this Microsoft Genomics section controls to the extent it conflicts with the Microsoft Privacy Statement.

Broad License Terms
Microsoft Genomics includes access to the Genetic Analysis Toolkit (GATK) from the Broad Institute, Inc. ("Broad"). Use of the GATK and any related documentation as part of Microsoft Genomics is also subject to Broad's GATK End User License Agreement ("Broad EULA" located here https://software.broadinstitute.org/gatk/eula/index?p=Azure).

Microsoft may collect and share with Broad certain statistical and technical information regarding Customer's usage of the GATK. Customer authorizes Microsoft to report to Broad Customer's status as a user of the GATK in Microsoft Genomics.

No Medical Use

Microsoft Genomics is not a medical device and outputs generated from its use are not intended to be statements of fact, nor are they to be used as a substitute for medical judgment, advice, diagnosis or treatment of any disease or condition.

Multi-Cloud Scanning Connectors for Microsoft Purview

To enable interoperability with Customer's deployments with other cloud providers, Microsoft may operate within such other clouds certain optional, discrete data scanner functionality for Customer's data hosted in such other clouds (the "Multi-Cloud Scanning Connectors for Microsoft Purview"). Microsoft will disclose in its documentation how Customer may enable and use the Multi-Cloud Scanning Connectors for Microsoft Purview. For clarity, the Multi-Cloud Scanning Connectors for Microsoft Purview is a separate add-on to Microsoft Purview. The Multi-Cloud Scanning Connectors for Microsoft Purview is not a Microsoft Azure Core Service and the following sections of the DPA do not apply to the Multi-Cloud Scanning Connectors for Microsoft Purview: "Educational Institutions", "CJIS Customer Agreement", "HIPAA Business", and "Appendix A - Security Measures".

With respect solely to the Multi-Cloud Scanning Connectors for Microsoft Purview, the following modifications to the DPA apply:
- Data Access: Microsoft employs least privilege access mechanisms to control access to Customer Data (including any Personal Data therein). Microsoft employs role-based access controls to ensure that Microsoft's access to Customer Data required for service operations is for an appropriate purpose and approved with management oversight.
- Auditing Compliance: Microsoft's commitments in the Auditing Compliance section of the DPA do not extend to third-party computers, computing environments or physical data centers used by the Multi-Cloud Scanning Connectors for Microsoft Purview.

Standard data protection terms offered by those other cloud providers govern your use of the Multi-Cloud Scanning Connectors for Microsoft Purview while the add-on is hosted in such other clouds.

Visual Studio App Center

Visual Studio App Center Test Privacy and Security Terms

The privacy statement located at https://aka.ms/actestprivacypolicy applies to Customer's use of Visual Studio App Center Test. Customer may not use Visual Studio App Center Test to store or process Personal Data. Please refer to the Product documentation for more information.

Use for Development and Testing

Customer may only access and use Visual Studio App Center to develop and test Customer's application(s). Only one Licensed User may access a virtual machine provided by Visual Studio App Center at any time.

Authorized Developer

Customer appoints Microsoft as its authorized developer with respect to Apple software included in Visual Studio App Center. Microsoft is responsible for complying with the terms for any such software included in Visual Studio App Center and will keep confidential any confidential information of Apple accessed as part of Visual Studio App Center.

Third Party Repository Service Access

If Customer grants Microsoft access to its third-party repository service account(s), Customer authorizes Microsoft to scan the account(s), including the contents of Customer's public and private repositories.

Add-ons

Customer may acquire Add-ons subject to the following conditions:
1. Customer must have active SA or an active User SL for the corresponding Qualifying Licenses
2. Customer may acquire one Add-on SL for each Qualifying License(s), unless provided otherwise in these terms
3. Customer may acquire add-on SLs between true-up dates in advance of the acquisition of the Qualifying Licenses

Add-ons expire upon the earlier of the expiration of the SA coverage for the Qualifying License or the Add-on SL term, unless provided otherwise in these terms. Add-ons may only be reassigned to users or devices with Qualifying Licenses.

Microsoft Azure User Plans

Qualifying License(s)	Add-on User Subscription License(s)
Enterprise CAL Suite	Azure Information Protection Premium Plan 1 Add-on (User SL)

Qualifying License(s)	Add-on User Subscription License(s)
Advanced Threat Analytics 2016 Client Management License per User	Microsoft Defender for Identity Client Management License Add-on (User SL

Product Conditions:

Provides additional information related to acquiring the Product, such as prerequisites for purchase, prior versions, and the applicable Product Pool.

Product Conditions - General	
Terms of Service	Universal License Terms for all Online Services
Product Pool	Server
Promotions	None

Unified Service Desk (USD)

Customers with active Dynamics 365 Customer Service Enterprise subscriptions may install and use USD software for each user. Servers used for this purpose, that are under the management or control of an entity other than Customer or one of its Affiliates, are subject to the Outsourcing Software Management clause.

Dynamics CustomerSource

Customers with active Dynamics 365 subscriptions may access and use CustomerSource.

Dynamics 365 Plan for Government

Dynamics 365 Supply Chain Management, Finance, Commerce, and Human Resources are not available in Dynamics 365 Plan for Government.

Embedded editions of Dynamics 365 Services

Embedded editions of certain Dynamics 365 Services are available through the Microsoft Cloud Agreement and Microsoft Customer Agreement. If Customers acquire and use Embedded editions as part of an Embedded Unified Solution, they may not separate the Embedded SL Product from the Embedded Unified Solution or use it with other applications.

Prerequisites for Base and Attach user subscription licenses

When purchasing multiple core Business Applications, the first or Base license must be the highest priced license for the user. Every full user must have a Base license. Dynamics 365 attach user SLs may only be assigned to users with qualifying application licenses.

Professional Direct Support

Customer must acquire enough Professional Direct Support licenses to cover each Dynamics 365 and Power Platform license on its agreement, up to a maximum of 250 licenses.

Dynamics 365 Remote Assist and Dynamics 365 Guides

External Users may access and use the above software on devices licensed with a Dynamics 365 Remote Assist Device SL or Dynamics 365 Guides Device SL.

Dual Use Rights

Certain Dynamics 365 SLs may allow access to the on-premises equivalent. This is mapped in the table below:

Dynamics 365 License	On-Premises Software access	On-Premises Server
Dynamics 365 Sales Enterprise	Dynamics 365 for Sales (On-Premises)	Dynamics 365 (On-Premises)
Dynamics Customer Service Enterprise	Dynamics 365 for Customer Service (On-Premises)	
Dynamics 365 Field Service	Dynamics 365 for Field Service functionality (On-Premises)	
Dynamics 365 Operations - Activity	Dynamics 365 for Operations Activity (on-premises)	Dynamics 365 for Operations, on-premises
Dynamics 365 Operations - Device	Dynamics 365 for Operations Device (on-premises)	
Dynamics 365 Finance	Dynamics 365 for Operations (on-premises)*	
Dynamics 365 Human Resources	Dynamics 365 for Operations (on-premises)*	
Dynamics 365 Supply Chain Management	Dynamics 365 for Operations (on-premises)*	
Dynamics 365 Commerce	Dynamics 365 for Operations (on-premises)*	
Dynamics 365 Team Members	Dynamics 365 for Team Members (on-premises)	Dynamics 365 (On-Premises) or Dynamics 365 for Operations, on-premises
Dynamics 365 Business Central Essentials**	Dynamics 365 Business Central Essentials (On-Premises)	Dynamics 365 Business Central (On-Premises)
Dynamics 365 Business Central Premium**	Dynamics 365 Business Central Premium (On-Premises)	
Dynamics 365 Business Central Team Members**	Dynamics 365 Business Central Team Members (On-Premises)	
Dynamics 365 Business Central - Device**	Dynamics 365 Business Central - Device (On-Premises)	

On-premises dual use rights only apply for the specific Dynamics 365 for Operations applications for which the user has a cloud SL. For example, a user licensed for Finance may only use the Dynamics 365 on-premises security roles associated with the Finance USL.

**Only available for Microsoft Cloud Agreement (MCA)*

License Prerequisites

Purchases of the following Licenses also require the purchase of a Prerequisite License listed in the table below:

License	License Prerequisites (Base License only)
Dynamics 365 Team Members	Dynamics 365 user SLs other than the Team Members SL
Dynamics 365 Sales Insights	Dynamics 365 Sales Enterprise, or Dynamics 365 Sales Premium, or Microsoft Relationship Sales
Dynamics 365 Conversation Intelligence	Dynamics 365 Sales Insights
Dynamics 365 Customer Insights Attach	**10 or more seats of ONE of the following:** Dynamics 365 Sales Professional Dynamics 365 Sales Enterprise

License	License Prerequisites (Base License only)
	Dynamics 365 Sales Premium Microsoft Relationship Sales Dynamics 365 Customer Service Professional Dynamics 365 Customer Service Enterprise Dynamics 365 Field Service Dynamics 365 Finance Dynamics 365 Supply Chain Management Dynamics 365 Commerce
Chat for Dynamics 365	Dynamics 365 Customer Service Enterprise
Dynamics 365 Intelligent Order Management User SL	Dynamics 365 Intelligent Order Management
Dynamics 365 Customer Service Messaging	Dynamics 365 Customer Service Enterprise
Sensor Data Intelligence Scenario Add-in for Dynamics 365 Supply Chain Management	Dynamics 365 Supply Chain Management
Cloud Scale Unit Add-in for Dynamics 365 Supply Chain Management	
Edge Scale Unit Add-in for Dynamics 365 Supply Chain Management	
Dynamics 365 e-Commerce Tier	Dynamics 365 Commerce
Dynamics 365 Commerce Scale Unit - Cloud	
Dynamics 365 Commerce Recommendations	
Dynamics 365 Commerce Ratings and Reviews	

Purchasing Minimums - Academic

Purchases in the Academic segment require a minimum purchase of the Licenses listed in the table below:

Segment	Minimum QTY	License Prerequisite (Base License only)
Academic	20	Dynamics 365 Customer Service Enterprise, and/or
		Dynamics 365 Customer Service Professional, and/or
		Dynamics 365 Sales Enterprise, and/or
		Dynamics 365 Sales Professional, and/or
		Dynamics 365 Field Service

Purchasing Minimums - All Programs

Purchases of the following products require a minimum purchase of the Licenses listed in the table below. These minimums must be maintained through the term of the customers Agreement or Enrollment:

Product	Minimum QTY	Minimum purchased Base Licenses
Microsoft Relationship Sales	10	Microsoft Relationship Sales
Dynamics 365 Commerce Dynamics 365 Finance Dynamics 365 Supply Chain Management Dynamics 365 Project Operations	20	Dynamics 365 Finance, or Dynamics 365 Supply Chain Management, or Dynamics 365 Commerce, or Dynamics 365 Project Operations

Product	Minimum QTY	Minimum purchased Base Licenses
Dynamics 365 Human Resources	5	Dynamics 365 Human Resources
Professional Direct Support	20 (250 maximum - once met all remaining users are covered with no additional licenses required)	All Dynamics applications
Dynamics 365 Additional Interacted People	Tier 1: 1 Tier 2: 4 Tier 3: 5	Dynamics 365 Additional Interacted People Tier 1 Dynamics 365 Additional Interacted People Tier 2 Dynamics 365 Additional Interacted People Tier 3
Dynamics 365 Additional Unified People	Tier 1: 1 Tier 2: 4 Tier 3: 19	Dynamics 365 Additional Unified People Tier 1 Dynamics 365 Additional Unified People Tier 2 Dynamics 365 Additional Unified People Tier 3

Service Specific Terms

Notices

The Bing, Bing Maps and Communication Services Notices apply. In addition, Azure Media Services H.265/HEVC Encoding, H.264/AVC Visual Standard, and VC-1 Video Standard apply only to Dynamics 365 Commerce. (refer to Notices)

External Users

External Users of Dynamics 365 Services do not need a SL to access the Online Service. This exemption does not apply to (1) contractors or agents of Customer or its Affiliates, or (2) External Users using Dynamics 365 client software with Dynamics 365 Services other than services or components included in Dynamics 365 Supply Chain Management, Dynamics 365 Finance, Dynamics 365 Commerce, Dynamics 365 Human Resources, or Dynamics 365 Project Operations.

Administration Portal

Customers with Dynamics 365 Supply Chain Management, Dynamics 365 Finance, Dynamics 365 Commerce, Dynamics 365 Human Resources, or Dynamics 365 Project Operations SLs may deploy and manage the Online Service through Microsoft Dynamics Lifecycle Services (or its successor), which is subject to separate terms.

Mixed deployments of Dynamics 365 services

Customers may mix (i) Dynamics 365 Sales Professional and Enterprise licenses, (ii) Dynamics 365 Customer Service Professional and Enterprise licenses, or (iii) Dynamics 365 Business Central and any of the following: Dynamics 365 Finance, Dynamics 365 Supply Chain Management, or Dynamics 365 Project Operations licenses if,

- Each Online Service is deployed under a separate instance, and
- Licensed users only access instances for which they are entitled.

Third-Party Funds Transfers

Certain Dynamics 365 services may make third-party services available that allow Customer to transfer funds to Customer's end users or other recipient using that third-party service. Customer's use of any third-party service to transfer funds is governed by the terms and

conditions of that third-party service. The third-party service provider is solely responsible for the receipt and transmission of funds. Microsoft is not responsible for any aspect of the third-party service and does not at any point hold, own or control funds, actually or constructively receive, take possession of or hold any money or monetary value for transmission, or advertise, solicit or hold itself out as receiving money for transmission.

Dynamics 365 Customer Insights

Promotional Laws, Regulations, and Industry Standards

Microsoft bears no responsibility for Customer's compliance with any applicable law, regulation, or industry standard governing the Customer's transmittal of promotional communications.

Dynamics 365 Supply Chain Management, Finance, Commerce, and Project Operations Source Code

Customer may modify for its internal use the X++ application layer source code for Dynamics 365 Supply Chain Management, Dynamics 365 Finance, Dynamics 365 for Commerce, or Dynamics 365 Project Operations.

Server Use Rights for Dynamics 365 User SLs, From SA User SLs and Add-on User SLs

The server use rights provisions below do not apply to Customers licensed for Dynamics 365 for Sales Professional, Dynamics 365 Customer Service Professional, Dynamics 365 Customer Insights, Dynamics 365 for Human Resources, or Customers licensed for Dynamics 365 online services through Open License, Open Value and Open Value Subscription.

Dynamics 365 for Operations on-premises Server

Customer's with active subscriptions for (1) Dynamics 365 Plan or (2) Dynamics 365 Unified Operations Plan (or any separately licensed component of the Plan) may,

- install any number of copies of the Dynamics 365 for Operations Server software on a network server or shared servers;
- install and use Dynamics AX 2012 R3 Server software in lieu of Dynamics 365 for Operations Server;
- allow access to the server software only to users and devices assigned a qualifying SL;
- receive and use updates related to government tax and regulatory requirements on the server software; and
- modify or create derivative works of plug-ins, runtime, and other components identified in printed or online documentation and use those derivative works, but only with the server software and only for Customer's internal purposes.

Dynamics 365 on-premises Server

Customers with active subscriptions for (1) Dynamics 365 Plan or (2) Dynamics 365 Customer Engagement Plan (or any separately licensed component of the Plan) may,

- install any number of copies of Dynamics 365 server (on-premises) software on a network server or shared servers;
- install Dynamics CRM 2016 Server software in lieu of Dynamics 365 On-Premise Server;
- allow access to the server software only to users and devices assigned a qualifying SL; and
- allow users and devices assigned one of the following CALs to access the version of the server software that is current as of the subscription start date: Dynamics 365 On-premises for Sales, Customer Service or Team Members CALs; or Dynamics CRM CAL. Users and devices assigned CALs with active Software Assurance may access new versions of the server software.

Dynamics 365 Business Central on-premises

Customers with active subscriptions for Dynamics 365 Business Central may,

- install any number of copies of Dynamics 365 Business Central on-premises software on a network server or shared servers;
- allow access to the server software only to users and devices assigned a qualifying SL; and
- allow users and devices assigned one of the following CALs to access the version of the server software that is current as of the subscription start date: Dynamics 365 Business Central Premium, Essentials, or Team Member CALs. Users and devices assigned CALs with an active maintenance plan may access new versions of the server software.

Microsoft Relationship Sales

Microsoft Relationship Sales includes Dynamics 365 for Sales Enterprise and LinkedIn Sales Navigator Advanced Plus Edition. LinkedIn Sales Navigator Advanced Plus Edition is for the sole use of the Microsoft Relationship Sales Licensed User for the duration of the subscription.

LinkedIn Sales Navigator

LinkedIn Sales Navigator is provided by LinkedIn Corporation. Customer may use the LinkedIn Sales Navigator Service only to generate sales leads. Each user of LinkedIn Sales Navigator must be a member of LinkedIn and agree to be bound by the LinkedIn User Agreement available at https://www.linkedin.com/legal/preview/user-agreement. Despite anything to the contrary in Customer's volume licensing agreement (including these Product Terms), the LinkedIn Privacy Policy available at https://www.linkedin.com/legal/privacy-policy will apply to Customer's use of the LinkedIn Sales Navigator service. LinkedIn Corporation (as data processor) and Customer (as data controller) will comply with the terms of the LinkedIn Data Processing Agreement located at https://legal.linkedin.com/dpa.

Dynamics 365 for Operations Order Lines

Users or devices do not require an SL to indirectly (not through a client UI) execute the transaction types designated in the Dynamics 365 Licensing Guide (https://go.microsoft.com/fwlink/?LinkId=866544&clcid=0x409). The number of allowed transactions is limited to the number of order lines licensed.

Dynamics 365 Customer Insights

Microsoft Provided Data and Insights

Dynamics 365 Customer Insights may include Microsoft provided data and insights (including, but not limited to, market segment and brand affinity data and insights), which Customer may use for internal business purposes only.

Dynamics 365 Fraud Protection

Dynamics 365 Fraud Protection (DFP) processes Customer Data of DFP Customers as described in the Microsoft Dynamics 365 Trust Center to provide the service, which includes providing insights to Customer about the likelihood of fraud for the Customer's payment transactions and other fraud-related events ("Fraud Insights"). Customer acknowledges and agrees that (i) the Customer Data provided to the Online Service will be deidentified and combined with deidentified Customer Data of other D365 Fraud Protection Customers; (ii) Customer will be unable to access, extract, or delete the deidentified Customer Data that is used to generate Fraud Insights; and (iii) when Customer's subscription to Dynamics 365 Fraud Protection ends, Microsoft will continue to process the deidentified Customer Data for the sole purpose of providing Fraud Insights to other Dynamics 365 Fraud Protection Customers. Fraud Insights generated by Microsoft do not reveal Customer Data or other identifiable information of any Customer using Dynamics 365 Fraud Protection.

Restrictions on Use

Customer may only use the Fraud Insights to prevent fraud and help identify legitimate transactions. Customer agrees it will not use Fraud Insights (i) as the sole factor in determining whether to proceed with a payment transaction; (ii) as a factor in determining any person's financial status, financial history, creditworthiness, or eligibility for insurance, housing, or employment; or (iii) to make decisions that produce legal effects or significantly affect a person. Microsoft, in providing Dynamics 365 Fraud Protection, is not a "credit reporting agency" and does not provide "consumer reports" or "credit referencing" (as those practices are defined in the United States' Fair Credit Reporting Act, the United Kingdom's Financial Services and Markets Act, or similar laws).

Customer agrees to comply with any additional restrictions on the use of the Fraud Insights, as Microsoft may deem necessary. Customer shall confirm its compliance with the restriction on use of the Fraud Insights to Microsoft in writing within ten (10) days of receiving a request to do so by Microsoft. If Microsoft needs additional information to assure compliance with these restrictions, Customer will cooperate with Microsoft to provide such information, including documentation, within 30 business days of request.

Communication Services

Certain Dynamics 365 services have voice and text services provided by Azure Communication Services. For these services, the Azure Communication Services terms below apply.

Customer Responsibility

Azure Communication Services ("ACS") is a developer product and an input to customers' applications. Customers are solely liable for their applications or offerings that incorporate Azure Communication Services capabilities and services.

Notices

The H.264/AVC Visual Standard notice in Notices section applies.

Recording and Transcription

It is your responsibility to ensure that the users of your application are notified when recording or transcription are enabled in a call or meeting. Microsoft will indicate to you via the Azure Communication Services API that recording or transcription has commenced and you must communicate this fact, in real time, to your users within your application's user interface.

Microsoft Teams Interoperability

Interoperability between Azure Communication Services and Microsoft Teams enables your applications and users to participate in Teams calls, meetings, and chat. In addition to existing charges in Teams for PSTN connectivity, you will be charged consumption fees in Azure Communication Services.

When Teams users join Teams meetings on the Teams clients then the call is covered by your Teams licenses. When a user makes a call using Azure Communication Services or when a Teams user makes a call with ACS calling SDK it will be charged based on Azure Communication Services fees.

License Terms Precedence

Some Azure Communication Services, including private previews and Previews, may be provided under a separate license, such as an open-source license. In the event of a conflict between these terms and any separate license, the separate license will prevail with respect to the Azure Communication Service that is the subject of such separate license. Each party reserves all rights (and no one receives any rights) not expressly granted by the foregoing licenses.

End User Information

Except in instances required by law or regulation, Microsoft does not retain information that identifies individual end users. Customer acknowledges that, should it delete or de-link end user identifying information in its possession, Microsoft shall have no responsibility to reconstitute the information.

Defense of Claims

You agree to defend, hold harmless, and indemnify Microsoft and its directors, officers, employees, affiliates, and agents from and against any and all demands, assertions, and legal proceedings brought by any third party (and all resulting judgments, settlements and expenses (including reasonable attorneys' fees and costs)) arising from a material breach of these terms by you or your subcontractors, agents, employees, or customers. This includes, without limitation, breach of the obligation to comply with applicable telemarketing laws and the U.S. Telephone Consumer Protection Act of 1991.

Messaging Application

ACS SMS and MMS services involve an integration between Microsoft and the underlying carrier, aggregator, or operator ("Operator"). Microsoft must share application details and/or campaign information with the Operator to ensure that the program meets regulatory guidelines and standards set by operators. The Operator is the final reviewer and approver of your service application. If the details you provide on your application change, it is your responsibility to resubmit your application with up-to-date information. By submitting an application, you agree that Microsoft may share the application details as necessary for provisioning the ACS messaging service.

Messaging Policy

Customer and its end users shall comply with the Azure Communication Services Messaging Policy. The Messaging Policy applies to SMS, MMS, and email communications. Microsoft reserves the right to suspend or remove access to Azure Communication Services for Customer or its end users that do not comply with the Messaging Policy. The Messaging Policy is available at https://docs.microsoft.com/azure/communication-services/concepts/telephony-sms/messaging-policy.

Data Use and Access for Abuse Monitoring

As part of providing the Azure OpenAI service for Dynamics 365, Microsoft will store Inputs and Output Content, solely for debugging and to monitor for and prevent abusive or harmful uses or outputs of the service. Authorized Microsoft employees may review such data that has triggered our automated systems to investigate and verify potential abuse.

Add-ons

Customer may acquire Add-ons subject to the following conditions:
1. Customer must have active SA or an active User SL for the corresponding Qualifying Licenses
2. Customer may acquire one Add-on SL for each Qualifying License(s), unless provided otherwise in these terms
3. Customer may acquire add-on SLs between true-up dates in advance of the acquisition of the Qualifying Licenses

Add-ons expire upon the earlier of the expiration of the SA coverage for the Qualifying License or the Add-on SL term, unless provided otherwise in these terms. Add-ons may only be reassigned to users or devices with Qualifying Licenses.

Microsoft Dynamics 365 Services

Qualifying License(s)	Add-on User Subscription License(s)
Dynamics 365 Team Members User CAL	Dynamics 365 Team Members Add-on
Dynamics 365 Sales User CAL	Dynamics 365 Sales Professional Add-on
	Dynamics 365 Sales Enterprise Add-on
Dynamics 365 Customer Service User CAL	Dynamics 365 Customer Service Professional Add-on
	Dynamics 365 Customer Service Enterprise Add-on

From SA

Customer may acquire From SA SLs instead of SA for fully paid, perpetual Licenses subject to the following conditions:
1. Customer has active SA or is renewing coverage for the corresponding Qualifying Licenses
2. Customer acquires no more than one From SA SL for each Qualifying License, unless provided otherwise in these terms
3. Customer acquires From SA SLs at Enrollment anniversary or renewal

Enterprise Agreement Subscription (EAS) customers with continuous subscription coverage on Qualifying Licenses for no less than three years may purchase the corresponding From SA SLs. Customers renewing an agreement may renew From SA SLs up to the number of corresponding From SA SLs expiring.

As a one-time exception, when transitioning from per device licensing to per user From SA licensing for the first time, customer may purchase a greater number of From SA User SLs, if (1) Customer purchases a From SA User SL for all users of its Qualified Devices, and (2) in the case of Windows Desktop Operating System licenses, Customer adds devices as necessary to comply with the Primary User requirement in the Windows Desktop Operating System.

Microsoft Dynamics 365 Services

Dynamics Price List (DPL) customers with an active Dynamics Enhancement Plan for the Qualifying Licenses may purchase the corresponding Dynamics 365 From SA SLs. Volume Licensing and Dynamics Price List (DPL) customers are eligible to license the From SA SLs in a licensing program other than the one the Qualifying License was acquired.

Power BI Report Server - Running Instances

For each Microsoft Power BI Premium P subscription license, Customer may run any number of Instances of the Power BI Report Server software in a Physical OSE or Virtual OSE on a Server dedicated to Customer's user or a Virtual OSE on shared servers on Microsoft Azure Services only. Servers used for this purpose, that are under the management or control of an entity other than Customer or one of its Affiliates, are subject to the Outsourcing Software Management clause. Customer may run the Power BI Report Server software in a Physical or Virtual OSE with up to the number of cores included under its Power BI Premium P plan. If any Virtual Core is at any time mapped to more than one Hardware Thread, Customer needs an additional subscription license for each additional Hardware Thread mapped to that Virtual Core.

Power BI Report Server - Sharing Content

A Power BI Pro User SL is required to publish shared Power BI reports using the Power BI Report Server.

SQL Server Technology

Customer may run any number of Instances of any SQL Server database software (SQL Server Standard) included in Power BI Report Server in one OSE on a Server for the limited purpose of supporting Power BI Report Server and any other product that includes SQL Server database software. Servers used for this purpose, that are under the management or control of an entity other than Customer or one of its Affiliates, are subject to the Outsourcing Software Management clause.

Professional Direct Support

Customer must acquire enough Professional Direct Support licenses to cover each Dynamics 365 and Power Platform license on its agreement, up to a maximum of 250 licenses.

License Prerequisites

User License	User License Prerequisites
Power Automate unattended RPA add-on	Power Automate per user with attended RPA plan, or Power Automate per flow plan
Power BI Premium Add-On	Power BI Pro, or Microsoft 365 A5/E5, or Office 365 A5/E5

User License	User License Prerequisites
Power Virtual Agents capacity add-on	Power Virtual Agents
Power Automate Hosted RPA add-on	Power Automate Premium per user plan
Power Automate Process Mining add-on	Power Automate Premium per user plan
Power Platform Requests add-on	Power Apps, or Power Automate, or O/M365[1], or Dynamics 365[2]

[1]Select licenses as identified here [2]Select licenses as identified here

Purchasing Minimums - All Programs

Purchases of the following products require a minimum purchase of the Licenses listed in the table below. These minimums must be maintained through the term of the customers Agreement or Enrollment:

Product	Minimum QTY
AI Builder capacity add-on	Tier 1: 1 Tier 2: 10 Tier 3: 50
Power Apps portals login capacity add-on	Tier 1: 1 Tier 2: 10 Tier 3: 50
Power Apps plan (2000 Seat Minimum) (User SL)	2000
Power Automate per flow plan	5
Professional Direct Support	20 (250 maximum - once met, all remaining users are covered with no additional licenses required)
Power Pages Authenticated capacity pack	Tier 1: 1 Tier 2: 100 Tier 3: 1000
Power Pages Anonymous capacity pack	Tier 1: 1 Tier 2: 20 Tier 3: 200

Power Pages - Extended Use rights

Purchases of the following products provide internal users the use rights for Power Pages

Product	Custom Power Pages use rights
Dynamics 365 Enterprise license[1]	Power Pages that map to licensed Dynamics 365 application context and, Power Pages that map to the same environment as the licensed Dynamics 365 application
Power Apps per app	1 Power Page
Power Apps per user	Unlimited Power Pages

[1]Dynamics 365 Sales Enterprise, Dynamics 365 Customer Service Enterprise, Dynamics 365 Field Service, Dynamics 365 Project Operations, Dynamics 365 Finance, Dynamics 365 Supply Chain Management, Dynamics 365 Commerce, Dynamics 365 Human Resources, Dynamics 365 Business Central.

Service Specific Terms

Notices

The Bing, Bing Maps, Communication Services, H.264/AVC Visual Standard, and VC-1 Video Standard Notices apply. (refer to Notices)

Inactive Dataverse Instances provided with Microsoft 365 licenses

If a Customer allows its Dataverse instance that is provided with Microsoft 365 licenses to go inactive, Microsoft may, at its discretion, disable the inactive instance and delete the Customer Data and Personal Data within it. Such Dataverse instance is inactive if for 90 days 1) no user logged into the instance, 2) no apps, bots, reports or flows have accessed the data contained in the instance, 3) no new apps, bots, reports, or flows were installed on or imported into the instance, and 4) no other actions or activities are registered in this instance through API or background processing jobs.

Microsoft Power BI

Definitions

"Customer Application" means an application or any set of applications that adds primary and significant functionality to the Embedded Capabilities and that is not primarily a substitute for any portion of Microsoft Power BI services.

"Embedded Capabilities" means the Power BI APIs and embedded views for use by an application.

Hosting Exception for Embedded Capabilities

Customer may create and maintain a Customer Application and, despite anything to the contrary in Customer's volume licensing agreement, combine Embedded Capabilities with Customer Data owned or licensed by Customer or a third party, to create a Customer Application using the Embedded Capabilities and the Customer Data together. Any Power BI content accessed by the Customer Application or its end users must be stored in Microsoft Power BI Premium capacity. Customer may permit third parties to access and use the Embedded Capabilities in connection with the use of that Customer Application. Customer is responsible for that use and for ensuring that these terms and the terms and conditions of Customer's volume licensing agreement are met by that use.

Limitations

Customer may not

- resell or redistribute the Microsoft Power BI services, or
- allow multiple users to directly or indirectly access any Microsoft Power BI feature that is made available on a per user basis.

Access without a User SL

A User SL is not required to view content in Power BI Premium capacity that is shared through the embed APIs or embedded views functionality. With Power BI Premium P series only, a User SL is also not required to view content in Power BI Premium capacity that is shared through the apps or email subscription features, or through Power BI Report Server.

Publish to Web

Customer may use the publish to web functionality to share content only on a publicly available website. Customer may not use this functionality to share content internally. Microsoft may display content published through the publish to web functionality on a public website or gallery.

Microsoft Power Apps

Restricted Tables

Customer may not create, modify, or delete any data from tables of the type designated as "restricted" in product documentation at https://go.microsoft.com/fwlink/?linkid=868812. Customer has read-only access to such restricted tables.

Non-Restricted Tables

Users with a Power Apps license may create, read, update, or delete any data from tables of the type that are not designated as "restricted" in product documentation at https://go.microsoft.com/fwlink/?linkid=868812.

Distributable Code

Customer may use the "Wrap" feature of Power Apps to generate a software package containing a canvas app combined with certain Power Apps mobile platform components. Customer may distribute the combined package unmodified under the terms set forth in the Distributable Code section of the Universal License Terms for Software. Customer may not disassemble the combined package or distribute any components separated from the combined package.

Updates

Customer may be required to update the package generated from the "Wrap" feature of Power Apps to ensure packages are running on a supported version of the Power Apps mobile platform. Packages running on unsupported versions may not function.

Data Use and Access for Abuse Monitoring

As part of providing the Azure OpenAI service for Power Platform, Microsoft will store Inputs and Output Content, solely for debugging and to monitor for and prevent abusive or harmful uses or outputs of the service. Authorized Microsoft employees may review such data that has triggered our automated systems to investigate and verify potential abuse.

Office 365 Services

General Service Terms

Notices

The Bing Maps and Communication Services Notices apply (refer to Notices). Any onboarding, migration, or deployment services provided to Customer are subject to the Professional Services terms (refer to Professional Services terms).

Core Features for Office 365 Services

During the term of Customer's subscription, the Office 365 Services will substantially conform to the Core Features description provided (if any) in the Office 365 service-specific sections, subject to Product restrictions or external factors (such as the recipient, message rate, message size and mailbox size limits for e-mail; default or Customer-imposed data retention policies; search limits; storage limits; Customer or end user configurations; and meeting capacity limits). Microsoft may permanently eliminate a functionality specified in the Office 365 service specific sections only if it provides Customer a reasonable alternative functionality.

Administration Portal

Customer will be able to add and remove end users and domains, manage licenses, and create groups through the Microsoft Online Services Portal or its successor site.

Office 365 Education

If Customer's billing address is outside Europe and Customer has an Office 365 Education subscription, then notwithstanding the "Location of Customer Data at Rest for Core Online Services" section of these terms, Microsoft may provision Customer's Office 365 tenant in, transfer Customer Data to, and store Customer Data at rest anywhere within Europe or North America. If Customer's billing address is in Europe and Customer has an Office 365 Education subscription, then notwithstanding the "Location of Customer Data at Rest for Core Online Services" section of these terms, Microsoft may provision Customer's Office 365 tenant in, transfer Customer Data to, and store Customer Data at rest anywhere within the European Union.

Service Encryption with Customer Key

Customer assumes all risks of data deletion, inaccessibility, and service outages that result from any unavailability of an encryption key caused by Customer.

Cortana

The Cortana core platform service integrated within Office 365 Services, in certain instances, may allow for users to connect to Microsoft services outside the Office 365 Services; if permitted by Customer, users electing to use such services are subject to terms of use other than theses Product Terms for use of such services and with respect to which Microsoft is a data controller, as identified in product documentation.

Microsoft Threat Experts

Any services provided to Customer through the Microsoft Threat Experts service are subject to the Professional Services terms (refer to Professional Services).

Endpoint Compliance Features

If Customer does not have an active subscription to Microsoft Defender for Endpoint, an instance will automatically be provisioned for the limited purpose of enabling the endpoint features of the Compliance Services.

Yammer

For Office 365 Services that include Yammer, External Users invited to Yammer via external network functionality do not need User SLs.

Audio Services

Availability

Product	Program Attribute

General Service Terms

Notices

The Bing Maps and Communication Services Notices apply (refer to Notices). Any onboarding, migration, or deployment services provided to Customer are subject to the Professional Services terms (refer to Professional Services terms).

Core Features for Office 365 Services

During the term of Customer's subscription, the Office 365 Services will substantially conform to the Core Features description provided (if any) in the Office 365 service-specific sections, subject to Product restrictions or external factors (such as the recipient, message rate, message size and mailbox size limits for e-mail; default or Customer-imposed data retention policies; search limits; storage limits; Customer or end user configurations; and meeting capacity limits). Microsoft may permanently eliminate a functionality specified in the Office 365 service specific sections only if it provides Customer a reasonable alternative functionality.

Administration Portal
Customer will be able to add and remove end users and domains, manage licenses, and create groups through the Microsoft Online Services Portal or its successor site.

Office 365 Education

If Customer's billing address is outside Europe and Customer has an Office 365 Education subscription, then notwithstanding the "Location of Customer Data at Rest for Core Online Services" section of these terms, Microsoft may provision Customer's Office 365 tenant in, transfer Customer Data to, and store Customer Data at rest anywhere within Europe or North America. If Customer's billing address is in Europe and Customer has an Office 365 Education subscription, then notwithstanding the "Location of Customer Data at Rest for Core Online Services" section of these terms, Microsoft may provision Customer's Office 365 tenant in, transfer Customer Data to, and store Customer Data at rest anywhere within the European Union.

Service Encryption with Customer Key

Customer assumes all risks of data deletion, inaccessibility, and service outages that result from any unavailability of an encryption key caused by Customer.

Cortana

The Cortana core platform service integrated within Office 365 Services, in certain instances, may allow for users to connect to Microsoft services outside the Office 365 Services; if permitted by Customer, users electing to use such services are subject to terms of use other than theses Product Terms for use of such services and with respect to which Microsoft is a data controller, as identified in product documentation.

Microsoft Threat Experts

Any services provided to Customer through the Microsoft Threat Experts service are subject to the Professional Services terms (refer to Professional Services).

Endpoint Compliance Features

If Customer does not have an active subscription to Microsoft Defender for Endpoint, an instance will automatically be provisioned for the limited purpose of enabling the endpoint features of the Compliance Services.

Yammer

For Office 365 Services that include Yammer, External Users invited to Yammer via external network functionality do not need User SLs.

Service Specific Terms

Core Features for Office 365 Services

Instant Messaging
An end user will be able to transfer a text message to another end user in real time over an Internet Protocol network.

Presence
An end user will be able to set and display the end user's availability and view another end user's availability.

Online Meetings
An end user will be able to conduct an Internet-based meeting that has audio and video conferencing functionality with other end users.

Notices

The Communication Services and H.264/AVC and/or VC-1 Notices apply (refer to Notices).

Common Area Communications Device

A Common Area Communication Device ("CACD") is a device shared by multiple users who do not log into the device with their Office 365 credentials and which supports calls, meetings and/or conferencing over voice, Voice over IP, and/or video. Microsoft's Common Area Phone and Teams Rooms offerings are Device SLs that may only be assigned to a CACD. Each CACD Licensed Device may be accessed and used by any number of users.

Calling Plan and Audio Conferencing Services (Calling/Conferencing Services)

Exceeding the usage limitations for the applicable Calling and Conferencing service subscription plan as described in the terms of use may result in suspension of the services. Microsoft will provide reasonable notice before suspending Calling or Conferencing services, and customer will be able to make emergency calls during any period of suspension.

Operator Connect

Operator Connect includes Operator Connect for Microsoft Teams and Microsoft Teams Phone Mobile. Microsoft is an independent controller of Personal Data processed in connection with Operator Connect. Customer agrees to, and must notify its end users of, the following:

Operator Connect enables Teams end users to communicate with others through telephony networks via Microsoft Teams.

When Operator Connect is enabled by your organization, Microsoft shares information with your organization's communication services carrier (the Operator) to ensure the proper functioning of your Operator's service.

Information Microsoft shares with your Operator when you use Operator Connect includes:

- end user phone numbers;
- call details and call quality data, such as caller and call recipient phone numbers; call invite and end times; call duration; certain caller identifiers; and information about service connections (e.g., IP addresses and operating systems of the caller and call recipient); and
- end user location information for emergency calling.

Operators will be able to export and download the information listed above.

This information will be handled by your Operator in accordance with your Operator's privacy practices. For more information, refer to your Operator's privacy policy and terms of use. For information about how Microsoft will handle this Personal Data, please refer to the Microsoft Privacy Statement at https://go.microsoft.com/fwlink/?LinkId=521839.

License Prerequisites

License	License Prerequisites
Microsoft Defender for Office 365 Plan 1/Plan 2	Any Microsoft 365, Office 365, Exchange Online, SharePoint Online or OneDrive for Business plan license
Office 365 Data Loss Prevention	Any Microsoft 365, Office 365, Exchange Online, SharePoint Online or OneDrive for Business plan license

General Service Terms

Notices

The Bing Maps and Communication Services Notices apply (refer to Notices). Any onboarding, migration, or deployment services provided to Customer are subject to the Professional Services terms (refer to Professional Services terms).

Core Features for Office 365 Services

During the term of Customer's subscription, the Office 365 Services will substantially conform to the Core Features description provided (if any) in the Office 365 service-specific sections, subject to Product restrictions or external factors (such as the recipient, message rate, message size and mailbox size limits for e-mail; default or Customer-imposed data retention policies; search limits; storage limits; Customer or end user configurations; and meeting capacity limits). Microsoft may permanently eliminate a functionality specified in the Office 365 service specific sections only if it provides Customer a reasonable alternative functionality.

Administration Portal
Customer will be able to add and remove end users and domains, manage licenses, and create groups through the Microsoft Online Services Portal or its successor site.

Office 365 Education

If Customer's billing address is outside Europe and Customer has an Office 365 Education subscription, then notwithstanding the "Location of Customer Data at Rest for Core Online Services" section of these terms, Microsoft may provision Customer's Office 365 tenant in, transfer Customer Data to, and store Customer Data at rest anywhere within Europe or North America. If Customer's billing address is in Europe and Customer has an Office 365 Education subscription, then notwithstanding the "Location of Customer Data at Rest for Core Online Services" section of these terms, Microsoft may provision Customer's Office 365 tenant in, transfer Customer Data to, and store Customer Data at rest anywhere within the European Union.

Service Encryption with Customer Key

Customer assumes all risks of data deletion, inaccessibility, and service outages that result from any unavailability of an encryption key caused by Customer.

Cortana

The Cortana core platform service integrated within Office 365 Services, in certain instances, may allow for users to connect to Microsoft services outside the Office 365 Services; if permitted by Customer, users electing to use such services are subject to terms of use other than theses Product Terms for use of such services and with respect to which Microsoft is a data controller, as identified in product documentation.

Microsoft Threat Experts

Any services provided to Customer through the Microsoft Threat Experts service are subject to the Professional Services terms (refer to Professional Services).

Endpoint Compliance Features

If Customer does not have an active subscription to Microsoft Defender for Endpoint, an instance will automatically be provisioned for the limited purpose of enabling the endpoint features of the Compliance Services.

Yammer

For Office 365 Services that include Yammer, External Users invited to Yammer via external network functionality do not need User SLs.

Service Specific Terms

Core Features for Office 365 Services - Exchange Online

Exchange Online or its successor service will have Core Features capabilities stated in the General Terms:

Emails
An end user will be able to send email messages, receive email messages that originate from within and outside of Customer's organization, and access the end user's mailbox.

Mobile and Web Browser Access

Through the Microsoft Exchange ActiveSync protocol or a successor protocol or technology, Exchange Online will enable an end user to send and receive emails and update and view calendars from a mobile device that adequately supports such a protocol or technology. An end user will be able to send email messages, receive email messages that originate from within and outside of Customer's organization, and access the end user's mailbox, all from within a compatible web browser.

Retention Policies

Customer will be able to establish archive and deletion policies for email messages.

Deleted Item and Mailbox Recovery

Customer will be able to recover the contents of a deleted mailbox and an end user will be able to recover an item that has been deleted from one of the end user's email folders.

Multi-Mailbox Search

Customer will be able to search for content across multiple mailboxes within its organization.

Calendar

An end user will be able to view a calendar and schedule appointments, meetings, and automatic replies to incoming email messages.

Contacts

Through an Exchange Online-provided user interface, Customer will be able to create and manage distribution groups and an organization-wide directory of mail-enabled end users, distribution groups, and external contacts.

Core Features for Office 365 Services - Exchange Online Archiving

Exchange Online Archiving or its successor service will have Core Features capabilities stated in the General Service Terms:

Storage

Customer will be able to allow an end user to store email messages.

Retention Policies

Customer will be able to establish archive and deletion policies for email messages distinct from policies that an end user can apply to the end user's own mailbox.

Deleted Item and Mailbox Recovery

Customer, through Office 365 support services, will be able to recover a deleted archive mailbox, and an end user will be able to recover an item that has been deleted from one of the end user's email folders in the end user's archive.

Multi-Mailbox Search

Customer will be able to search for content across multiple mailboxes within its organization.

Legal Hold

Customer will be able to place a "legal hold" on an end user's primary mailbox and archive mailbox to preserve the content of those mailboxes.

Archiving

Archiving may be used for messaging storage only with Exchange Online Plans 1 and 2 and Exchange Online Kiosk.

Archiving for Exchange Server

Users licensed for Exchange Server 2013 Standard Client Access License may access the Exchange Server 2013 Enterprise Client Access License features necessary to support use of Exchange Online Archiving for Exchange Server.

Smartphone and Tablet Devices

Each user to whom Customer assigns an Exchange Online User SL may (i) use Microsoft Outlook for mobile devices for commercial purposes and (ii) sign in to Microsoft Outlook with their work or school account on up to five smartphones and five tablets. Microsoft Outlook is also subject to the Service Specific Terms applicable to M365 Mobile Applications.

Office 365 Data Loss Prevention Device License

If Customer is licensed for Office 365 Data Loss Prevention by Device, all users of the Licensed Device are licensed for the Online Service.

Add-ons

Customer may acquire Add-ons subject to the following conditions:
1. Customer must have active SA or an active User SL for the corresponding Qualifying Licenses
2. Customer may acquire one Add-on SL for each Qualifying License(s), unless provided otherwise in these terms
3. Customer may acquire add-on SLs between true-up dates in advance of the acquisition of the Qualifying Licenses

Add-ons expire upon the earlier of the expiration of the SA coverage for the Qualifying License or the Add-on SL term, unless provided otherwise in these terms. Add-ons may only be reassigned to users or devices with Qualifying Licenses.

Exchange Online

Qualifying License(s)	Add-on User Subscription License(s)
Exchange Standard CAL Core CAL Suite	Exchange Online Plan 1 Add-on (User SL)

Product Conditions - Program Specific	
Student Use Benefit	See Student Use Benefits and Academic Programs

Office View/Print for Office for the Web Users

Users licensed with an Office 365 or Microsoft 365 license may use Microsoft 365 Apps for enterprise in Reduced Functionality Mode to view and print files.

Microsoft 365 Apps for business

Customer may not provision more than 300 user subscription licenses.

General Service Terms

Notices

The Bing Maps and Communication Services Notices apply (refer to <u>Notices</u>). Any onboarding, migration, or deployment services provided to Customer are subject to the Professional Services terms (refer to <u>Professional Services</u> terms).

Core Features for Office 365 Services

During the term of Customer's subscription, the Office 365 Services will substantially conform to the Core Features description provided (if any) in the Office 365 service-specific sections, subject to Product restrictions or external factors (such as the recipient, message rate, message size and mailbox size limits for e-mail; default or Customer-imposed data retention policies; search limits; storage limits; Customer or end user configurations; and meeting capacity limits). Microsoft may permanently eliminate a functionality specified in the Office 365 service specific sections only if it provides Customer a reasonable alternative functionality.

Administration Portal
Customer will be able to add and remove end users and domains, manage licenses, and create groups through the Microsoft Online Services Portal or its successor site.

Office 365 Education

If Customer's billing address is outside Europe and Customer has an Office 365 Education subscription, then notwithstanding the "Location of Customer Data at Rest for Core Online Services" section of these terms, Microsoft may provision Customer's Office 365 tenant in, transfer Customer Data to, and store Customer Data at rest anywhere within Europe or North America. If Customer's billing address is in Europe and Customer has an Office 365 Education subscription, then notwithstanding the "Location of Customer Data at Rest for Core Online Services" section of these terms, Microsoft may provision Customer's Office 365 tenant in, transfer Customer Data to, and store Customer Data at rest anywhere within the European Union.

Service Encryption with Customer Key

Customer assumes all risks of data deletion, inaccessibility, and service outages that result from any unavailability of an encryption key caused by Customer.

Cortana

The Cortana core platform service integrated within Office 365 Services, in certain instances, may allow for users to connect to Microsoft services outside the Office 365 Services; if permitted by Customer, users electing to use such services are subject to terms of use other than theses Product Terms for use of such services and with respect to which Microsoft is a data controller, as identified in product documentation.

Microsoft Threat Experts

Any services provided to Customer through the Microsoft Threat Experts service are subject to the Professional Services terms (refer to <u>Professional Services</u>).

Endpoint Compliance Features

If Customer does not have an active subscription to Microsoft Defender for Endpoint, an instance will automatically be provisioned for the limited purpose of enabling the endpoint features of the Compliance Services.

Yammer

For Office 365 Services that include Yammer, External Users invited to Yammer via external network functionality do not need User SLs.

Service Specific Terms

The following terms apply only to Microsoft 365 Apps for enterprise

Office Home & Student 2013 RT Commercial Use
The commercial use restriction for Office Home & Student 2013 RT is waived for each Microsoft 365 Apps for enterprise User SL. Except as provided in this section, the terms provided with the Office Home & Student 2013 RT License will govern.

Office Online Server

For each Microsoft 365 Apps for enterprise subscription, Customer may install any number of copies of Office Online Server on any Server. Any server that is under the management or control of an entity other than Customer or one of its Affiliates is subject to the Outsourcing Software Management terms. Each Microsoft 365 Apps for enterprise user may use the Office Online Server software. This provision does not apply to Customers that license this Product under the Microsoft Online Subscription Agreement, Microsoft Cloud Agreement, or other Microsoft agreement that cover Online Services only.

Installation and Use Rights

Each user to whom Customer assigns a User SL must have a work or school account in order to use the software provided with the subscription. These users:

- may activate the software provided with the SL on up to five concurrent OSEs for local or remote use;
- may also install and use the software, with shared computer activation, on a shared device, a Network Server, or on Microsoft Azure. This shared computer activation provision only applies to Customers licensed for Microsoft 365 Apps for business when Microsoft 365 Apps for business is licensed as a component of Microsoft 365 Business Premium;
- must connect each device upon which user has installed the software to the Internet at least once every 30 days or the functionality of the software may be affected; and
- may use Internet-connected Online Services provided as part of these licenses [and governed by these terms]. Additionally, if permitted by Customer, users may elect to use connected services subject to terms of use other than these terms and with respect to which Microsoft is a data controller, as identified in product documentation.
    - The Online Services will permit Customer to enable or disable these optional connected services; and
    - Customer is responsible for evaluating, enabling or disabling the availability to its users of optional connected services.

Device-Based Subscription License

Each Device SL permits use of the software provided with the subscription. Users of a Licensed Device:

- may activate and use the software provided on one OSE on the Licensed Device; or
- may install and use the software remotely from the Licensed Device on one OSE on a Network Server, or on Microsoft Azure.

Customer must connect each OSE on which the software is installed to the Internet at least once every 90 days, or the functionality of the software may be affected.

Smartphone and Tablet Devices

Each user to whom Customer assigns a Microsoft 365 Apps for business or Microsoft 365 Apps for enterprise User SL may (i) use Microsoft Office for mobile devices for commercial purposes and (ii) sign in to Microsoft Office with their work or school account on up to five smartphones and five tablets.

When versions of Microsoft Word, Excel, PowerPoint, Outlook, OneDrive, and Teams applications for mobile devices ("M365 Mobile Applications") are used with a work or school account to access Online Services governed by these terms, the terms that govern the relevant Online Service apply to that use of the M365 Mobile Applications. Microsoft's commitments related to M365 Mobile Applications do not extend to data processing, policies, or practices of third-party providers of mobile platforms on which the mobile applications operate (e.g., Apple, Google).

General Service Terms

Notices

The Bing Maps and Communication Services Notices apply (refer to Notices). Any onboarding, migration, or deployment services provided to Customer are subject to the Professional Services terms (refer to Professional Services terms).

Core Features for Office 365 Services

During the term of Customer's subscription, the Office 365 Services will substantially conform to the Core Features description provided (if any) in the Office 365 service-specific sections, subject to Product restrictions or external factors (such as the recipient, message rate, message size and mailbox size limits for e-mail; default or Customer-imposed data retention policies; search limits; storage limits; Customer or end user configurations; and meeting capacity limits). Microsoft may permanently eliminate a functionality specified in the Office 365 service specific sections only if it provides Customer a reasonable alternative functionality.

Administration Portal

Customer will be able to add and remove end users and domains, manage licenses, and create groups through the Microsoft Online Services Portal or its successor site.

Office 365 Education

If Customer's billing address is outside Europe and Customer has an Office 365 Education subscription, then notwithstanding the "Location of Customer Data at Rest for Core Online Services" section of these terms, Microsoft may provision Customer's Office 365 tenant in, transfer Customer Data to, and store Customer Data at rest anywhere within Europe or North America. If Customer's billing address is in Europe and Customer has an Office 365 Education subscription, then notwithstanding the "Location of Customer Data at Rest for Core Online Services" section of these terms, Microsoft may provision Customer's Office 365 tenant in, transfer Customer Data to, and store Customer Data at rest anywhere within the European Union.

Service Encryption with Customer Key

Customer assumes all risks of data deletion, inaccessibility, and service outages that result from any unavailability of an encryption key caused by Customer.

Cortana

The Cortana core platform service integrated within Office 365 Services, in certain instances, may allow for users to connect to Microsoft services outside the Office 365 Services; if permitted by Customer, users electing to use such services are subject to terms of use other than theses Product Terms for use of such services and with respect to which Microsoft is a data controller, as identified in product documentation.

Microsoft Threat Experts

Any services provided to Customer through the Microsoft Threat Experts service are subject to the Professional Services terms (refer to Professional Services).

Endpoint Compliance Features

If Customer does not have an active subscription to Microsoft Defender for Endpoint, an instance will automatically be provisioned for the limited purpose of enabling the endpoint features of the Compliance Services.

Yammer

For Office 365 Services that include Yammer, External Users invited to Yammer via external network functionality do not need User SLs.

Service Specific Terms

Notices

The H.264/AVC Visual Standard, VC-1 Video Standard, and H.265/HEVC Notices apply (refer to Notices).

Stream Live Events

Stream Live Events are subject to the following:

1. Stream Live Events may not be greater than four (4) hours in length;
2. Stream Live Events attendees may not exceed 10,000; and
3. Stream Live Events are limited to fifteen (15) per customer at any single point in time.

Yammer

For Office 365 Services that include Yammer, External Users invited to Yammer via external network functionality do not need User SLs.

Service Specific Terms

Notices

The H.264/AVC Notice applies to all Office 365 Services that include Microsoft Teams (refer to Notices).

External User Entitlements and Meeting Join License Requirements

User SLs are not required for any user to join meetings, webinars, and live events hosted by licensed users. User SLs are also not required for External Users to participate in Teams channels as a Guest with a Microsoft Entra External ID.

Health Sector Customers

Customer is solely responsible for: (1) the accuracy and adequacy of information and Data furnished through use of Microsoft Teams; (2) implementing a secure application-to-application authentication method between any Customer application and/or service and Microsoft Teams; (3) obtaining appropriate consent from end users in connection with end user's and Customer's use of Microsoft Teams; and (4) displaying appropriate warnings, disclaimers, and acknowledgements to end users in connection with end user's and Customers use of Microsoft Teams.

Any information provided by Customer or its patients in Microsoft Teams (including meeting recordings if enabled by Customer, or any Microsoft Teams apps enabling virtual appointment services) that's necessary for medical records continuity or retention purposes should be downloaded, copied, and/or notated directly in such records by Customer. This service does not maintain legal medical record or a designated record set.

Trials

Microsoft Teams Exploratory Experience may only be initiated by individual end users. Customer may not initiate a Microsoft Teams Exploratory Experience on behalf of end user employees. This offer is not valid for users that have formerly used Teams from a paid, unpaid or trial license.

Office for the web

General Service Terms

Notices

The Bing Maps and Communication Services Notices apply (refer to Notices). Any onboarding, migration, or deployment services provided to Customer are subject to the Professional Services terms (refer to Professional Services terms).

Core Features for Office 365 Services

Yammer

For Office 365 Services that include Yammer, External Users invited to Yammer via external network functionality do not need User SLs.

Service Specific Terms

Installation and Use Rights

Each user to whom Customer assigns a User SL must have a work or school account in order to use the software provided with the subscription. These users:

- may activate the software provided with the SL on up to five concurrent OSEs for local or remote use;
- may also install and use the software, with shared computer activation, on a shared device, a Network Server, or on Microsoft Azure. This shared computer activation provision only applies to Customers licensed for Microsoft 365 Apps for business when Microsoft 365 Apps for business is licensed as a component of Microsoft 365 Business Premium;
- must connect each device upon which user has installed the software to the Internet at least once every 30 days or the functionality of the software may be affected; and
- may use Internet-connected Online Services provided as part of these licenses [and governed by these terms]. Additionally, if permitted by Customer, users may elect to use connected services subject to terms of use other than these terms and with respect to which Microsoft is a data controller, as identified in product documentation.
    - The Online Services will permit Customer to enable or disable these optional connected services; and
    - Customer is responsible for evaluating, enabling or disabling the availability to its users of optional connected services.

Customers may deploy eligible products on Amazon WorkSpaces. See Amazon WorkSpaces Deployments for more information.

Add-ons

Customer may acquire Add-ons subject to the following conditions:
1. Customer must have active SA or an active User SL for the corresponding Qualifying Licenses
2. Customer may acquire one Add-on SL for each Qualifying License(s), unless provided otherwise in these terms
3. Customer may acquire add-on SLs between true-up dates in advance of the acquisition of the Qualifying Licenses

Add-ons expire upon the earlier of the expiration of the SA coverage for the Qualifying License or the Add-on SL term, unless provided otherwise in these terms. Add-ons may only be reassigned to users or devices with Qualifying Licenses.

Visio

General Service Terms

Notices

The Bing Maps and Communication Services Notices apply (refer to Notices). Any onboarding, migration, or deployment services provided to Customer are subject to the Professional Services terms (refer to Professional Services terms).

Core Features for Office 365 Services

During the term of Customer's subscription, the Office 365 Services will substantially conform to the Core Features description provided (if any) in the Office 365 service-specific sections, subject to Product restrictions or external factors (such as the recipient, message rate, message size and mailbox size limits for e-mail; default or Customer-imposed data retention policies; search limits; storage limits; Customer or end user configurations; and meeting capacity limits). Microsoft may permanently eliminate a functionality specified in the Office 365 service specific sections only if it provides Customer a reasonable alternative functionality.

Administration Portal
Customer will be able to add and remove end users and domains, manage licenses, and create groups through the Microsoft Online Services Portal or its successor site.

Office 365 Education

If Customer's billing address is outside Europe and Customer has an Office 365 Education subscription, then notwithstanding the "Location of Customer Data at Rest for Core Online Services" section of these terms, Microsoft may provision Customer's Office 365 tenant in, transfer Customer Data to, and store Customer Data at rest anywhere within Europe or North America. If Customer's billing address is in Europe and Customer has an Office 365 Education subscription, then notwithstanding the "Location of Customer Data at Rest for Core Online Services" section of these terms, Microsoft may provision Customer's Office 365 tenant in, transfer Customer Data to, and store Customer Data at rest anywhere within the European Union.

Service Encryption with Customer Key

Customer assumes all risks of data deletion, inaccessibility, and service outages that result from any unavailability of an encryption key caused by Customer.

Cortana

The Cortana core platform service integrated within Office 365 Services, in certain instances, may allow for users to connect to Microsoft services outside the Office 365 Services; if permitted by Customer, users electing to use such services are subject to terms of use other than theses Product Terms for use of such services and with respect to which Microsoft is a data controller, as identified in product documentation.

Microsoft Threat Experts

Any services provided to Customer through the Microsoft Threat Experts service are subject to the Professional Services terms (refer to Professional Services).

Endpoint Compliance Features

If Customer does not have an active subscription to Microsoft Defender for Endpoint, an instance will automatically be provisioned for the limited purpose of enabling the endpoint features of the Compliance Services.

Yammer

For Office 365 Services that include Yammer, External Users invited to Yammer via external network functionality do not need User SLs.

Service Specific Terms

Notices

Any deployment services provided to Customer are subject to the Professional Services terms (refer to Professional Services terms).

Manage Devices and Applications

Each User to whom Customer assigns a User SL may access and use the Online Services and related software (including System Center software) to manage applications and up to fifteen devices. Management of a device accessed by more than one user requires a User SL for each user. If Intune Company Portal App is used to manage devices, the terms that apply to Microsoft Intune Online Services (as defined in the Core Online Services table in the Online Services Security & Privacy Terms) apply to the use of Intune Company Portal App. Microsoft's commitments related to Intune Company Portal App do not extend to data processing, policies, or practices of third-party providers of mobile platforms on which Intune Company Portal App operates (e.g., Apple, Google).

Microsoft Intune for Devices

Microsoft Intune for Devices may only be linked to devices that are not affiliated with specific users. Product features with user affinity, including but not limited to Conditional Access, App Protection, and optional app installation, cannot be used under Microsoft Intune for Devices SLs. Applications that are typically mapped to specific users, such as Outlook and OneDrive, may not be used under this service.

Storage Add-on SL

A Storage Add-on SL is required for each gigabyte of storage in excess of the storage provided with the base subscription.

Windows Software Components in System Center Software

The System Center software includes one or more of the following Windows Software Components: Microsoft .NET Framework, Microsoft Data Access Components, PowerShell software and certain .dlls related to Microsoft Build, Windows Identity Foundation, Windows Library for JavaScript, Debghelp.dll, and Web Deploy technologies. The license terms governing use of the Windows Software Components are in the Windows 8.1 Pro and Enterprise section of the Product Terms. The Product Terms is located at http://go.microsoft.com/?linkid=9839206.

SQL Server Technology and Benchmarking

The Software included with the Online Service includes SQL Server-branded components other than a SQL Server Database. Those components are licensed to Customer under the terms of their respective licenses, which can be found in the installation directory or unified installer of the software. Customer must obtain Microsoft's prior written approval to disclose to a third party the results of any benchmark test of these components or the software that includes them.

Add-ons

Customer may acquire Add-ons subject to the following conditions:
1. Customer must have active SA or an active User SL for the corresponding Qualifying Licenses
2. Customer may acquire one Add-on SL for each Qualifying License(s), unless provided otherwise in these terms
3. Customer may acquire add-on SLs between true-up dates in advance of the acquisition of the Qualifying Licenses

Add-ons expire upon the earlier of the expiration of the SA coverage for the Qualifying License or the Add-on SL term, unless provided otherwise in these terms. Add-ons may only be reassigned to users or devices with Qualifying Licenses.

Microsoft Intune

Core CAL Suite Bridge for Office 365	
Enterprise CAL Suite Bridge for Office 365	
Core CAL Suite	Microsoft Intune Plan 1 for EDU Add-on (User SL)
Enterprise CAL Suite	
Core CAL Suite Bridge for Office 365	
Enterprise CAL Suite Bridge for Office 365	

Microsoft Search in Bing

Service Specific Terms

Microsoft Search in Bing

"Microsoft Search in Bing" means the service that displays enterprise search results from internal resources (e.g. intranet, files, people information) to Customer users who are logged into the service via their work or school account.

Microsoft Search in Bing Privacy

When a user enters a search query in Microsoft Search in Bing, two simultaneous search requests occur: (1) a search of Customer's internal resources, for which the query and results returned are Customer Data for purposes of these Product Terms, and (2) a separate search of public results from Bing.com, for which the query and results returned are not Customer Data. These Product Terms and the DPA apply only to Microsoft Search in Bing. The Microsoft Privacy Statement located at https://go.microsoft.com/fwlink/?LinkId=521839 applies to public search on Bing.com.

Minecraft: Education Edition

Office 365 Developer

Service Specific Terms

No Production Use of Office 365 Developer

Each user to whom Customer assigns a User SL may use the Online Service to design, develop, and test Customer's applications to make them available for Customer's Office 365 Online Services, on-premises deployments or for the Microsoft Office Store. The Online Service is not licensed for production use.

Office 365 Developer End Users

Customer's end users do not need a SL to access Office 365 Developer to perform acceptance tests or provide feedback on Customer programs.

Windows Autopatch

Windows Autopatch is available with Windows 10/11 Enterprise E3 subscription (or higher).

Service Specific Terms

Managed Service

Windows Autopatch includes an Online Service component and Professional Service Component which is subject to the Professional Services terms (refer to Professional Services).

Data Handling

Windows Autopatch integrates data (including Customer Data) between other Microsoft Products including Microsoft Entra ID, Microsoft Intune, Office, and other Online Services as configured by Customer, if any (collectively for purposes of this provision the "Autopatch Integrated Services"). Once data is transferred within the Autopatch Integrated Services, that data is governed by the Product Terms applicable to the Product in which it resides.

Server Subscriptions for Azure

Availability

Product	Program Attribute
SQL Server Enterprise Core (2 pack of Core Licenses)	
SQL Server Standard (2 pack of Core Licenses)	
Windows Server Active Directory Rights Management Services CAL	
Windows Server CAL	
Windows Server Datacenter (8 pack of Core Licenses)	
Windows Server Remote Desktop Services CAL (User)	
Windows Server Standard (8 pack of Core Licenses)	

Note: Perpetual licenses purchased through CSP are subject to different terms as set forth in the Windows Server and SQL Server sections of these terms.

Product Conditions - General	
Terms of Service	Universal License Terms for all Online Services
Terms of Service (when Using the Software on Customer's Servers)	Universal License Terms for all Software
Product Pool	None
Promotions	None

Version Upgrade Rights

Customers with Server Subscriptions for Azure may use new versions released during the subscription period subject to the Use Rights in effect when those versions are released. Similarly, CAL and External Connector License Subscriptions for Azure permit access to new versions of the corresponding software released during the subscription period.

Deployment Options for Windows Server

Using the Software on Microsoft Azure

Windows Server subscription licenses provide Azure Hybrid Benefit use rights, as stated in the Azure Hybrid Benefit section of the Microsoft Azure terms.

Using the Software on Customer's Servers

Alternatively, Customer may use Windows Server on Customer's Licensed Servers. Except as provided in the "Azure Hybrid Benefit" section, licenses may not be concurrently allocated to Azure. Windows Server Subscription Licenses, and Subscription CALs and External Connector Licenses provide the same rights as other volume licensing Windows Server core licenses, CALs and External Connector Licenses, respectively, subject to the same terms and conditions as stated in Windows Server editions. During the term of its subscription, Customer is additionally granted rights equivalent to the rights provided to SA customers under Extended Security Updates, Windows Server Annual Channel for Containers, Self-Hosting and, Disaster Recovery. Use of the software is subject to the same terms and conditions.

Deployment Options for SQL Server

Using the Software on Microsoft Azure

SQL Server subscription licenses provide Azure Hybrid Benefit use rights, as stated in the Azure Hybrid Benefits section of the Microsoft Azure terms.

Using the Software on Customer's Servers

Alternatively, Customer may use SQL Server on Customer's Licensed Servers. In this case, SQL Server Standard and SQL Server Enterprise Core Subscription Licenses provide the same rights as other volume licensing SQL Server Standard and SQL Server Enterprise core licenses, respectively, subject to the same terms and conditions as stated in SQL Server. During the term of its subscription, Customer is additionally granted rights equivalent to the rights provided to SA customers under Self-Hosting, Disaster Recovery, License Mobility across Server Farms, Fail-over Rights, Extended Security Updates, Unlimited Containers, and Unlimited Virtualization* as well as rights to use Power BI Report Server*. Use of the software is subject to the same terms and conditions.

*Subject to availability. Rights applicable for SQL Server Enterprise Core customers only.

Windows 365

Availability

Product	Program Attribute
Windows 365 Business	
Windows 365 Business (with Windows Hybrid Benefit)

License Assignment

Windows 365 Business License Assignment Eligibility
Windows 365 Business licenses may be assigned to any user.

Windows 365 Frontline License Assignment Eligibility
The <u>Licensed User</u> must be licensed with each of the following: Windows 10/11 Enterprise/Education, Intune, and Microsoft Entra ID P1/P2. In addition to being available independently, all these licenses are also included in Microsoft 365 F3/E3/G3/E5/G5/A3/A5/Business Premium/Student Use Benefit.

Windows 365 Business with Windows Hybrid Benefit License Assignment Eligibility
The <u>Licensed User</u> must be the <u>Primary User</u> of at least one device licensed with Windows 10/11 Pro. This one device must also be the <u>Primary User</u>'s primary work device, and they must access the service from their Windows 10/11 Pro licensed device at least once every subscription term in which the service is used to maintain eligibility for the discounted pricing through Windows Hybrid Benefit.

Windows 365 Enterprise License Assignment Eligibility
The <u>Licensed User</u> must be licensed with each of the following: Windows 10/11 Enterprise/Education, Intune, and Microsoft Entra ID P1/P2. In addition to being available independently, all these licenses are also included in Microsoft 365 F3/E3/G3/E5/G5/A3/A5/Business Premium/Student Use Benefit.

License Reassignment

Replacing a user's Windows 365 Business/Enterprise license with another Windows 365 Business/Enterprise license does not count as "reassignment" and Customer may make such replacements at any time.

Windows 365 Business Maximum License Quantity

Customer may not acquire more than 300 Windows 365 Business/Windows 365 Business with Windows Hybrid Benefit licenses.

Windows 365 Frontline

Each license may be provisioned up to 3 Cloud PCs. Only one Cloud PC can be activated per license.

Service Specific Terms

Network Egress
Microsoft reserves the right to restrict network egress due to high bandwidth usage.

Use as a Server
You may not use the service to perform server functions to devices outside of the service or to third parties.

Distributed Computing
You may not use the service for sustained distributed computing or digital asset transaction validation workloads.

Data Handling
Windows 365 integrates data (including <u>Customer Data</u>) between other Microsoft Products including Microsoft Entra ID, Microsoft Intune, Azure Virtual Desktop, and other Online Services as configured by Customer, if any (collectively for purposes of this provision the "Windows 365 Integrated Services"). Once data is transferred between the Windows 365 Integrated Services, that data is governed by the Product Terms applicable to the Product in which it resides.

Glossary

Terms defined in this Glossary apply unless otherwise defined in product specific terms.

Definitions

Academic Program means Academic Purchasing Account on MPSA, Academic Select License, Select Plus for Academic, Campus and School Agreement, or Open Value Subscription - Education Solutions.

Add-on means a license that is purchased in addition to (and associated with) a previously acquired Qualifying License (or set of Qualifying Licenses). An Add-on license is assigned to a single Qualified User (as defined in Customer's Enrollment) or to the same Server or device as the Qualifying License(s). For any Add-on User SL not appearing individually, the license terms applicable to a full User SL for the same service apply.

Additive CAL means a CAL that must be used on conjunction with a base CAL.

Additive External Connector License means an External Connector License that must be used in conjunction with a base External Connector License.

Allocated Annual prepayment means, if Customer elects annual invoicing, the portion of the Azure prepayment allocated annually through the Enrollment term.

Authorized Outsourcer means any third party service provider that is not a Listed Provider and is not using Listed Provider as a Data Center Provider as part of the outsourcing service.

Azure compute savings plan means a commitment to spend a specified monetary amount each hour on eligible Microsoft Azure Services for a specified term.

Azure Facial Recognition Services means facial recognition features or functionality included in Azure Services, such as Face; or the facial recognition functionality in Azure Video Analyzer for Media.

Azure Government Services means one or more of the services or features Microsoft makes available to Customer as Government Community Cloud Services in the "US Gov" regions identified at http://azure.microsoft.com/en-us/regions/#services.

Azure Prepayment means the total monetary amount a customer commits to pay during the term of the subscription for its use of eligible Microsoft Azure Services.

Azure Private MEC Solution means a combined software and hardware private multi-access edge compute offering which includes Azure Network Function Manager.

Azure reservations means an advanced purchase of eligible Microsoft Azure Services for a specified term and region (e.g. Reserved VM Instances, reserved capacity, etc.).

Bing Search Services means the Bing Custom Search, Bing Local Business Search, Entity Search, Image Search, News Search, Video Search, Visual Search, Web Search, Spell Check, and Autosuggest APIs, and any other APIs identified at https://aka.ms/r1j7jq.

Bing Search Services Data means Customer Data that are provided to Microsoft by, or on behalf of, Customer through use of the Bing Search Services.

CAL means client access license, which may be assigned by user or device, as appropriate. A user CAL allows access to corresponding version of the server software or earlier versions of the server software from any device by one user. A device CAL allows access to corresponding versions of the server software or earlier versions of the server software from one device by any user. CALs allow access to server software running on Customer's Licensed Servers only.

CAL Equivalent License means a User SL or External Connector License identified in a Product's "Server Software Access" table, or a CAL suite or SL, as identified in CAL and ML Equivalency Licenses, as applicable. A CAL suite is a CAL Equivalent License only if Customer purchased the License after the Server Product's Date Available or if Customer had active SA coverage as of the Date Available.

Client OSE means an OSE running a client operating system.

Clustered HPC Application means a high performance computing applications that solves, in parallel, complex computational problems, or a set of closely related computational problems. Clustered HPC Applications divide a computationally complex problem into a set of jobs and tasks which are coordinated by a job scheduler, such as provided by Microsoft HPC Pack, or similar HPC middleware, which distributes these in parallel across one or more computers operating within an HPC cluster.

Cluster Node means a device that is dedicated to running Clustered HPC Applications or providing job scheduling services for Clustered HPC Applications.

Consumption Rates means the prices for Microsoft Azure Services or, for certain Microsoft Azure Service Plans, any usage in excess of a specified quantity. Consumption Rates may also be referred to as "Overage Rates" or "Overage" in other Microsoft or Microsoft Azure documents.

Copilot means a Microsoft Generative AI Service that is identified as a 'Copilot.'

Core Factor means a numerical value associated with a specific Physical Processor for purposes of determining the number of Licenses required to license all of the Physical Cores on a Server.

Core Online Services means those Online Services listed as Core Online Services in the Privacy & Security Terms section.

Covered Product means any Microsoft Copilot or Bing Chat Enterprise Product that is available for a fee through Microsoft volume licensing.

Customer Data means all data, including all text, sound, video, or image files, and software, that are provided to Microsoft by, or on behalf of, Customer through use of the Online Service. Customer Data does not include Professional Services Data.

Customer Health Bot Application means an application or any set of applications that adds primary and significant functionality to the Azure Health Bot Service and that is not primarily a substitute for the Azure Health Bot Service.

Customer Solution means any application that the Customer makes available to its end users consisting of Customer's applications and the Microsoft Azure Services, whereby Customer's application adds primary and significant functionality and is not primarily a substitute to the Microsoft Azure Services. Customer applications that only provide billing, license management, and/or infrastructure services (e.g., virtual machines, containers, storage, or management for such infrastructure services) do not constitute "primary and significant functionality."

Customize when used in connection with large language or multi-modal models, means to expose a model to Customer Data and instruct the model to use that Customer Data so that the model produces tailored Output Content that is more relevant to a specific customer. When used in connection with Copilots, this is sometimes called "grounding" and the Customer Data used to Customize a model may include information referred to as "grounding data."

Cycle Harvesting Node means a device that is not dedicated to running Clustered HPC Applications or job scheduling services for Clustered HPC Applications.

Data Center Provider means an entity that provides infrastructure or software services, directly or indirectly, to another service provider. Microsoft may also serve as a Data Center Provider through Microsoft Azure.

Data Protection Addendum (DPA) means the Microsoft Products and Services Data Protection Addendum published at https://aka.ms/DPA.

Education Qualified User means an employee or contractor (except Students) who accesses or uses an Education Platform Product for the benefit of the Institution.

Embedded Unified Solution means a business application developed by Customer's Reseller that the Reseller licenses to Customer that adds significant and primary functionality to an Embedded SL Product.

External Connector License means a License assigned to a Server that permits access to the corresponding version of the server software or earlier versions of the server software by External Users.

External Users means users that are not employees, onsite contractors or onsite agents of Customer or its Affiliates.

Fail-over OSE means an OSE (or an Azure service) in which passive Instances of the server software are running in anticipation of a fail-over event.

First-Party Consumption Services are Microsoft Online Services that are available as Azure meters. These Microsoft services include, but are not limited to, certain Power Platform, Dynamics 365, and GitHub meters.

Government Community Cloud (U.S. only) means Online Services that are available exclusively to the Community. Use Rights for government community cloud services are equivalent to those of their standard multitenant equivalents unless otherwise noted. Qualifying Online Services are offered as government community cloud services and non-government community cloud services. Customers may be provisioned as one or the other but not a mix of both. Online Services designated as government community cloud may not be deployed in the same domain with specific non-government community cloud services.

Graduate means a Student who has (1) completed a grade or a level in a school or an educational institution in the Organization that qualifies the Student for enrollment into college or university or (2) earned a diploma or degree from a college or university in the Organization.

Hardware Thread means either a Physical Core or a hyper-thread in a Physical Processor.

High Performance Computing (HPC) Workload means a workload where the server software is used to run a Cluster Node and is used in conjunction with other software as necessary to permit security, storage, performance enhancement and systems management on a Cluster Node for the purpose of supporting the Clustered HPC Applications.

Input means all Customer Data that Customer provides, designates, selects, or inputs for use by a generative artificial intelligence technology to generate or Customize an output.

Instance means an image of software that is created by executing the software's setup or install procedure or by duplicating an existing Instance.

IoT Device means a computing device that (i) is designed or configured for use primarily with an industry- or task-specific software program that provides the primary functionality of the computing device ("IoT Program"), (ii) uses equal to or less than 16 physical cores, and (iii) is not designed to be marketed or primarily used as a multi-functional Server, or a commercially viable substitute for a multi-functional Server.

Knowledge Worker means any employee (including a Student employee), contractor, or volunteer of or for the Institution who uses a Product or Qualified Device for the benefit of the institution or within the user's relationship with the Institution. This definition does not include users of any listed software product or online service as excluded from the definition of Knowledge Worker.

License means the right to download, install, access and use a Product.

Licensed Device means a single physical hardware system to which a License is assigned. Devices that are under the management or control of an entity other than Customer or one of its Affiliates are subject to the Outsourcing Software Management clause. For purposes of this definition, a hardware partition or blade is considered to be a separate device.

Licensed Server means a single Server to which a License is assigned. Servers that are under the management or control of an entity other than Customer or one of its Affiliates are subject to the Outsourcing Software Management clause. For purposes of this definition, a hardware partition or blade is considered to be a separate Server.

Licensed User means the single person to whom a License is assigned.

License Mobility through Software Assurance Partner means an entity identified at https://www.microsoft.com/en-us/licensing/licensing-programs/software-assurance-license-mobility and authorized by Microsoft to host customers' software on shared servers.

Licensing Site means http://www.microsoft.com/licensing/contracts or a successor site.

Listed Providers include entities identified by Microsoft at http://aka.ms/listedproviders. Microsoft may identify additional Listed Providers at http://aka.ms/listedproviders from time to time; however, if Customer is using an outsourcer at the time its Authorized Outsourcer status is terminated, then Customer may temporarily continue to use the same entity in its former Authorized Outsourcer capacity for one year from the date of that change in status.

Management License (ML) means a License that permits management of one or more OSEs by the corresponding version of the server software or any earlier version of the server software. There are two categories of Management Licenses: Server Management License and Client Management License. There are three types of Client Management Licenses: User, OSE and device. A User Management License permits management of any OSE accessed by one user; an OSE Management License permits management of one OSE accessed by any user; a device Management License (Core CAL or Enterprise CAL Suite) permits management of any OSE on one device.

Management License Equivalent License means a User SL identified in a Product's "Management License" table, or a CAL suite or SL, as identified in CAL and ML Equivalency Licenses, as applicable. A CAL suite is a Management License Equivalent License only if Customer purchased the license after the Server Products' Date Available or if Customer had active SA coverage as the Date Available.

Managing an OSE means to solicit or receive data about, configure, or give instructions to the hardware or software that is directly or indirectly associated with the OSE. It does not include discovering the presence of a device or OSE.

Metaprompts means instructions coded into a Microsoft Generative AI Service that provide directions to the service for generating Output Content.

Microsoft Azure Services means the Microsoft services and features identified at http://azure.microsoft.com/services/, except those identified in the Product Terms as Microsoft Azure User Plans, or Microsoft Azure Support Plans. "Microsoft Azure Services" includes any open source components incorporated by Microsoft in those services and features.

Microsoft Azure Services Plan means a subscription to one of the individual Microsoft Azure Services identified in the Product Terms as Microsoft Azure User Plans, or Microsoft Azure Support Plans.

Microsoft Generative AI Service means an Online Service or feature thereof that provides Output Content using generative artificial intelligence technologies.

Microsoft Translator means Translator Text API and/or Translator Speech API offered by Microsoft as a cloud based machine translation service.

Network Server means a physical hardware server that provides resource assistant to computers in a network. Any Server that is under the management or control of an entity other than Customer or one of its Affiliates is subject to the Outsourcing Software Management clause in the Universal License Terms.

Non-Microsoft Product means any third-party-branded software, data, service, website or product, unless incorporated by Microsoft in an Online Service.

Online Service means a Microsoft-hosted service to which Customer subscribes under a Microsoft volume licensing agreement, including any service identified in the Online Services section of the Product Terms. It does not include software and services provided under separate license terms (such as via gallery, marketplace, console, or dialog).

Operating System Environment (OSE) means all or part of an operating system Instance, or all or part of a virtual (or otherwise emulated) operating system Instance which enables separate machine identity (primary computer name or similar unique identifier) or separate administrative rights, and instances of applications, if any, configured to run on the operating system Instance or parts identified above. A physical hardware system can have one Physical OSE and/or one or more Virtual OSEs.

Output Content means any data, text, sound, video, image, code, or other content generated by a model in response to Input.

Personal Data means any information relating to an identified or identifiable natural person. An identifiable natural person is one who can be identified, directly or indirectly, in particular by reference to an identifier such as a name, an identification number, location data, an online identifier or to one or more factors specific to the physical, physiological, genetic, mental, economic, cultural or social identity of that natural person.

Physical Core means a core in a Physical Processor.

Physical OSE means an OSE that is configured to run directly on a physical hardware system. The operating system Instance used to run hardware virtualization software or to provide hardware virtualization services is considered part of the Physical OSE.

Physical Processor means a processor in a physical hardware system.

Previews means preview, beta or other pre-release features, data center locations, and services offered by Microsoft for evaluation.

Primary User means the user who uses a Licensed Device more than 50% of the time in any 90 day period.

Primary Workload means either an OSE in which Instances of the server software are running under the "Use Rights" section of a product entry or an Azure service.

Production Environment means any Physical or Virtual OSE running a production workload or accessing production data, or Physical OSE hosting one or more Virtual OSEs running production workloads or accessing production data.

Professional Services means Microsoft technical support services and Microsoft consulting services (e.g., for data migration) provided to Customer. "Professional Services" does not include Products.

Professional Services Data means all data, including all text, sound, video, image files or software, that are provided to Microsoft, by or on behalf of a Customer (or that Customer authorizes Microsoft to obtain from a Product) or otherwise obtained or processed by or on behalf of Microsoft through an engagement with Microsoft to obtain Professional Services.

Qualifying Third Party Device means a device that is not controlled, directly or indirectly, by Customer or its Affiliates (e.g., a third party's public kiosk).

Running Instance means an Instance of software that is loaded into memory and for which one or more instructions have been executed. (Customer "Runs an Instance" of software by loading it into memory and executing one or more of its instructions.) Once running, an Instance is considered to be running (whether or not its instructions continue to execute) until it is removed from memory.

Services Deliverables means any computer code or materials (including without limitation proofs of concept, documentation and design recommendations, sample code, software libraries, algorithms and machine learning models) other than Products or Fixes that Microsoft leaves with Customer at the conclusion of Microsoft's performance of Professional Services.

SL means subscription License that allows access to software or a hosted service for a defined period of time.

Server means a physical hardware system capable of running server software.

Server Farm means a single data center or two data centers each physically located either in time zones not more than four hours apart, or within the EU or EFTA. A data center can be moved from one Server Farm to another, but not on a short-term basis. (EU is European Union; EFTA is European Free Trade Association).

Standard means any technology specification created by an organization, consortium, trade association, special interest group, or similar entity whose activities include producing or promoting technology specifications meant for widespread adoption. Standards include, but are not limited to: any version of MPEG-2, MPEG-4 Visual/MPEG-4 Part 2, VC-1, MPEG-4 Part 10/H.264, MPEG-H Part 2/H.265, MPEG-I Part 3/H.266, AAC, HDCP, HDMI, DisplayPort, DivX, JPEG, MJPEG, AC-3/Dolby Digital, AC-4/Dolby Digital Plus, DTS, Dolby TrueHD, DTS-HD, VP8, VP9, AV1, AMR-NB, AMR-WB, EVS, IEEE 802.11[x] (aka WiFi), IEEE 802.16 (aka Wi-MAX), UMTS, EDGE, GPRS, GSM, CDMA, TD-SCDMA, WCDMA, HSxPA, LTE, 2G, 3G, 4G, 5G, Bluetooth (aka IEEE 802.15.1) and their predecessors and successors.

Step-up means a license purchased in addition to (and associated with) a previously acquired base license. For any Step-up User SL not appearing individually in the Product Terms, the license terms applicable to the equivalent full User SL apply.

Student means any individual enrolled in any educational institution that is part of Institution's Organization whether on a full-time or part-time basis.

Student Qualified Device means a Qualified Device owned, leased, or controlled by a Student or owned, leased, or controlled by the Organization and assigned for individual, dedicated use by a Student.

Subprocessor means other processors used by Microsoft to process data.

Telecommunication Service Providers are entities that provide communications services, telephony services, voice or data transmission services, and wireless prepaid services.

Unique Committer is a Licensed User of GitHub Enterprise/Azure DevOps or an offering that includes GitHub Enterprise/Azure DevOps who has made a commit in the last 90 days to any repository with any GitHub Advanced Security functionality activated.

Virtual Core means the unit of processing power in a virtual hardware system. A Virtual Core is the virtual representation of one or more hardware threads.

Virtual OSE means an OSE that is configured to run on a virtual hardware system.

Web Workload (also referred to as "Internet Web Solutions") are publicly available web pages, websites, web applications, web services, and/or POP3 mail serving. For clarity, access to content, information, and applications served by the software within an Internet Web Solution is not limited to Customer's or its affiliates' employees. Software in Internet Web Solutions is used to run:
- web server software (for example, Microsoft Internet Information Services), and management or security agents (for example, the System Center Operations Manager agent);
- database engine software (for example, Microsoft SQL Server) solely to support Internet Web Solutions; or
- the Domain Name System (DNS) service to provide resolution of Internet names to IP addresses as long as that is not the sole function of that instance of the software.

Windows Server Container with Hyper-V isolation (formerly known as, Hyper-V Container) is a container technology in Windows Server which utilizes a virtual operating system environment to host one or more Windows Server Container(s). Each Hyper-V isolation instance used to host one or more Windows Server Container is considered one Virtual OSE.

Windows Server Container without Hyper-V isolation (formerly known as, Windows Server Container) is a feature of Windows Server software.

Windows Software Components means components of Windows software included in a Product. Microsoft .NET Framework, Microsoft Data Access Components, PowerShell software and certain .dlls related to Microsoft Build, Windows Identity Foundation, Windows Library for JAVAScript, Debghelp.dll, and Web Deploy technologies are all Windows Software Components.

Attributes

Attributes are identified in the tables in each Product Entry, and indicate rights or conditions applicable to the Products.

Additional Software: Software identified in the Use Rights for Server Products that Customer is permitted to use on any device in conjunction with its use of server software.

Add-ons and From SA: Indicates the Product is available as an Add-on, and/or From SA. For details, refer to the Add-ons and From SA sections for each respective product and online service.

Client Access Requirement: Indicates whether or not a Server Product requires CALs for access by users and devices.

Disaster Recovery: Rights available to SA customers to use software for conditional disaster recovery purposes; refer to Servers - Disaster Recovery Rights section of Software Assurance Benefits.

Down Editions: Permitted lower editions corresponding to specified higher editions. Customer may use the permitted lower edition in place of a licensed higher-level edition, as permitted in the Universal License Terms.

Extended Term Eligible: Online services that are eligible for an extended term as described in the Enterprise and Enterprise Subscription licensing agreement.

External User Access Requirement: Indicates specific license requirements or options for access by External Users.

Fail-Over Rights: An SA benefit that allows Customer to run passive fail-over Instances as described in the Product entry.

Included Technologies: Indicates other Microsoft components included in a Product; refer to the Included Technologies section of Universal License Terms for details.

License Mobility: Rights available to SA customers either to reassign licenses outside the standard timelines or to use Products on multitenant servers outside their own datacenters; refer to License Mobility section of Software Assurance Benefits.

License Terms: Terms and conditions governing deployment and use of a Product.

Migration Rights: Customer may be able to upgrade from prior versions of the software or other Products under special terms published in the Product Entry or Product List as indicated. Customer may also have non-standard downgrade rights to use prior versions of the same or other Products in place of the licensed version.

Notices: Identifies the notices applicable for a Product; refer to the Notices section for details.

Online Subscription Program (OSP): The Product is available in an Online Subscription program.

Prerequisite: Indicates that certain additional conditions must be met in order to purchase Licenses for the Product.

Prerequisite (SA):Indicates that certain additional conditions must be met in order to purchase SA coverage for the Product.

Prior Version: Earlier versions of Product and their Date Available.

Product Pool: Indicates the grouping of Products that the Product belongs to for the purposes of determining pricing discounts. There are three Product pool categories; Application, Server and System.

Product-Specific License Terms, or **Product-Specific Terms**: Indicates the Product-specific terms and conditions governing deployment and use of the Product in the Product Terms, including those in the product specific sections of the Product Terms.

Promotions: Indicates that limited time offers apply to the Product as described in Promotions.

Qualified User Exemption: Exemption applicable to users who access Products solely under one of these licenses. These users are exempt from being counted as a Qualified User under Customer's volume licensing agreement, notwithstanding anything to the contrary in that agreement.

Reduction Eligible: An Online Service for a customer that has an Enterprise Enrollment, Enterprise Subscription Enrollment, Microsoft Azure Enrollment or Enrollment for Education Solutions can report a reduction in licenses or Allocated Annual prepayment.

Reduction Eligible (SCE): Products for which a Server & Cloud Enrollment customer can report a reduction in subscription licenses or future Allocated Annual prepayment after 12 continuous months.

Roaming Rights: An SA benefit that permits the Primary User of a Licensed Device certain access and use rights. The Primary User may use a Qualifying Third Party Device to (i) remotely access and use permitted Instances or copies of the software running on Servers (subject to the Outsourcing Software Management clause in the Universal License Terms for all Software), or (ii) locally use a permitted Instance or copy in a Virtual OSE. No other user may use the software under the same License at the same time. Despite anything to the contrary in Customer's volume licensing agreement, Qualified Desktops and Devices do not include any Qualifying Third Party Devices from which Customer's users access and use the software and any (other) enterprise product solely under Roaming Rights.

SA Benefits Pool: Indicates the category of the Product for purposes of determining SA Benefits broadly applicable to that Product Pool, as listed in <u>Software Assurance Benefits</u>.

SA Equivalent Rights: Software SLs acquired under a Server and Cloud Enrollment or Microsoft Products and Services Agreement provide the same SA rights and benefits during the term of the Subscription as Licenses with SA coverage.

Self Hosting: An SA benefit that permits use of Products for conditional hosting purposes; refer to the Servers - Self Hosted Applications section of <u>Software Assurance Benefits</u>.

Student Use Benefit: The option for Institutions that license a qualifying Product for their Organization-wide count to license a Product for use by their Students at a ratio of 1:15 or 1:40 Students per Education Qualified User or Knowledge Worker (or staff/faculty user) at no additional cost. The qualifying Products and the Products eligible for the Student use, and the applicable ratios are identified in <u>Student Use Benefits and Academic Programs</u>. Such Student Licenses may not be counted toward minimum order requirements. The License Terms for the Products licensed under the Student Use Benefit govern Students' use. Rights to use Products under the Student Use Benefit expire when Student is no longer affiliated with the Institution.

Suite: A Product that is comprised of components that are also licensed separately. A suite is licensed under a single License that is assigned to a single user or device, and allows use of all of its components on the single device or by a single user to which it is assigned. The components of the Suite may not be separated and used on separate devices or by separate users.

True-Up Eligible: An Online Service subscription License that an Enterprise or Enterprise Subscription customer can order via the true-up or annual order process rather than monthly.

UTD Discount: An Up to Date Discount is a discount available to Open Value Subscription customers ordering licenses for Product during the first year of their agreement if they have a License for the corresponding qualifying Product.

Cell Values

Cell Values are used in the Program Availability table in each of each Product Entry to identify how the Product is offered in each program. The volume licensing program agreements define these offering types.

A = Additional Product: The Product is offered as an Additional Product.

AF = Additional Product Faculty: The Product is offered as an Additional Product for the School program and must be licensed on an Organization-wide basis covering all Faculty and Staff.

AO = Additional Product Organization Wide: The Product is offered as an Additional Product and must be ordered organization-wide.

AP = Additional Product in EES 2017: The Product is offered as an Additional Product for the Enrollment for Education Solutions (with a publication date on or after October 2017).

AS = Additional Product School: The Product is offered as an Additional Product for the School program only.

E = Enterprise Product: The Product is offered as an Enterprise Product, but not a desktop.

ED = Education Desktop: The Product is offered as an education desktop platform product with either Enterprise CAL Suite or Core CAL Suite under Enrollment for Education Solutions (with a publication date prior to October 2017) and Open Value Subscription - Education Solutions and must be licensed on an Organization-wide basis covering all Faculty and Staff.

EO = Enterprise Online Service: The Online Service is offered as an enterprise Online Service or platform Online Service and satisfies the Enterprise Product requirements. EO for Core CAL and Enterprise CAL Suite require the corresponding CAL Suite Bridge.

EP = Education Platform Product: The Product is offered as an Education Platform Product under the Enrollment for Education Solutions (with a publication date on or after October 2017) and must be licensed on an Organization-wide basis covering all Education Qualified Users or Knowledge Workers or for the full Student Count.

OM = Open Minimum: Each License counts solely as 5 Licenses for purposes of the initial order minimum in Open License and Open Value.

OW = Organization-wide: Available under the Organization-wide option.

P = Non-Organization Wide in Open Value: The Product is offered on a non-Organization Wide basis in Open Value.

S = Student Offering School Only: The Product is offered as a Student Offering under School Program only and must be ordered for the full Student Count.

SD = School Desktop Platform Product: The Product is offered as a school desktop platform product with either Enterprise CAL Suite or Core CAL Suite under School Program. An SD is counted as three units.

ST = Student Offering: The Product is offered as a Student Offering and must be ordered for the full Student Count.

SP = Server and Tools Product: The Product is a server and tools product offered under the Server and Cloud Enrollment.

UC = United States Government Community Cloud Service: The Online Service is offered as a Government Community Cloud (U.S. only) Service. For UC availability for Online Service suites, refer to the Program Availability table for each of the suite's components.

Other Legal Terms

CAL and ML Equivalency Licenses

Rights to access server software running on Customer's Licensed Servers or to Manage OSEs are available under CAL suites and Online Services SLs. The tables below show the applicable CAL suite or SL that satisfies the License requirement for access to (or management of) the respective Server Product's base or additive functions. CAL suites must be purchased after the Product's Date Available or have active SA coverage on such date to satisfy access requirements for the current version of the Server Product.

Core CAL

Notices

Where indicated in the Use Rights or Service Specific Terms section of each Product entry, the following notices apply:

Notice about Internet-based Features

Software Products may contain features that connect and send information over the Internet, without additional notice to Customer, to Microsoft's systems and those of its Affiliates and service providers. Use of that information is described in the terms accompanying the internet-based features, Product documentation, and Microsoft Privacy Statement (aka.ms/privacy). Unless stated otherwise, Microsoft is a controller of Personal Data processed in connection with Customer's use of Internet-based features in software Products. When Microsoft is a controller for Internet-based features, Microsoft will handle the Personal Data in accordance with the Microsoft Privacy Statement (aka.ms/privacy), and the Data Protection Addendum terms do not apply.

Notice about Malware protection

Microsoft cares about protecting customers' devices from malware. The software will turn on malware protection if other protection is not installed or has expired. To do so, other antimalware software will be disabled or may have to be removed.

Notice about H.265/HEVC Video Standard

The software may include H.265/HEVC coding technology. Access Advance LLC requires this notice:

IF INCLUDED, THE H.265/HEVC TECHNOLOGY IN THIS SOFTWARE IS COVERED BY ONE OR MORE CLAIMS OF THE HEVC PATENTS LISTED AT: PATENTLIST.ACCESSADVANCE.COM. DEPENDING ON HOW YOU OTBTAINED THE SOFTWARE, THIS PRODUCT MAY BE LICENSED UNDER THE HEVC ADVANCE PATENT PORTFOLIO.

If this software is installed on a Microsoft device, additional licensing information can be found at: https://www.aka.ms/HEVCVirtualPatentMarking.

Notice about Bing

For any component of Software or an Online Service that is powered by Bing, as disclosed in the product documentation, Customer's use of Bing is governed by the Microsoft Services Agreement (https://go.microsoft.com/fwlink/?linkid=2178408) and the Microsoft Privacy Statement (https://go.microsoft.com/fwlink/?LinkId=521839), except that noncommercial use limitations do not apply to Products available for a fee through Microsoft volume licensing. The Data Protection Addendum does not apply to Customer's use of Bing search within Microsoft Generative AI Services.

Notice about Bing Maps

The Online Service or its included software includes use of Bing Maps. Any content provided through Bing Maps, including geocodes, can only be used within the product through which the content is provided. Customer's use of Bing Maps is governed by the Bing Maps End User Terms of Use available at go.microsoft.com/?linkid=9710837 and the Microsoft Privacy Statement available at go.microsoft.com/fwlink/?LinkID=248686.

Notice about Azure Media Services H.265/HEVC Encoding

Customer must obtain its own patent license(s) from any third party H.265/HEVC patent pools or rights holders before using Azure Media Services to encode or decode H.265/HEVC media.

Notice about Adobe Flash Player

The software may include a version of Adobe Flash Player. Customer agrees that its use of the Adobe Flash Player is governed by the license terms for Adobe Systems Incorporated at http://go.microsoft.com/fwlink/?linkid=248532. Adobe and Flash are either registered trademarks or trademarks of Adobe Systems Incorporated in the United States and/or other countries.

Notice about Communication Services

Certain Online Services provide services for voice and text communications ("Communication Services"). These Communication Services are provided by Microsoft through the Microsoft Affiliate or other service provider authorized to administer them. Pricing for Communication Services may include applicable taxes and fees. Communication Services terms may vary from country to country. All included taxes, fees and terms for Communication Services are disclosed in the terms of use available on the Volume Licensing site at https://aka.ms/CommunicationServicesTerms. If an Online Service enables you to access voice and text communication features provided by third parties those services are provided under separate terms directly between you and the third party. Microsoft is not the provider of, and does not manage billing or support for, any such third-party communication services.

Notice about H.264/AVC Video Standard and VC-1 Video Standard

This software may include H.264/AVC and VC-1, compression technology. MPEG LA, L.L.C. requires this notice:

THIS PRODUCT IS LICENSED UNDER THE H.264/AVC, AND THE VC-1 PATENT PORTFOLIO LICENSES FOR THE PERSONAL AND NON-COMMERCIAL USE OF A CONSUMER TO (i) ENCODE VIDEO IN COMPLIANCE WITH THE ABOVE (VIDEO STANDARDS) AND/OR (ii) DECODE H.264/AVC, VC-1 THAT WAS ENCODED BY A CONSUMER ENGAGED IN A PERSONAL AND NON-COMMERCIAL ACTIVITY AND/OR WAS OBTAINED FROM A VIDEO PROVIDER LICENSED TO PROVIDE SUCH VIDEO. NO LICENSE IS GRANTED OR SHALL BE IMPLIED FOR ANY OTHER USE. ADDITIONAL INFORMATION MAY BE OBTAINED FROM MPEG LA, L.L.C. REFER TO www.mpegla.com.

For clarification purposes, this notice does not limit or inhibit the use of the software for normal business uses that are personal to that business which do not include (i) redistribution of the software to third parties, or (ii) creation of content compliant with the VIDEO STANDARDS technologies for distribution to third parties.

Notice about NVIDIA Components

The software may include components of NVIDIA Corporation's CUDA Toolkit, NVIDIA drivers, CUDA Deep Neural Network Library (cuDNN), NVIDIA Collective Communications Library (NCCL), and NVIDIA TensorRT ("NVIDIA Components"). Customer agrees that its use NVIDIA Components in the software is governed by the following NVIDIA license terms, as applicable: for NVIDIA CUDA Toolkit,

https://docs.nvidia.com/cuda/eula/index.html; for NVIDIA drivers, https://www.nvidia.com/content/DriverDownload-March2009/licence.php?lang=us; for cuDNN it is http://docs.nvidia.com/deeplearning/sdk/cudnn-sla/index.html; for NCCL it is http://docs.nvidia.com/deeplearning/sdk/nccl-sla/index.html; and for TensorRT it is https://docs.nvidia.com/deeplearning/sdk/tensorrt-sla/index.html. As stated in their respective license terms, Customer acknowledges that certain NVIDIA Components as delivered are not tested or certified by NVIDIA for use in connection with the design, construction, maintenance, and/or operation of Critical Applications, that is systems where the use or failure of such system could result in a situation that threatens the safety of human life or results in catastrophic damages. Neither Microsoft nor NVIDIA shall be liable to Customer or any third party, in whole or in part, for any claims or damages arising from Critical Applications uses. Customer agrees to indemnify NVIDIA against all claims, damages, and costs arising from Critical Application uses as stated in the applicable NVIDIA terms. Customer is solely responsible for ensuring that any product or service developed with the NVIDIA Components as a whole includes sufficient features to comply with all applicable legal and regulatory standards and requirements.

Professional Services

Customer's right to use Professional Services are subject to these Product Terms. If, however, Professional Services are provided pursuant to a separate agreement, then the terms of that separate agreement will apply to those Professional Services. In the event of a conflict between these Product Terms and any separate agreement, the most current terms or agreement governing the Professional Services will control. If Customer's volume licensing agreement is a Microsoft Business Agreement version dated prior to September 2007 or otherwise does not include terms for Professional Services, and Customer has not signed any other master-level Microsoft Services agreement, these Product Terms will apply to any Professional Services purchased and used by Customer.

Data protection and security terms for Professional Services Data are in the DPA. When used in the sections listed below, the defined term "Professional Services" includes Supplemental Professional Services, and the defined term "Professional Services Data" includes data obtained for Supplemental Professional Services.

Warranties; Obligations of the Parties

Microsoft warrants that it will perform the Professional Services with professional care and skill. If Microsoft fails to do so and Customer notifies Microsoft of such performance failure within 90 days of the date of performance, then Microsoft will either re-perform the Professional Services or return the price Customer paid for them. The foregoing is Customer's sole remedy for breach of the Professional Services warranty. Notwithstanding the foregoing, **Services Deliverables that are provided without charge are provided "AS-IS," WITHOUT ANY WARRANTY. Except for the limited warranty above, Microsoft provides no warranties or conditions and disclaims any other express, implied or statutory warranties, including warranties of quality, title, non-infringement, merchantability and fitness for a particular purpose.**

Customer will perform its applicable responsibilities and obligations to support Microsoft's performance of the Professional Services. Customer is solely responsible for testing, deploying, maintaining and supporting Services Deliverables that are provided or recommended without charge by Microsoft.

Acceptable Use Policy

Customer must not (and is not licensed to) use the Services Deliverables:

- in a way prohibited by law, regulation, governmental order or decree;
- to violate the rights of others; or
- in any application or situation where use of the Services Deliverables could lead to the death or serious bodily injury of any person, or to severe physical or environmental damage, except in accordance with the High Risk Use section below.

High Risk Use

WARNING: Modern technologies may be used in new and innovative ways, and Customer must consider whether its specific use of these technologies is safe. The Services Deliverables are not designed or intended to support any use in which a service interruption, defect, error, or other failure of a Services Deliverable could result in the death or serious bodily injury of any person or in physical or environmental damage (collectively, "High Risk Use"). Accordingly, Customer must design and implement the Services Deliverables such that, in the event of any interruption, defect, error, or other failure of the Services Deliverables, the safety of people, property, and the environment are not reduced below a level that is reasonable, appropriate, and legal, whether in general or for a specific industry. Customer's High Risk Use of the Services Deliverables is at its own risk. Customer agrees to defend, indemnify and hold Microsoft harmless from and against all damages, costs and attorneys' fees in connection with Customer's High Risk Use. The foregoing indemnification obligation is in addition to any defense obligation set forth in Customer's separate agreement and is not subject to any limitation of, or exclusion from, liability contained in such agreements.

Limitation of Liability

To the extent permitted by applicable law, each party's total liability for all claims relating to Professional Services will be limited to the amounts Customer was required to pay for the Professional Services or the limitation of liability for the Online Service with which the Professional Services are offered, whichever is greater. For Professional Services and Services Deliverables provided free of charge and Services Deliverables that Customer is authorized to redistribute to third parties without separate payment to Microsoft, Microsoft's liability is limited to direct damages finally awarded up to US$5,000. **In no event will either party be liable for indirect, incidental, special, punitive, or consequential damages, including loss of use, loss of profits, or interruption of business, however caused or on any theory of liability in relation to the Professional Services or Services Deliverables. No limitation or exclusions will apply to liability arising out of either party's (1) confidentiality obligations (except for all liability limited to Customer Data and Professional Services Data, which remain subject to the limitations and exclusions above); or (2) violation of the other party's intellectual property rights.**

Use, Ownership, and License Rights

Fixes

"Fixes" are Product fixes, modifications or enhancements, or their derivatives, that Microsoft either releases generally (such as service packs) or that Microsoft provides to Customer to address a specific issue. Each Fix is licensed under the same terms as the Product to which it applies. If a Fix is not provided for a specific Product, any use terms Microsoft provides with the Fix will apply.

Pre-Existing Work

"Pre-Existing Work" means any computer code or non-code based written materials developed or otherwise obtained independent of the Professional Services or Customer's volume licensing agreement. All rights in Pre-Existing Work shall remain the sole property of the party providing the Pre-Existing Work. Each party may use, reproduce and modify the other party's Pre-Existing Work only as needed to perform obligations related to Professional Services. If Customer chooses to disclose its source code to Microsoft during a Professional Services engagement, then prior to such disclosure, Customer will remove any third-party source code that Customer is prohibited from disclosing.

Services Deliverables License

Upon payment in full for fee based Professional Services, otherwise upon delivery, Microsoft grants Customer a non-exclusive, non-transferable, perpetual license to reproduce, use, and modify the Services Deliverables solely in the form delivered to Customer and solely for Customer's internal business purposes, subject to and in accordance with these Product Terms, the terms and conditions in Customer's volume licensing agreement and any agreed statement of services. Some Services Deliverables and third-party content may be provided under a separate license, such as an open source license. In the event of a conflict between these Product Terms and any separate license, the separate license will prevail with respect to the Services Deliverables or third-party content that is the subject of such separate license. Each party reserves all rights (and no one receives any rights) not expressly granted by the foregoing licenses.

Retained Rights

Products, Fixes, and Services Deliverables are protected by copyright and other intellectual property rights laws and international treaties. Microsoft reserves all rights not expressly granted in these terms. No rights will be granted or implied by waiver or estoppel. Rights to access or use Software on a device do not give Customer any right to implement Microsoft patents or other Microsoft intellectual property in the device itself or in any other software or devices.

License Restrictions

Customer must not (and is not licensed to) (1) reverse engineer, decompile, disassemble or work around any technical limitations in any Product, Fix, or Services Deliverable except to the extent that applicable law doesn't allow this restriction, (2) install or use non-Microsoft technology in a way that would subject Microsoft's intellectual property or technology to any other license terms, or (3) work around any technical limitations in a Product, Fix, or Services Deliverable or restrictions in Product Documentation. Except as expressly permitted in Customer's separate agreement and any agreed statement of services or separate license, or Product documentation, Customer must not (and is not licensed to) (1) separate and run parts of a Product or Fix on more than one device, upgrade or downgrade parts of a Product or Fix at different times, or transfer parts of a Product or Fix separately, or (2) distribute, sublicense, rent, lease, lend, sell, offer for sale or otherwise make available any Products, Fixes, or Services Deliverables, in whole or in part, or use them to offer hosting services to a third party.

Feedback

"Feedback" means expertise and knowledge, including industry knowhow, as well as comments, input and suggestions regarding the Services Deliverables, Professional Services and the products, technologies, services, or any components of the foregoing, whether pre-release or commercially released, of either Microsoft or Customer. Neither Microsoft nor Customer are required to provide Feedback to

the other in connection with Professional Services, but if a party in its sole discretion does provide Feedback, both parties agree that the receiving party should be free to use such Feedback without obligation. Accordingly, to the extent that the party providing Feedback owns or controls copyrights or trade secrets covering such Feedback, that party grants to the receiving party and its Affiliates a worldwide, non-exclusive, perpetual, irrevocable and royalty-free license in such intellectual property to: (1) to make, use, modify, distribute, create derivative works and otherwise commercialize the Feedback as part of Microsoft's or Customer's products, technologies, services or any of their components, including without limitation pre-release and commercially released versions of such offerings; and (2) sublicense to third parties the foregoing rights, including the right to grant further sublicenses. Neither party will provide any Feedback subject to any terms that would impose any obligation on or require attribution by the receiving party. Any party receiving Feedback further acknowledges that (1) it has sole and absolute discretion regarding whether it implements such Feedback; (2) it shall base its offerings and marketing plans solely on its own independent research and analysis; and (3) it assumes all risks associated with any implementation of such Feedback.

Non-Microsoft Technology

Customer is solely responsible for any non-Microsoft software or technology that it installs or uses with the Online Services, Fixes, or Services Deliverables, including without limitation when Customer asks Microsoft to use or modify such third-party content.

Use of Technical Information from Professional Services

Microsoft may use any technical information it derives from providing Professional Services for problem resolution, troubleshooting, product functionality enhancements, in Fixes, and for Microsoft's knowledge base. Microsoft agrees not to identify Customer or disclose any of Customer's confidential information as part of such use.

Affiliates' Rights

Customer may sublicense the rights to use Services Deliverables to its Affiliates, but Customer's Affiliates may not sublicense these rights. Customer is liable for ensuring its Affiliates' compliance with the terms of these Professional Services terms and Customer's volume licensing agreement.

Government Customers

If Customer is a government entity, then the following terms apply to any Professional Services provided at no charge to Customer. Microsoft waives any and all entitlement to compensation from Customer for the Professional Services. In compliance with applicable laws and regulations, Microsoft and Customer acknowledge that the Professional Services are for the sole benefit and use of Customer and not provided for the personal use or benefit of any individual government employee.

Availability

Described below are some of the Professional Services that are available for purchase through Microsoft Volume Licensing. Additional Professional Services may be available and will be described in Customer's Enterprise Services Work Order or other applicable Statement of Services.

Microsoft Support Services

Microsoft Support Services are a set of comprehensive enterprise support services. Microsoft Unified or Premier Support, including Enhanced Services and Solutions, are available for purchase through Microsoft Volume Licensing.

Microsoft Unified Support

Unified Support services are sold in packages and described in the applicable services description document.
- Unified Advanced and Performance support services are delivered as described in the Support & Consulting Services Description ("SCSD") located at https://www.microsoft.com/en-us/microsoftservices/support-consulting-services-description.
- Unified Enterprise support services are delivered as described in the Unified Enterprise Support Services Description ("USSD") located at https://www.microsoft.com/unified-support-services-description.

Microsoft Premier Support

Premier Support services are sold in packages as described in the Enterprise Services Description of Services ("Description of Services"), located at https://www.microsoft.com/en-us/microsoftservices/description-of-services.

Microsoft Enhanced Services and Solutions for Premier and Unified Support

In addition to the services provided as part of the Unified Support packages and Premier packages, the following optional Enhanced Services and Solutions may be purchased. Enhanced Services and Solutions are available for an additional fee.

- Designated Support Engineering ("DSE"): DSE services are delivered as described in the applicable services description (SCSD or USSD).
- Rapid Response services are delivered as described in the applicable services description (SCSD or USSD).
- For Unified Support only - Microsoft Azure Event Management ("AEM") services are delivered as described in the USSD.
- For Unified Support only - Office 365 Engineering Direct services are delivered as described in the USSD.
- Developer Support services are delivered as described in the applicable services description (SCSD or USSD).
- For Unified Support only - Support for Mission Critical services are delivered as described in the USSD.

Microsoft Support Services Business Rules

Reference the applicable services description (SCSD or USSD) for applicable rules and limitations for the support services being purchased, in addition to the following:

- Support Services are provided in the country in which the VL agreement is signed.
- Contact Microsoft for the purchase of any additional Unified or Premier Support services that are not available for purchase through Microsoft Volume Licensing.

Microsoft Viva Glint Professional Services Offerings

Definitions

Qualified Customers means Customers that had an active subscription for Legacy Glint Services within 120 calendar days prior to purchasing Viva Glint.

Eligible Users means users who have an active license for Viva Glint Professional Services.

Legacy Glint Services means Glint Engage, Glint Engage and Lifecycle, and Glint People Success as set forth in Customer's most recently active LinkedIn Order Form(s) as defined at https://www.linkedin.com/legal/l/lsa.

Entitlement Term means the period from Eligible Customer's purchase of Viva Glint Professional Services until the earliest of 1) expiration of Eligible Customer's Viva Glint Professional Services enrollment; 2) migration of Eligible Customer's data from Legacy Glint Services to Viva Glint; 3) the date that Qualified Customer declines migration of its data from Legacy Glint Services to Viva Glint; or 4) termination of Eligible Customer's Viva Glint enrollment, Viva Glint Professional Services enrollment, or volume licensing agreement.

Purchasing Minimums

Viva Glint Professional Services are only available for purchase by Qualified Customers who have purchased the Minimum QTY of Base Licenses set forth in the table below.

Viva Glint Professional Services	Minimum QTY	Base Licenses
Glint Customer Success Platinum Administration	40,000	Viva Glint (standalone or suite)
Glint People Science Essentials	1,000	Viva Glint (standalone or suite)
Glint People Science Premium	5,000	Viva Glint (standalone or suite)

Reduction Eligibility

Customers can report a reduction in licenses for Viva Glint Professional Services.

Legacy Glint Entitlement

Purchase of certain Viva Glint Professional Services entitles Qualified Customers to give Eligible Users access to the equivalent Legacy Glint People Science Services (as set forth in the table below) during the Entitlement Term.

Customer's access to and use of Legacy Glint Services are governed by the terms set forth in Customer's most recently active LinkedIn Order Form(s) for Legacy Glint Services. No Microsoft terms, including without limitation the Microsoft Product Terms, DPA, or any agreements between Customer and Microsoft shall apply to Legacy Glint Services.

Viva Glint Professional Services	Legacy Glint People Science Services
Glint People Science Essentials	Glint PS Thought Partnership (C_PS-THGT-PARTNER; Product Id 5069185)
Glint People Science Premium	Glint PS Glint Led (C_PS-GL-LED; Product Id 5069165)

Viva Glint Professional Services	Legacy Glint People Science Services
Glint Customer Success Platinum Administration	Glint PS Platinum Admin (C_PS-GL-PLATADMIN; Product Id 5069175)

Program Agreement Supplemental Terms

The terms and conditions below apply to Customer's volume licensing agreement, as noted.

Supplemental Terms for Microsoft Customer Agreement

Online Services Renewal for Microsoft Customer Agreement

Online Services with auto-renewal will automatically renew the day after their subscription term expires, unless Customer chooses not to renew by opting out of auto-renewal at least of 30 days before the subscription expires by updating the auto-renewal setting in Microsoft Admin Center or by contacting their reseller. Online services subscriptions for government and academic customers will not be automatically renewed unless Customer chooses the auto-renewal option.

Cancellation Policy for Microsoft Customer Agreement

Subscriptions must be cancelled within seven days (168 hours) from the date and time an order is placed (or from the subscription start date, if later) except where otherwise required by law. For details, see https://docs.microsoft.com/en-us/microsoft-365/commerce/subscriptions/cancel-your-subscription?view=o365-worldwide. Subscriptions cancelled within the applicable cancellation period will receive a prorated credit or refund for unused time, calculated on a daily basis. No refunds will be provided for subscriptions cancelled after the applicable deadline.

Coterminosity for Microsoft Customer Agreement

Coterminosity allows a Customer to align the end date (or anniversary date for a multi-year subscription) of a new subscription to an existing subscription. Coterminous subscriptions must all belong to the same Customer. Coterminated end dates can be applied to monthly, annual, and three-year term subscriptions, however, new annual and three-year term subscriptions may not be coterminated with an existing monthly subscription. Charges for the first term of each coterminated subscription will be prorated based on the number of months in the initial term.

Coterminosity may not be applied to third-party, Azure, or trial subscriptions. The coterminosity option does not apply when adding a seat to a current subscription, upgrading a seat to a new or existing subscription, mid-term adjustment of subscription durations, or adjustment of subscription end dates after coterminosty is turned on.

Definition of Management for Qualified Devices

If Customer's volume licensing agreement refers to the Product Terms, the Product List, or the PUR for defining managed Qualified Devices, the following terms apply. Customer "manages" any device on which it directly or indirectly controls one or more operating system environments. For example, Customer manages any device:

- it allows to join its domain, or
- it authenticates as a requirement to use applications while on its premises, or
- it installs agents on (e.g., anti-virus, antimalware or other agents mandated by the Customer's policy), or
- to which it directly or indirectly applies and enforces group policies, or
- on which it solicits or receives data about, and, configures, or gives instructions to hardware or software that is directly or indirectly associated with an operating system environment, or
- it allows to access a virtual desktop infrastructure (VDI) outside of Windows SA, Microsoft Intune (Device) or Windows Virtual Desktop Access Roaming Rights.

A device that accesses a VDI under Roaming Rights only or utilizes Windows To Go on a Qualifying Third Party Device off the Customer's premises only, and is not managed for other purposes as described here, is not considered "managed" for purposes of this definition.

Promotions

There are no active Promotions.

Azure Data Box, Azure Stack Edge, and Azure Stack Hub Ruggedized Terms

This section includes the additional or alternative terms that apply to hardware Products that are identified below. If there is a conflict between the provisions of this section and that of the Product Terms, this section shall govern and control for that hardware Product.

Azure Data Box Hardware Terms

The terms and conditions located at https://docs.microsoft.com/azure/databox/data-box-hardware-additional-terms are incorporated by reference into these hardware terms.

Definitions

Azure Storage means the Microsoft-managed cloud service that provides data storage.

Azure Storage Account means an account that enables Customer to access and store its information using the Azure Storage service.

Data Box Device means a hardware device, including Data Box Software, that Microsoft may provide for Customer's temporary use in transporting data between its premises and the Azure datacenter. The family of Data Box Devices includes Data Box, Data Box Disk, and Data Box Heavy, and successors.

Data Box Software means all software provided on or in connection with a Data Box Device, including all tools, updates, and associated documentation.

Designated Azure Data Center means the Microsoft Azure data center designated by Microsoft as the data center to which Customer will return the Data Box Device, which may be different than the data center where Customer prefers to store its data and/or the location of Customer's Azure Storage Account.

Microsoft Azure Data Box Service or **Service** means the Microsoft Azure service that enables customers to store and transfer large amounts of data to and from data centers on the Data Box Device. For clarity, the Service includes without limitation, any associated technology or functionality, information, materials, and Service updates.

Data Box Software

The Data Box Software is licensed, not sold. Microsoft grants Customer a limited, nonexclusive, nontransferable license to use the Data Box Software installed on the Data Box Device, or used in connection with the Data Box Device, only for the purpose of transporting data as enabled by the Data Box Device. Microsoft reserves all other rights. This license does not give Customer any right to, and Customer may not: (i) use or virtualize features of the Data Box Software separately from the Data Box Device; (ii) publish, copy, rent, lease or lend the Data Box Software; (iii) work around any technical restrictions in the Data Box Software or restrictions in the Data Box Device documentation; (iv) separate and run parts of the Data Box Software on more than one device; (v) install or use non-Microsoft software or technology with Data Box Software in any way that would subject Microsoft's intellectual property or technology to any other license terms; or (vi) reverse engineer, decompile, or disassemble the Data Box Software, or attempt to do so, except if applicable law permit this even when these terms do not and, in that case, Customer may do so only as the law allows.

Azure Service Terms

These Azure Data Box Hardware Terms ("Additional Terms") apply to Customer's receipt and use of the Data Box Device as part of the overall Service. Customer's use of the Service is also subject to Customer's Azure subscription agreement as described at https://azure.microsoft.com/support/legal/. These Additional Terms supplement but do not amend or modify Customer's Azure subscription agreement. If there is a conflict between these Additional Terms and Customer's Azure subscription agreement, the Additional Terms will govern and control for purposes of the use of the Data Box Device as part of the Service.

Product Use Rights

Subject to the payment of applicable fees, Microsoft grants Customer permission to use the Data Box Device to transport and transfer data.

Customer Determination of Appropriateness. Customer agrees (i) that it is solely responsible for determining the appropriateness of using the Data Box Device as set forth in the Additional Terms, and (ii) that Microsoft shall have no liability to Customer or any other third party for any loss of data or other damages.

No Transfer or Access. Customer agrees to not sell, assign, or transfer (including location transfer between states or countries) the Data Box Device, and will not directly or indirectly (through a third party) view, open, modify, disassemble, or otherwise tamper with the Data Box Device (including the Software).

Disclaimer of Warranty

THE DATA BOX DEVICE AND ANY ASSISTANCE BY MICROSOFT PROVIDED PURSUANT TO THESE ADDITIONAL TERMS ARE PROVIDED "AS-IS." CUSTOMER BEARS THE RISK OF USING THEM. MICROSOFT GIVES NO EXPRESS WARRANTIES, GUARANTEES OR CONDITIONS. CUSTOMER MAY HAVE ADDITIONAL RIGHTS OR STATUTORY GUARANTEES UNDER LOCAL LAWS WHICH THESE ADDITIONAL TERMS CANNOT CHANGE. TO THE EXTENT PERMITTED UNDER CUSTOMER'S LOCAL LAWS, MICROSOFT EXCLUDES ALL STATUTORY OR IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT.

Azure Stack Edge Hardware Terms

The terms and conditions located at https://docs.microsoft.com/azure/databox-online/azure-stack-edge-add-hardware-terms are incorporated by reference into these hardware terms.

Definitions

"**Azure Stack Edge Device**" means hardware devices, including Software, that are offered as part of Azure Stack Edge family of devices as described at https://azure.microsoft.com/products/azure-stack/edge/.

"**Azure Stack Edge Service" or "Service"** means the Azure service that enables customers to receive, provision, use and manage an Azure Stack Edge Device. For clarity, the Service includes without limitation, any associated technology or functionality (e.g., creating a share), information, materials, and Service updates.

"**Software**" means all software provided on or in connection with an Azure Stack Edge Device, including all tools, updates, and associated documentation.

Azure Services Terms

These Azure Stack Edge Hardware Terms ("Additional Terms") apply to Customer's receipt and use of the Azure Stack Edge Device as part of the overall Service. Customer's use of the Service is also subject to Customer's Azure subscription as described at https://azure.microsoft.com/support/legal/. These Additional Terms supplement but do not amend or modify Customer's Azure subscription agreement. If there is a conflict between these Additional Terms and Customer's Azure subscription agreement, the Additional Terms will govern and control for purposes of the use of the Azure Stack Edge Device as part of the Service.

Use of Azure Stack Edge Device and Software

Conditions for Azure Stack Edge Use

Subject to the payment of applicable fees, Microsoft grants Customer permission to use the Azure Stack Edge Device, provided that Customer implements the following:
1. **Data Protection**. Customer is responsible for protection, including retaining backup copies of customer data stored on the Azure Stack Edge Device in the event of device failure, loss, or destruction.
2. **Customer Determination of Appropriateness**. Customer agrees (i) that it is solely responsible for determining the appropriateness of using the Azure Stack Edge Device as set forth in these Additional Terms, and (ii) that Microsoft shall have no liability to Customer or any other third party for any loss of data or other damages.
3. **No Transfer or Access**. Customer agrees to not sell, assign, or transfer (including location transfer between states or countries) the Azure Stack Edge Device, and will not directly or indirectly (through a third party) view, open, modify, disassemble, or otherwise tamper with the Azure Stack Edge Device (including the Software).
4. **Accreditation**. To the extent that Customer is a governmental entity, Microsoft also grants Customer the right to place the Azure Stack Edge Device through its accreditation processes to meet its needs, including without limitation, accreditation requirements and processes for use in an unclassified, secret, or top-secret domain.

Software

The Software is licensed, not sold. Microsoft grants Customer a limited, nonexclusive, nontransferable license to use the Software only with the Azure Stack Edge Device. Microsoft reserves all other rights. This license does not give Customer any right to, and Customer may not: (i) use or virtualize features of the Software separately from the Azure Stack Edge Device; (ii) publish, copy, rent, lease or lend the Software; (iii) work around any technical restrictions in the Software or restrictions in the Azure Stack Edge Device documentation ; (iv) separate and run parts of the Software on more than one device; (v) install or use non-Microsoft software or technology with the Software in any way that would subject Microsoft's intellectual property or technology to any other license terms; or (vi) reverse engineer, decompile, or disassemble the Software, or attempt to do so, except if applicable law permit this even when these terms do

not and, in that case, Customer may do so only as the law allows. If there is a conflict between these Additional Terms and any separate license terms for any separate modules or agents used in connection with the Azure Stack Edge Device, the separate license terms for those modules or agents will govern and control for the use of such modules or agents.

Activation/Consent for Internet-based Services

Activation associates the use of the Software with a specific device. During activation and subsequent use of the device, the Software may send information about the Software and device to Microsoft, including device properties (e.g., node, chassis and component numbers, software and firmware versions, timestamps of registration, etc.) and Customer environment details (e.g., time and update server IP address).

Microsoft uses this information to make the Internet-based services available to Customer. By using the Azure Stack Edge Device and Software, Customer consents to the transmission of this information to Microsoft.

Software Updates

Microsoft may make updates available for the Azure Stack Edge Device. To continue to receive Azure Stack Edge support, Customer agrees that it will stay current with applicable updates by downloading and applying the most recent updates.

Survival
The sections titled Azure Services Terms, Software, Survival, and Disclaimer of Warranty will survive expiration or termination of these Additional Terms.

Disclaimer of Warranty
THE AZURE STACK EDGE DEVICE AND ANY ASSISTANCE BY MICROSOFT PROVIDED PURSUANT TO THESE ADDITIONAL TERMS ARE PROVIDED "AS-IS." CUSTOMER BEARS THE RISK OF USING THEM. MICROSOFT GIVES NO EXPRESS WARRANTIES, GUARANTEES OR CONDITIONS. CUSTOMER MAY HAVE ADDITIONAL RIGHTS OR STATUTORY GUARANTEES UNDER LOCAL LAWS WHICH THESE ADDITIONAL TERMS CANNOT CHANGE. TO THE EXTENT PERMITTED UNDER CUSTOMER'S LOCAL LAWS, MICROSOFT EXCLUDES ALL STATUTORY OR IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NON-INFRINGEMENT.

Azure Stack Hub Ruggedized Hardware and Azure Stack Hub Datacenter Hardware Terms

These Hardware Terms apply to Azure Stack Hub Ruggedized and Azure Stack Hub Datacenter Devices.

Definitions
Documentation means the Azure Stack Hub Ruggedized and Azure Stack Hub Datacenter user documentation set forth in https://aka.ms/azurestackhub.

Appliance means an integrated hardware system, including Software, that Microsoft may offer as part of the Azure Stack family of Appliances as described at https://azure.microsoft.com/en-us/overview/azure-stack/, for Customer's use at Customer's designated premises.

Service means the Azure service that enables Customers to receive, provision, use, and manage the Appliance in running Azure services. For clarity, the Service includes without limitation, any associated technology or functionality, information, materials, and Service updates.

Software means all software in object code form provided on or in conjunction with an Appliance, including all tools, updates, and associated documentation.

Azure Service Terms; Limitations

Azure Service Terms

These Stack Hub Appliance Hardware Terms ("Additional Terms") apply to Customer's receipt and use of the Appliance as part of the overall Service. Customer's use of the Service is also subject to the Azure Service Agreement and Terms located at https://azure.microsoft.com/en-us/support/legal/, which includes without limitation, the Customer's customer or other license agreement and the Product Terms. These Additional Terms supplement but do not amend or modify any existing terms in the Azure

Service Agreement and Terms. If there is a conflict between these Additional Terms and any of the terms comprising the Azure Service Agreement and Terms, the Additional Terms will govern and control for purposes of the use of the Appliance as part of the Service.

Limitations

Microsoft is not obligated to continue to make the Appliance or any other hardware product available in connection with the Service. The Appliance may not be available in certain regions or jurisdictions, and even where it is, it is subject to availability. Microsoft is not responsible for delays related to the Service that are outside of its direct control. Microsoft reserves the right to refuse to offer the Service and corresponding Appliance to anyone in its sole discretion and judgment. Microsoft may suspend the Service in its discretion in accordance with the terms for Microsoft Azure services under the Universal License Terms for Online Services.

Use of the Appliance and Software

Conditions for Appliance Use

Subject to the payment of applicable fees, Microsoft grants Customer permission to use to the Appliance, provided that Customer implements the following:
1. **Data protection**. Customer agrees to take certain precautions regarding its customer data: (i) Back up and protect all data prior to copying to and storing on the Appliance; (ii) do not delete the data from Customer's premises and equipment before Customer has successfully transferred such data from the Appliance to Microsoft; and (iii) Apply updates as set forth herein and perform preventative maintenance as recommended by Microsoft.
2. **Customer Determination of Appropriateness**. Customer agrees (i) that it is solely responsible for determining the appropriateness of using the Appliance as set forth in these Additional Terms, and (ii) that Microsoft shall have no liability to Customer or any other third party for any loss of data or other damages.
3. **Deployment pre-requisites and facility assessment**. Customer agrees to meet Microsoft's requirements necessary to support the installation, use, maintenance, and removal of the Appliance.
4. **No Transfer or Access**. Customer agrees to not sell, assign, or transfer (including location transfer between states or countries) the Appliance, and will not directly or indirectly (through a third party) view, open, modify, disassemble, or otherwise tamper with the Appliance (including the Software).

Accreditation

To the extent that the Customer is a governmental entity, Microsoft also grants Customer the right to place the Appliance through its accreditation processes to meet its needs, including without limitation, accreditation requirements and processes for use in an unclassified, secret, or top secret domain.

Software

The Software is licensed, not sold. Microsoft grants Customer a limited, nonexclusive, nontransferable license to use the Software with the Appliance, and for no other purpose. Microsoft reserves all other rights. This license does not give Customer any right to, and Customer may not: (i) use or virtualize features of the Software separately from the Appliance; (ii) publish, copy, rent, lease or lend the Software; (iii) work around any technical restrictions in the Software or restrictions in the Appliance documentation (if any); (iv) separate and run parts of the Software on more than one device; (v) install or use non-Microsoft software or technology in any way that would subject Microsoft's intellectual property or technology to any other license terms; or (vi) reverse engineer, decompile, or disassemble the Software, or attempt to do so, except if applicable law permit this even when these terms do not and, in that case, Customer may do so only as the law allows. Subject to the foregoing limitations, Customer's use of the Software is subject to the software license terms presented to or otherwise made available to Customer in connection with the Appliance, and also includes without limitation, any separate license terms for any separate modules or agents to run additional Azure services on or in connection with the Appliance. If there is a conflict between these Additional Terms and any separate license terms for any separate modules or agents used in connection with the Appliance, the separate license terms for those modules or agents shall govern and control for the use of such modules or agents.

Restrictions on Benchmarking

Customer may not use the Software for comparisons or "benchmarking," except for Customer's internal purposes, nor publish or disclose the results thereof.

Activation/Consent for Internet-based Services

If activation of the Software is necessary, activation associates the use of the Software with a specific device. During activation and subsequent use of the device, the Software may send information about the Software and device to Microsoft, as described in the Documentation. Microsoft uses this telemetry to make the Internet-based services available to Customer. By using the Appliance and Software, Customer consents to the transmission of this information to Microsoft.

Software Updates

Microsoft may make Software updates available for the Appliance. If updates are made available, the updates from Microsoft will be licensed by Microsoft and any third-party updates will be licensed by the applicable third party. In order to continue to receive Appliance support, Customer agrees that it will stay current with applicable updates by downloading and applying the most recent updates in compliance with Microsoft's published or provided policy.

Delivery, Deployment, and Use of the Appliance
- **Delivery**. The Service and the Appliance are offered as a Microsoft first party service under these Additional Terms and the Azure Service Agreement and Terms, and by which Microsoft will deliver the Appliance to Customer's specified location ("Customer Specified Location"), subject to Service and Appliance availability.
- **Deployment**. Microsoft will initiate and complete the deployment of the Appliance at the Customer Specified Location, which can typically take up to fifteen (15) days.
- **Use**. As part of the Service, Microsoft allows Customer to use the Appliance for as long as the Customer has an active subscription to the Service, which use includes but is not limited to, use of the hardware, hardware support, and basic software infrastructure services (e.g., storage, compute, including virtual machines and containers). As part of the deployment and use of the Service and the Appliance, Customer agrees to provide assigned resources at the level reasonably requested by Microsoft to address pre-requisite activities, information, items for deployment, and ongoing management.
- **Optional Services**. Customer may use and subscribe to additional, optional services in connection with the Service and Appliance that will be subject to a separate fee or subscription.

Title and Risk of Loss; Shipment and Return Responsibilities

Title and Risk of Loss

All right, title and interest in each Appliance is and shall remain the property of Microsoft, and except as expressly set forth in these Additional Terms, no rights are granted to any Appliance (including under any patent, copyright, trade secret, trademark or other proprietary rights). Customer will compensate Microsoft for any loss, damage or destruction to or of any Appliance while it is at any of Customer's locations or in the circumstances described in Section "Responsibilities if a Government Customer Moves the Appliance between Customer's Locations," with the exception of expected wear and tear, which includes minor damage (e.g., dings and dents) that do not compromise the structure or functionality of the Appliance. Customer is responsible for inspecting the Appliance upon receipt from the carrier and for promptly reporting any damages to Microsoft Support at adbeops@microsoft.com. Customer is responsible for the entire risk of loss of, or any damage (other than expected wear and tear) to, the Appliance once it has been delivered by the carrier to Customer's designated address until the Microsoft-designated carrier accepts the Appliance for return delivery.

Microsoft may charge Customer a lost device fee for the Appliance (i) if the Appliance is lost or materially damaged while it is Customer's responsibility as described in the previous sentence, or (ii) if Customer does not return the Appliance to the Microsoft-designated carrier for return or Microsoft pursuant to Section "Shipment and Return of the Appliance" below, within 30 days from the end of Customer's use of the Service. Microsoft reserves the right to change the fee charged for lost or damaged devices, including but not limited to, by charging different amounts for different device form factors.

Shipment and Return of the Appliance

Customer will be responsible for a one-time, per Appliance metered shipping fee for shipping costs and return logistics ("Logistics Fee"), in addition to   any taxes, or applicable customs fees. The Logistics Fee includes shipping, setup, refurbishment, data destruction, and coverage for loss of the Appliance in transit. When returning an Appliance to Microsoft, Customer agrees to package and ship the Appliance in accordance with Microsoft's instructions, including the use of a carrier designated by Microsoft and the packaging materials provided by Microsoft. Customer is responsible to remove Customer's data from the Appliance prior to returning it to Microsoft, and follow any Microsoft issued processes for wiping or clearing the Appliance.

Disposition at End of Life

Notwithstanding the foregoing, if Microsoft in its sole discretion determines that the Appliance as part of the Service has reached or exceeded its useful lifespan while it is in the possession of Customer, then Microsoft has the right and ability to change the Appliance or any components thereof. Customer agrees to provide Microsoft with limited access to Customer Specified Location and the Appliance for this purpose. Microsoft will discuss logistics and timing of activities related to this change-out of the Appliance or Appliance components with Customer.

Retention of Hardware Components Option

Microsoft may provide Customer with separate fee options to retain specified Appliance components (e.g., hard drives) for destruction by Customer or have Microsoft dispose of said components at the end of the Term or Appliance decommissioning.

Responsibilities if a Government Customer Moves the Appliance between Customer's Locations

If a government Customer is using an Appliance during the government Customer's use of the Service, the government Customer only may, at government Customer's sole risk and expense, transport the Appliance to government Customer's different locations to upload government Customer's data in accordance with Section "Use of the Appliance and Software" above. Subject to Section "Export Control Laws", government Customer is responsible for obtaining at government Customer's own risk and expense any export license, import license and other official authorization for the exportation and importation of the Appliance and associated Software and government Customer's data to any such different location of government Customers.   Government Customer is also solely responsible for customs clearance at any such different location of government Customer's, and government Customer will bear all duties, taxes and other official charges payable upon importation as well as any and all costs and risks of carrying out customs formalities in a timely manner. Government Customer agrees to comply with and be responsible for all applicable import, export and general trade laws and regulations should government Customer decide to transport the Appliance beyond the country border in which Customer receives the Appliance. Notwithstanding the foregoing, if government Customer transports the Appliance to a different location as set forth in this Section, government Customer agrees to cause the Appliance to return to the country location where Customer received it initially, prior to returning the Appliance to Microsoft or a government Customer Specified Location. Government Customer acknowledge that there are inherent risks in shipping data on and in connection with the Appliance, and that Microsoft will have no liability to government Customer for any damage, theft, or loss occurring to an Appliance or any data stored on one, including without limitation in transit. It is Customer's responsibility to obtain the appropriate support agreement from Microsoft in order to meet government Customer's operating objectives for the Appliance; however, depending on the location to which government Customer intends to move the Appliance, Microsoft's ability to provide hardware servicing and support may be delayed, or may not be available.

Non-government Customers shall not transport an Azure Stack Hub Ruggedized device or Azure Stack Hub Datacenter device to a country different from the one to which it was delivered by Microsoft.

Fees

Microsoft will charge Customer specified fees in connection with Customer's use of the Appliance as part of the Service, with the current schedule of fees as provided by Microsoft. For clarity, Customer may use other Azure services in connection with Customer's use of the Service, and Microsoft deems such services as separate and additional services subject to separate subscription or metered fees and costs, as those additional services are installed on the Appliance. By way of example only, Azure Storage, Azure Compute, and Azure IoT Hub are separate Azure services, and if used (even in connection with its use of the Service), separate Azure metered services will apply.

Survival

Sections Azure Services Terms, Software, Survival, Disclaimer of Warranty, Privacy Terms and Export Control Laws will survive expiration or termination of these Additional Terms.

Disclaimer of Warranty

THE APPLIANCE AND ANY ASSISTANCE BY MICROSOFT PROVIDED PURSUANT TO THESE ADDITIONAL TERMS IS PROVIDED "AS-IS." CUSTOMER BEARS THE RISK OF USING THEM. MICROSOFT GIVES NO EXPRESS WARRANTIES, GUARANTEES OR CONDITIONS. CUSTOMER MAY HAVE ADDITIONAL CONSUMER RIGHTS OR STATUTORY GUARANTEES UNDER LOCAL LAWS WHICH THESE ADDITIONAL TERMS CANNOT CHANGE. TO THE EXTENT PERMITTED UNDER CUSTOMER'S LOCAL LAWS, MICROSOFT EXCLUDES ALL STATUTORY OR IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NON-INFRINGEMENT.

Hardware Updates; Support

Hardware Updates

Microsoft is not required to provide Customer with any new Appliance releases, enhancements, or updates for the Appliance. If Microsoft opts to do so, such new releases, enhancements, or updates ("Hardware Updates") will be subject to the terms of these Additional Terms. Customer agrees to provide limited access to the Customer Specified Location for the purpose of applying new hardware components or the Appliance itself.

Support

As part of the subscription to the Service, Microsoft will provide a baseline level of support for the Service and Appliance. Customer will also enroll in the Microsoft Premier Support plan.

Maintenance
Customer agrees that it will not allow anyone to access, repair, or otherwise maintain the Appliance at the Customer Specified Location other than Microsoft or its designees upon request, except for an emergency situation such as fire or imminent personal injury.

Privacy Terms
- **Privacy**. The Microsoft Privacy Statement (http://www.microsoft.com/privacystatement/OnlineServices/Default.aspx) applies to the Service and the Appliance under these Additional Terms.
- **Terms**. Customer agrees to comply with all data protection laws that apply to Customer's use of the Service, its handling of data with the Appliance or in Azure, or if government Customer moves the Appliance as described in the "Responsibilities if a Government Customer Moves an Appliance between Customer's Locations" section above.
- **Processing of Personal Data**. To the extent Microsoft is a processor or subprocessor of personal data in connection with the software, Microsoft makes the commitments in the European Union General Data Protection Regulation Terms of the Online Services Terms to all customers effective May 25, 2018, at http://go.microsoft.com/?linkid=9840733.

Applicability of Service Level Agreement
Service level agreements that apply to specified Azure services listed in the Service Level Agreement for Microsoft Online Services do not apply to the Service or the Appliance, since Customer is running the Service and Appliance locally, where customer controls and has responsibility for the physical environment.

Amazon Workspaces Deployments

Notwithstanding anything in the Outsourcing Software Management clause to the contrary, each Licensed User of an Eligible Product may install and use a single active instance (with failover instances) of the Microsoft 365 Apps for enterprise/business software in Amazon WorkSpaces. Such instances must be running on the Enterprise Monthly Channel or Current Channel.

Eligible Products are:
- Microsoft 365 E3/E5
- Microsoft 365 A3/A5
- Microsoft 365 Business Premium

In addition to the above, each Licensed User of an Eligible Product may also install and use a single active instance (with failover instances) of the following Additional Client Application(s) in Amazon Workspaces if they are also licensed for that Additional Client Application(s). Such instances must be running on the Enterprise Monthly Channel or Current Channel.

Additional Client Applications:
- Microsoft Project Plan 3/5
- Microsoft Visio Plan 2

Student Use Benefits and Academic Programs

This section highlights the specific benefits provided to Students in Open Value Subscription for Education Solutions, School Agreement, Enrollment for Education Solutions, and Cloud Solution Provider programs.

Product Key and Software Distribution of Academic Program Benefits

Students and faculty may receive product keys or pins from non-Microsoft.com sites. If fraudulent behaviors are observed, Microsoft may, in its discretion, remove or block the distribution of the software, product keys, and pins until such fraudulent behavior has been mitigated or resolved.

Student Use Benefit Entitlements by Qualifying Program

The following table defines Student Use Benefits for specific products licensed through Academic programs. For each Product in the first column, the appropriate Student Use Benefit Product(s) are listed along with the number of licenses available for Students per paid Faculty/Staff, Education Qualified User, or Knowledge Worker license.

Qualifying Product	Student Use Benefit[1]	Program Availability	Student Instances Provided per Faculty/Staff or Knowledge Worker
Advanced Threat Analytics	Advanced Threat Analytics	OVS-ES, School, EES	15
Microsoft Entra ID P1	Microsoft Entra ID P1	OVS-ES, School, EES, CSP	15

Windows Education E5 (Per Device)	Windows Education E3 (Per Device)[2]	OVS-ES, School	40

[1]Licenses acquired through the Student Use Benefit are not eligible for Software Assurance Benefits.

[2]*The Student Use Benefit includes rights to Windows E3/A3 only.*

Windows Desktop Operating System Limitations

Licenses acquired through the Student Use Benefit include rights to access Azure Virtual Desktop virtual machines (refer to the Azure Virtual Desktop section of the Microsoft Azure Services), but do not include any further Windows virtualization rights.

Subscription License Suites

Online Services may be available for purchase as Suites of Online Services. The tables below detail the applicable online service Suite SL that fulfills the SL requirements for each individual online service. For Education and Government offers, see the Public Sector tables below.
